1. New to NAQCCFL

Yahoo group: naqccfl
Date: 2013-05-22 21:00:40 UTC
From: wb4mnk@bellsouth.net
Topic: 1 Message: 1

I would like to bring the members of NAQCCFL up to date on our new exciting Yahoo group features. We now have a calendar with four months of location, time and date where you will know the information for our outings with ample notification. We also have some great links posted in the links file plus have started with a few photo's in the photo section.
As this Yahoo group progresses we are open for any and all suggestions that will be a plus for all members.
Any questions or suggestions please post to the to the NAQCCFL Yahoo group.

72,
Art

Art,
Thanks for the email.
I look forward to meeting the group. I live in Gainesville, FL., about 100 miles from you. I hope to drive down for one of your events. I have been a ham since the early seventies but mostly SSB. I am currently trying to improve my CW skills and have almost finished an Elecraft K1.
I will try and get my XYL to help with a picture. I have a real Love/ Hate relationship with my computer.

Hi Tom,

Great to hear from you Tom. Please let me or Don K3RLL know when you decide to make the trip down here for a few hours of QRP in a park. We are a small group at this time but have some great operators that really like QRP CW and are very helpful. I know what you mean about the love/ hate relationship with computers. Congratulations on the K1 build. That is a fantastic QRP rig and I know you will enjoy it.
Looking forward to seeing you soon.

Good evening Tom,

We're looking forward to any possible trip you can make down this way to join us for a day of burning holes in the ionosphere.

For what bands are you building your K1?
Are you adding any options to it?
I have a K1 40/20 for which I built a second 30/17 filter board and have really enjoyed using it. You're going to love that little rig.

Topic: 1 Message: 6

Good Afternoon Don and Group,

My K1 is a four bander and I am building it for 40/30/20/ 17. It checks out pretty good on receive so far. I am missing an RF Choke in the transmitter section. It should arrive today from Elecraft. I picked up it was missing, when I did my inventory, but then forgot to order it.

My only accessory so far is the tilt stand. I have an Elecraft T1 tuner I will use. I am an Elecraft fan. I also have a K2 serial #3047 I built a few years back. I then upgraded it to a K2/100. Now I am going back to QRP. I could be confused, but at 76 yrs., I'll just blame it on senility. The mailman should be arriving about now so I will go get my missing part.

I just noticed that the NAQCCFL portable operation is set for June 21, 2013. Field Day is June 22-23,2013 and I know many of you operate during Field Day and on Friday June 21, 2013 are getting everything ready for the big Field Day event.

I am suggesting that we move the NAQCCFL P OP to June 28,2013.

Please post your suggestions asap if the June 28,2013 will work for you.

16. NAQCC-FL June Field Event

Yahoo group: naqccfl
Date: 2013-06-24 00:52:23 UTC
From: k3rll
Topic: 16 Message: 16

==========

The Florida Chapter of NAQCC will hold their June field event at Reed Canal Park in South Daytona Beach on Friday, June 28, 2013.

Planned frequencies and times include: 7.030-7.042 from 13:00 to 13:45 UTC, 10110-10115 from 13:45 to 14:15 UTC, 14059-14062 from 14:15 to 15:30 UTC.

Initial known operators at this time include WB4MNK Art (#5274) and WB4OMM Steve (#5913), but all members are welcome either on-site or via the airwaves.

Reed Canal Park is located on Nova Road in South Daytona Beach. Full details with maps and driving directions are on the NAQCC-FL Yahoo Group: http://groups.yahoo.com/group/naqccfl/ or upon request.

Thank you,
NAQCC-FL

Good Day Everyone,

I've been an NAQCC member for a while and finally became aware of this Yahoo group and joined up just a couple of days ago. I have a brief bio on QRZ.

I managed to work Steve WB4OMM this morning on 7.031 at 1356Z. I was using my KX3 at 5w to an end-fed wire. He was putting out a nice signal--569--that got stronger after our QSO. What rig were you using Steve? I tried the other bands, but no go. Pretty noisy here as a T-storm was moving in. I hope to work you all during some of the NA sprints. If your field events were closer, I'd jump right in. Next time I plan to move out into the field, too. Well, at least out on to the deck hi hi.

Tnx es 72

Hi John,

Welcome! This is the NAQCC "Central Florida Chapter". There are quite a few of us CW QRP folks that are active pretty regularly.

I got all of your FB signal this morning, you were an honest 59 on the meter - with some QSB (the QSB got worse as the morning wore on!).

The station at my ends was a YouKits! HB1B transceiver (3w output) to a 40m Inverted Vee with center at 18; along with a WinKeyer, laptop with GenLog, and a Vibroplex Code Warrior Jr. I worked 5 stations in two hours with this setup - 2 from AL; one each from FL, NC, and KY .

There were 4 of us operating (also on 30 and 20M) and 2 "helpers". Look in the next NAQCC Newsletter and you'll see our "Op Report" with a photo.

For the last 3 ops, we made up a unique QSL with a photo and specific to the site, we'll be doing that for this one too - you will automatically get on in the mail!

Thanks for the FB QSO this morning!!!

72/73!

32. FW: TEN-TEC Newsletter

Yahoo group: naqccfl
Date: 2013-06-29 21:16:41 UTC
From: Stephen Craft
Topic: 32 Message: 32

For those interested in the Argonaut VI, the latest Ten Tec newsletter says that Sherwood has released its results.

Steve, W1SGC

From: Jim Wharton [mailto:newsletter@...]
Sent: Saturday, June 29, 2013 9:07 AM
To: scraft1@...
Subject: TEN-TEC Newsletter

Ten Tec, Inc.News <http://www.tentec.com/newsletter/images/ttNews.jpg>

Dear TEN-TEC Ambassadors & Friends,

We hope everyone is having an enjoyable summer experiencing all the thrills of DX and working QRP. Your friends at TEN-TEC are busy as usual making ready the new Rebel 506 for delivery in late July. Dayton was a huge success this year with sales exceeding 2012. We thank you and also the wonderful group of Ambassadors who helped us in the booth this year. We could not have done it without you.

As time is marching on we are beginning to make plans for another TEN-TEC Homecoming Hamfest September 27th & 28th. This is always a huge event and preparation will begin before we know it to welcome our guests from far and near. Check the web site and watch for further information and news as time draws nearer.

On a rather sad note, about the time you read this message, we will have sold out of the last 566 Orion II transceiver. Unfortunately, due to the availability of some very critical parts plus skyrocketing prices for difficult components, the staff at TEN-TEC decided to discontinue this product. This does not mean we will not trade or sell used and demo Orion's and Orion II models. We will continue service and support this product as we have done in the past with all TEN-TEC products. Is a new Orion III on the horizon? There are plans for several new TEN-TEC products lined up for the future but at this time no concise decision has been made for another Orion transceiver.

We are very pleased with the results of our efforts on the Argonaut VI with matching 418 linear amplifier. Check out the product review in the August QST and Rob Sherwoods testing www.sherweng.com. More fantastic news: This year, a pair of Eagle transceivers will be working as W4S at Ft. Pitkins on Santa Rosa Island off the coast of Pensacola in July for another IOTA contest.

As always the staff here at TEN-TEC continue to welcome your support and participation in the TEN-TEC user nets that meet every Sunday. The TEN-TEC 40 meter SSB net will start first at 20:00 UTC on or about 7.260 LSB and the 20 meter SSB net will follow at 21:00 UTC on or about 14.325 USB + or -

Sincerely & 73

Your TEN-TEC Sales Staff

Thanks Steve,

Very interesting. I wonder if you can tell the difference by ear between the KX3 and the Ten Tec VI. Some of those number I don't understand. Looks like the K2 is in the mix.

> As time is marching on we are beginning to make plans for another TEN-TEC Homecoming Hamfest September 27th & 28th. This is always a huge event and preparation will begin before we know it to welcome our guests from far and near. Check the web site and watch for further information and news as time draws nearer.
>
> On a rather sad note, about the time you read this message, we will have sold out of the last 566 Orion II transceiver. Unfortunately, due to the availability of some very critical parts plus skyrocketing prices for difficult components, the staff at TEN-TEC decided to discontinue this product. This does not mean we will not trade or sell used and demo Orion's and Orion II models. We will continue service and support this product as we have done in the past with all TEN-TEC products. Is a new Orion III on the horizon? There are plans for several new TEN-TEC products lined up for the future but at this time no concise decision has been made for another Orion transceiver.
>
> We are very pleased with the results of our efforts on the Argonaut VI with matching 418 linear amplifier. Check out the product review in the August QST and Rob Sherwoods testing www.sherweng.com. More fantastic news: This year, a pair of Eagle transceivers will be working as W4S at Ft. Pitkins on Santa Rosa Island off the coast of Pensacola in July for another IOTA contest.
>
> As always the staff here at TEN-TEC continue to welcome your support and participation in the TEN-TEC user nets that meet every Sunday. The TEN-TEC 40 meter SSB net will start first at 20:00 UTC on or about 7.260 LSB and the 20 meter SSB net will follow at 21:00 UTC on or about 14.325 USB + or -

35. Lake Helen

Yahoo group: naqccfl
Date: 2013-07-11 19:36:35 UTC
From: wb4mnk@bellsouth.net
Topic: 35 Message: 35

NAQCCFL P OP at Lake Helen is Friday July 19 and we have two stations so far that will be operating. Could use another operator / station. Any member wanting to fill that third spot ? Of course there is room for more than three stations. So let use hear from you. I promise it will be perfect WX and the bands will be wide open>>>>>>Fingers Crossed.

72,
Art

Steve,

Name of park is Blake Park in Lake Helen,FL.
The way I go is 44 to first light before fair grounds and turn left on to Prevatt ave. Watch for Ohio ave which is a few miles and turn right on Ohio ave. When you come to the first intersection you will see the park to your right but continue straight to the next intersection where you will see the police station then turn right onto S. Lake drive and a few hundred feet you will see the pavilion on your right. My number is 386-795-7855 or if you have a GPS you should coast right on in.

Hi Steve,

You know we only post good news on the group <Grin> I kind of look at these predictions this way. When the good to great propagation returns I won't be on the ham bands probably so my goal is to do the best I can do with what we have. To me it is always amazing how the bands seem to open up when a big contest starts.

I fully agree these predictions are very important so we can plan on the best times to operate where we will be successful. I agree that it is now a challenge to find and have some good QSO's especially when you are running 3 watts to a piece of wire. I believe the IARU contest is on this week end so that should be a good gauge on conditions.

I see that the SFI for this weekend is supposed to be above 110 with a low K. So maybe conditions will be good for IARU.

Worked a guy named Bob (W9RZR) on 10 meters yesterday running 12 watts. He lives in Indiana near where I used to work back in the late 1990s, but his granddaughter lives in Deltona.

The NAQCC Florida Chapter will hold their July field event from Blake Park in downtown Lake Helen, FL on Friday July 19 from 13:00 to 17:00 UTC. We will have at least two stations on the air: Steve WB4OMM #5913 and Art WB4MNK #5274. Our planned operating frequencies will be 7040, 10116 and 14060, give or take QRM. Please listen for us or, if anywhere near the area in North Central Florida, please come by and join the fun.

Thank you.

Art, WB4MNK #5274

46. New Rig!!

Yahoo group: naqccfl
Date: 2013-07-25 01:25:38 UTC
From: Stephen W. Szabo
Topic: 46 Message: 46
Attachments: 3 described; binary payloads are missing from this source WARC

For the last few days, I have been building a PigRig 40M QRP/CW transceiver, and manufacturing a case for it (I started Sunday evening).

I finished it late this afternoon (Thursday), and at 8:27 EDT, made my first QSO with it! Wow! What a rush!!!!

Looking forward to bringing it to a portable op.

Fixed at 7.030.7 MHz and a little less than 4W output with 12.5 V. Lots of volume! Built in keyer!!

I've attached the QSL card I just sent to the fella in NJ that worked me - he gave me a 449!

Also two larger photos of the rig.

72 to all!!

Steve WB4OMM

(now for my next project - putting my 4SQRP xmitter/recvr/ and Magic Box in cases!!!).

Hi Art……

First, thanks!!

They are still available (now version #2, and can get in 40 – 7122 or 80- 3580.7?) configs…..Diz is talking about making some more for the 7030.7, might be a few more weeks. If I see something, I'll let you know.

I'm bringing it to our next outing…..you can play with it if you want!

Hi Jerry,

Just want to let you know that we also spot ourselves on the NAQCC spotter by call and frequency etc. This way if you want you can check the frequency for the time and maybe one of us might be able to work you. So when we get a few days out from the event we will spot the stations that will be on the air. Thanks for your interest and would be happy to see you at one of the NAQCCFL Chapter portable operations at a park.

From: Don
Topic: 72 Message: 72
Attachments: 1 described; binary payloads are missing from this source WARC

NAQCC-FL OCTOBER EVENT NOTICE:

Come one, come all - the Florida Chapter of NAQCC is having their October field event this Friday, October 18th.

Location: Port Orange Causeway Park - under the Dunlawton Bridge in Port Orange at the shelter near the boat ramp

Time: 9:00 AM until we adjourn for lunch. (Surely there is a Wendy's nearby?)

This is a pretty good radio location with such a great ground plane surrounding the operating area.

Some enterprising member really needs to erect a multi-wave vertical dangling from the bridge.

(Extra points will be awarded to the one who does so - and shares the feedline with the rest of us.)

Thanks for letting me know.

That's right about pictures. I forgot that Yahoo strips them out of email messages.

Duh!

Isn't that why we were sending out our notices as PDF's or something?

Fortunately, as you said, everyone who is going not only knows where it is, but lives close by.

Hey,

The time and directions were in print so most people except me have a GPS in there car so shouldn't be a problem.
Did you send info to John or the new boss so the NAQCC members will be notified?

Also Darryl or Steve or you can post us on QRP Spots.

Are you sure you want the 27.50 in a check or cash ?

What antenna are you going to use ? Reason I ask is the room ?

You need another hat. Hi hi hi...!

Hey OM..where EXACTLY are we gonna' be tomorrow...East or West side of span, and North or South??? "Under the bridge" is a bit vague for this former detective!!

(and should we be worried about motorcycles????)

Steve,

We will be on the west end of the Dunlawton bridge on the north side.
As you head east just before the bridge you will see on the right or south side a tackle shop. Get off Dunlawton there and head east turn North under the bridge and you will see a pier for fishing and a gazebo where we will be.

From: Stephen W. Szabo
Topic: 91 Message: 91

-- SOUTHERN PARKPEDITION ANNOUNCED --

WHAT: The Florida Chapter of NAQCC will be holding its monthly Field Event.

WHEN: Friday, November 15, 2013 9:00 AM - 12:00 noon (or whenever hunger wins out over propagation)

WHERE: Spruce Creek Park, Port Orange FL

FREQUENCIES: Please listen for us near 7.041, 10.116, 14.061 and 18.080 - WB4OMM will post to www.qrpspots.com <http://www.qrpspots.com> via the Internet when we QRV and occasionally during the operation to let everyone know who is on and where. He will also post when we QRT. QSLs via the operator call.

WHO: Art WB4MNK & Steve WB4OMM plus whoever else can make it.

72/72,
Steve WB4OMM

NOTE: If images and maps don't load, please see the WORD.Doc attachment.

FLORIDA CHAPTER NAQCC
December 20, 2013 Portable Op

Our monthly QRP gathering will be held in Hontoon State Park, west of DeLand off Old Route 44 on Friday, December 20th. We will convene across the water in the picnic area adjacent to the large “Hontoon Park” sign about 9:30 AM.
There is plenty of room for multiple stations so please bring your gear and don't forget to pack your peanut butter & jelly sandwiches as well as something to drink. A map and driving directions are enclosed.
This site was selected by popular demand as we have been there before with consistently good results in an aesthetically attractive and RF-quiet environment. See you there!

Hontoon Island State Park : This island, located in the St. Johns River in Volusia County , welcomes visitors to enjoy nature and history in quiet solitude. The island is accessible only by private boat or park ferry. Evidence of Native American habitation over thousands of years can be witnessed as visitors hike through the park. Stop in and walk through the impressive visitor center to learn more about the many inhabitants and uses of Hontoon Island over the years. Boating, canoeing, and fishing are popular activities and canoe rentals are available. Picnic areas include tables, grills, and a playground. Overnight boat slip rentals are also available. The park's ferry operates daily from 8:00 a.m. to one hour before sunset. Located six miles west of Deland off State Road 44.

Driving directions:
1. Follow State Road 44 (New York Avenue) west out of Deland for 2 miles.
2. Bear LEFT onto Old Route 44 just before the RR tracks and follow Old Route 44 for 2 miles. You will pass the restored DeLand RR Station along the way.
3. Turn LEFT onto C.R. 4125 Hontoon Road and follow 2.4 miles.
4. Turn LEFT onto River Ridge Road and follow 0.8 of a mile to park entrance and parking lot on your LEFT just before the dead end. (You missed this last turn if you end up at a dead end with no State Park.)
5. A park ranger will take you on the free ferry across the waterway to the park.

I heard Art, wb4mnk here in AZ this morning just after 1500Z. Called him on my KX1 at 3.5 watts, but no answer.

Then a WA station got on near 14060 and bled over so bad, I heard nothing more. Now I have an ID station calling CQ on 14060, no Art still.

I tried 30 and 40 m, but nothing heard here.

I'll keep listening also.....

Heard you both here in Orlando... but only at esp level. I tried calling to see if Art would swing his beam my way but don't think he heard me either. Heard stations working Art, but think I was too close for 20m contact.

I did snag Keith GI0SSA/W4 on 30m with a good sig. I was using my Sierra and a jumper dipole up about 20 ft down by Lake Fredrica about 3 mi north of Orlando airport.

Heard a good bit of 0 and 7 activity on 20m but way too weak to copy 100%. Kept my antenna low trying to do NVIS, might have worked if I was in my normal 45 ft tree.

Hi Kelly,

Thanks for giving it a try today and sorry I missed you. I had a pile up but couldn’t hear it. What a shame.

Super on working Keith who is avid CW operator and had a lot of fun today. Look him up on QRZ which is interesting on how he operates at his week end home on a island with out power.

I was using a 51 x 16 end fed wire on a 30’ push up pole. Rig was a Kx1.

Take care Kelly.

72,
Art

Heard you both here in Orlando... but only at esp level. I tried calling to see if Art would swing his beam my way but don't think he heard me either. Heard stations working Art, but think I was too close for 20m contact.

I did snag Keith GI0SSA/W4 on 30m with a good sig. I was using my Sierra and a jumper dipole up about 20 ft down by Lake Fredrica about 3 mi north of Orlando airport.

Heard a good bit of 0 and 7 activity on 20m but way too weak to copy 100%. Kept my antenna low trying to do NVIS, might have worked if I was in my normal 45 ft tree.

Hi Ed,

Thanks for trying today and sorry I didn’t hear you. I actually have your call written down on the top of my log sheet to remind me to listen for your call. Thanks for letting me know my signal was at least getting to AZ. We had a good day and work statins all over the USA. Always next month.

Well, another bust for me guys, never made a contact with you.

I did hear Art, WB4MNK, and called, but no answer. The band didn't cooperate today. And I had numerous stations on 14060 thru out the morning, making it impossible to pull your qrp signals out.

Art, I'd have to give you a RST of 339 on 20 m here in AZ, I was able to copy you thou, you just didn't hear me :(

We'll try again next month.....

Hi Joel,

What a great idea to have the NAQCCFLC members and friends to have an eyeball at Hamcation.

Count me in Joel and in the area that Steve will be checking cards might be a good place to meet.

When we get a little closer we just need to post a time for the event. Well let's see we have Joel, Ron, Steve and Art sign up so who else would like to have an eyeball with the NAQCCFLC group.

Thanks Joel.

FLORIDA CHAPTER NAQCC

January 17, 2014 Field Event

Our monthly QRP gathering and field activity will be held in Buschman Park, 4575 Spruce Creek Road, Port Orange FL on January 17, 2014. We will convene at the parking area in the park at 9:30 AM.

There is room for multiple stations so please bring your gear and something to drink. Lunch will follow at the Wendy's Restaurant on Dunlawton Boulevard.

This site was selected as being particularly convenient for our coastal members as well as providing a novel and unique operating location with a body of water for ground plane enhancement. See you there!

115. NAQCCFLC 01/17/2014 Event

Yahoo group: naqccfl
Date: 2014-01-16 05:12:36 UTC
From: <wb4mnk@...>
Topic: 115 Message: 115

The weather during our planned Bushman Park event is forecasted to be 36 to 42 degrees at the beginning of our event and not get above 58 degrees at the end of the event. We have decided to shift our January event to 01/24/2014 which is the following Friday. Hope this will work for all members.

Updated notice will be sent out to all members at the beginning of that week.

The NAQCCFLC Field Event for 1/24/2014 at Bushman Park has been canceled do to a weather forecast of a wind chill of 31 deg. to 40 deg. with winds out of the north at 16 to 20 mph.

So on Friday February 21, 2014 the NAQCCFLC field event will be at Bushman Park in Port Orange, FL.

Stay tuned for the final information on the February Bushman Park field event which will be out in a few weeks.

Art.. I do remember our 'last day' in Florida..it was 46deg in the AM..and it did feel 'actually very chilly' w/ the Humidity you guys have..'even to a Canuck'..so I guess 31 - 40deg would be 'pretty chilly' on the CW fingers ! Never tried it with 'gloves and a tuque' before ! (tuque.. pron. 'Toook') is a 'Wool Cap that keeps our brains from freezing'..for those that don't know ! 73

Good Evening Curt,

Sure is great to hear from you. I think we have worked around 20 times.
You guy’s have had your share of the cold snowy weather for sure.
I don’t think this old guy could stand the temperatures the north east has had this year.
We will be listening for you next month Curt.

72,
Art

The NAQCCFLC Field Event for 1/24/2014 at Bushman Park has been canceled do to a weather forecast of a wind chill of 31 deg. to 40 deg. with winds out of the north at 16 to 20 mph.

So on Friday February 21, 2014 the NAQCCFLC field event will be at Bushman Park in Port Orange, FL.

Stay tuned for the final information on the February Bushman Park field event which will be out in a few weeks.

Hi Jerry,

Ok Jerry you got me. Hey temp is 51 right now and I am cold. You northern guy's do get acclimated to some very cold weather that this old guy couldn't stand. I understand northern Florida was going to get some snow. That is getting close to me so I might have to retreat to the southern tip of Florida. I just don't understand why you guy's keep sending us those cold fronts one after the other. You know the Florida guy's do like you guy's up north so please let us go back to our normal warm weather.

Take care from the Florida gang.

Okay Art ! We will try to 'keep it away as much as possible for you' !
Our Wx Men showing the carnage in the Atlanta area even up here ! Our
local Wx been pretty good for Jan..
'so far' ! This is considered 'above seasonal' for us..
http://weather.gc.ca/forecast/city_e.html?ab-30&unit=i
Make it thru Feb..and were laffin ! Still can get snow..but not the
'extreme bitter cold' that could still hit us ! "Alberta Clipper' is one
term used down South.. Hey, we didn't send it..blame the Jet Stream ! ;o)
Stay Warm Guys ! Better Wx is soon upon us All ! 73

Anyone going to the HamCation this week end that would like to have a short get together with other NAQCC Florida Chapter members please meet up front where the ticket basket is at 1:00 pm till 1:30 pm on Friday and Saturday. I believe the ARRL booth will be in that area also. Would be nice to meet each other maybe for the first time.
One of our members Steve WB4OMM will be in the ARRL booth so he should be easy to find but might be busy doing the QSL card checking for different awards.

I will be there wearing a white cap with NAQCCFLC on it with a blue shirt with NAQCCFLC on it.

See you guy's at the HamCation.

Hiya Art!!

HA HA HA..all joking aside, I got stranded in Atlanta two weeks ago and had to spend the night at a sleazy motel (Econolodge in Forest Heights, GA). I told Chitwood I thought I was at the Regency Inn on N. Ridgewood Avenue - kept waiting for a crack whore or dope dealer to knock on the door. And me without a firearm!!!..hopefully, you'll be seeing my smiling puss Friday morning. Lake Helen it is!!!! I am SO looking forward to it! And if you're REAL NICE (as you always are...), maybe I'll let ya' sniff the new KX-3!!!

And...anyone planning on doing the Central Florida QRP Group in Sanford Saturday morning? I'm planning on breakfast at the Cracker Barrel at 7:30 am and some portable there too. I have room for 3!

72/73!

From: <kmacker@...>
Topic: 148 Message: 148

Grrrr! Wakin' up from naptime. What's best time to catch ya'll during the outing tomorrow?

I'm thinkin' of a low EFHW on 30m and my SST to try and catch ya. I have to guess on the freq as it has no digital readout, so a few CQ's will be helpful if anyone sets up for 30m. If I need to use another band, please let me know and I'll pull out the Sierra. Will be out by Lake Fredrica and walking down to set up so will be a lightweight backpack sort of morning effort for me to break out of the work rut for a bit to warm up my key for Saturday CFL QRP outing.

72,
Kelly K4UPG

Hi Guy’s,

Well I will be on 10116 and 14060 give or take a little.
Will listen for you Kelly.

Worked Art WB4MNK this morning on 10.116 (weak 339) and on 14.060 (good 569). Here running 5 watts from an IC-703 to an all-band vertical (elevated) off a 12v battery. I'm glad I have Fridays off so I can look for you guys.

At 0930 hr I worked Steve, WB4OMM in Lake Hilen on 7.044 MHz. 469 sig. He is still there at 1010 hr.

I've been CQing NAQCC on 10.116, but have not heard anyone. I think the band is not up yet for me although you have been doing well.

I am in west Florida north of Tampa.

I thought sure I'd get all of you this morning being here in Bradenton on the west coast !
Didn't work out that way.....I got Steve, WB4OMM on 7044 at 1344Z, he was only a 329 copy here.
I listened on 14061 and 10116 and 18080, but the sig were so weak here, I couldn't copy anyone's call, qsb didn't help !
I was using the KX3 at 5 watts into my 31' vertical end-fed wire antenna.
Sorry guys, I really tried thou !
Thanks Steve for our qso !!

I think I heard you a couple times here in Orlando but didn't quite catch your call well enough to reply. Ears are a bit rusty since has been a couple months since I have been on the air.

QSB on 30m after 10 sort of ruined the band for me. I used an EFHW in low flying L at about 15 ft and my trusty SST at 2w. Was portable at our housing development's lakeside park on Lake Fredrica about 3 mi north of the Orlando airport. Heard a good bit of activity and managed to work KI4TI at the Lake Helen site and a station in Kileen Texas. Sounded like quite a crowd a couple times but didn't read the mail long enough at about 10.116 to catch who everyone was trying to catch. SST doesn't have a freq counter so I'm forced to guesstimate. Sounded like a net of some sort though.

Nice day to be out and gonna do it again tomorrow with the Central FL QRP Group when we meet in Sanford.

Hi Ed,

We appreciate you trying to contact all of us but we were just to close today propagation wise to hear each other.

I was on 14061 for most of the morning so the band just wasn’t right for us to make it today.

Hey please keep try to work all of us during these monthly events because with you guy’s we wouldn’t be out there.

Great fun out there today! I kept my EFHW pretty low (less than 15 ft) and oriented broadside to your Lake Helen site in attempt to get a bit of NVIS help. Might have been even better to go lower. I heard Ron KI4TI quite well and we had a nice bit of rag chew. I felt bad for tying him up so much because I know others were looking for contacts with ya or we'd still be talking I think. :-) Then had a nice QSO into Kileen, TX off the side of the antenna. (Go figure) Sigs were decent on 30m but all I had was my SST this time out so did not play on other bands.

Sometimes I have clients to serve and cannot drive up and meet you, but when situations allow, I'll be happy to set up and play a bit. That is what Fridays are for, right?

Would be interesting to really make an effort to see if NVIS antenna deployment would make our in state QSO's work better. Anyone game for that?

Curt,

Just want you to know that we appreciate your support which means a lot to all of us.

These monthly events are a lot of fun. We also try to be at a local park on Wednesday mornings for around three hours. This is sponsored by the DBARA Ham club in Daytona Beach. So if you happen to be off on a Wednesday morning please tune us in.

Take care Curt.

It was a great time out at Sylvan Lake Park! Thanks to all NAQCCFL gang that joined us. Wx was awesome and bands were decent. Lots of room to spread out and some really interesting setups and chats took place. Glen's throwbag is /the berries/ for getting way up with the least amount of hassle. Got me on a 50 ft limb for my lil dipole.

Very fun and look forward to next outing.

Hi Folks!!

Hope all are having a GREAT weekend..It's been fun for me...Friday with NAQCC-FL, and both Don and I were at the Central Florida QRP group breakfast/op in Sanford on Saturday (Don.sorry I never got to say anything but GM to you at Cracker Barrel, I got set up and next thing I knew you were gone!).

Attached is the write up and the photo from Friday.

Art/Wally/Don, please take a look and make sure I got yer stuff correct...

Ron KI4TI, if you could provide me with your QSO and equipment info I will put it in!

I am also attaching the "Photo QSL" that prints with Microsoft Publisher. You can print on 4x6 photo or card stock. It has Art's call but can be changed.

Have a great week, can't wait 'til next month!

A wonderful time was had by all at our NAQCC-FL April Field Event.

Many thanks to the many members who listened for us and thanks to Paul N8XMS for posting our schedule yesterday.

Radio is a lot more fun with another station on the other end.

Little did we realize why things worked so well today.

It's Marconi's birthday, of course!

181. May Field Day Trip

Yahoo group: naqccfl
Date: 2014-05-02 20:36:37 UTC
From: <wa2jsg@...>
Topic: 181 Message: 181

Don K3RLL mentioned in an email that your next outting will be Friday, May 23rd. I will be in Tennessee that week, so I will try a contact from my car from on top a big hill, just using either a 20m or 40m BIG Stick on the roof lol. Also, the regular NAQCC sprint is the Wednesday evening before, I believe, so will try that as well.
Hope to see many here in Dayton!

Hi Curt,

I might not be able to make this next event. I will be in MS without a radio. We are planning on flying back Thursday the 22nd or the 24 th. Up to the wife if you know what I mean. If I make it I will look for you. I am pretty sure K3RLL Don and WB4OMM Steve will be there. Probably more but not sure who yet.

Hiya Curt!

Ya’ didn’t miss much! Bands were kinda OK, I was on 30M, really deep QSB and moderate signals…..only worked two, one in IL and one in NY.

Safe travels, see you next month!

Steve WB4OMM

Missed your little portable event this morning. I'm in the mountains of Tennessee, and had just toooo much going on, esp with 3 granddaughters running around lol.. I was able to check into the regular NAQCC sprint this past Wednesday nite from a parking lot in Knoxville, but haven't been on since.

Might be on this weekend.

Good afternoon Darryl,

First off, congratulations on your good medical news. Another month off?

That's wonderful!

Sure missed you both Wednesday and today, and I'm not just being polite.

You know how you often jump right in and help us put up or take down our antennas?

Well, you weren't there today and it showed.

"Someone" (name withheld to protect the stupid) set up his station out there on the point by the Hontoon Park Sign and flag pole with a 270 degree view of the water and resultant excellent ground plane it provides. The 31' antenna mast was erected, coax connected carefully from the KX3 to the 9:1 Unun, and operations commenced on 30, 20, 17 and 15 meters. Not many stations were heard and they were all really weak. It was with great difficulty that only three contacts were made: NY, CO and TX, missing out on a couple of good DX stations and others that just didn't hear me.

TWO HOURS later, K4AHO, KG4LAL and WB4OMM walked over to chat and Jim noticed something very unusual while inspecting my antenna setup.

"How does the signal get from the Unun to this 31' antenna wire still tied to the string on the reel?" (Read: Antenna NOT connected to the Unun)

Duh!

So, we sheepishly connected the 31' radiator to the thumb screw on the Unun and immediately signals got A LOT louder! Amazing!

Sadly, it was now time for lunch and pretty much the end of the day for operating.

See what happens when you're not there to help?

Yeo,,, that A index is high and typically means poor condx for QRP work too.

It was nice and breezy out by my lake, but the 1/2 mile walk with backpack was a bit HOT.

I need LOTS of practice with my new throwbag for antenna launching. I'll provide a bit of humor to our outings when I use it.

Art,

Your right. They just don't know how it's done. We would never forget to connect the antenna or anything basic like that. Maybe forget to bring the antenna or charge the batteries, I could understand that happening.

Should we put together a class or show and tell for Wednesday's portable op?

Have a safe and happy weekend.

Hi Everyone,

It is time for our June 20, 2014 NAQCCFLC Event. Location is at Buschman Park at the corner of Spruce Creek Rd and Common Wealth Blvd in Port Orange, Florida. Time 8:30 am till around 1:00 pm local time. At this time I know of two stations that will be on the air which are Steve WB4OMM and Art WB4MNK. Operating frequencies will be posted on QRP Spots and NAQCC spotter.

There is plenty of room so please come and join us for a few hours of fun.

72,
Art
WB4MNK

Hi Art;
I hope you guys have a great time at the NAQCC Event in Port Orange. Unfortunately I will be traveling out of the State and unable to participate. Don helped me out Monday with your advice on tracking my high level of RF noise. It seems to be coming from the power lines along the front of the house. There are a couple of local transformers that may be the source. I will have to contact our power company to see if there is some way to correct the problem.

Hi Wally,

Sorry you can't make the NAQCCFLC event on the 20th.

You need to call your utility company because it sure sounds like they are producing the noise and they are not aloud to cause that kind of interference. They have all the equipment to find and fix the problem. It could be a transformer, insulator or just a loose connection arcing. The connectors they use these days are cheap and actually loosen up from the movement of the lines. Don said he saw some burn marks on a tree which is not good either so I would show them that problem also because the tree swaying against the lines could cause a loose connection to go nuts. Let me know what they find because I would be interested to know.

From: Stephen W. Szabo
Topic: 206 Message: 206

I was out with the XYL this afternoon.and lo and behold, came across a new park to play in!

Airport Road Park

(on Airport Road next between the fire station and middle school).

The covered pavilion is almost identical to the one in Spruce Creek Park on US1..two tables, restrooms, water fountain, coke machine and electric...and ample room around it for antennas. Plenty of adjacent (pretty close) parking.

Here's some info on it...

PO City link

https://www.port-orange.org/parks/?p=parks_detail
<https://www.port-orange.org/parks/?p=parks_detail&id=aprp&w=all>
&id=aprp&w=all

SporstVolusia Link (much better!)

http://www.sportsvolusia.com/facilities/port-orange/airport.stml

I'm looking for some more local (within a 10 mile radius) from Dunlawton and Nova Road..

209. NAQCCFLC JULY 2014 Park Event

Yahoo group: naqccfl
Date: 2014-07-13 16:07:00 UTC
From: wb4mnk@...
Topic: 209 Message: 209

It is time for our July 25, 2014 NAQCC Florida Chapter Event. This month’s not so secret location is at Airport Road Park in Port Orange, Florida (on Airport Road…of course!). We should be up and running by 9:00 EDT, and will be operating until around 12:00 pm local time. At this time we know of at least two stations that will be on the air – those two “usual suspects” Steve WB4OMM #5913 and Art WB4MNK #5274. Operating frequencies will be posted on QRP Spots and NAQCC Spotter when we commence….20M, 30M, and 40M at least!

Hope to see you on the air!

I can't wait to see what neat antenna Steve brings this time.

Art, WB4MNK #5274

Hi Ron,

Thanks for your suggestion. I try to be with in 3 or 4 kc of these frequencies: 7040, 10115 and 14060. It all depends on QRM activity. Some of the other guy's use rigs with all bands and maybe on another band or a different frequency than I use on the same band. We will post frequencies where we plan to be on QRP spots.
I will be listening for you Ron and thanks for your suggestion.

So sorry folks....the best laid plans...

The garage guy said it was OK to setup on the top floor (open) of the parking garage, attached to the Hilton I am staying at. I arrived at 7:50 pm, set up antenna, tuned it, unpacked and had rig and computer ready....signals were booming in..and at 8:26pm, the same guy shows up in a golf cart and tells me, "the City complained, you can't use the antenna"???????? Yeah, bull_ _ _ _! My guess is, in the 30 mins I was setting up, no less than 3 other people showed up (one was a security guard, couldn't tell who the others were) and one of them was probably the garage guys boss, and that was the end of that. 3 mins before the start. Amazing.

So, I take it all down and put it in the rear of my Rogue, and then drive off in the hopes of finding somewhere to operate from. And I'm in the middle of Downtown Hartford. I drive for over 40 mins without success, and now it's dark out and almost 9:30. So I head back to the hotel, park and spend another 20 mins packing everything correctly.

So if, "you didn't hear me", that's why!!!!! :(

I was very disappointed. Probably won't get another chance as I have the next 3 days full, and leaving here Sunday at 8am to head to Montrose, NY for the day, then onto Albany. I am hoping I can get a shot at operating W1AW Friday sometime, watch your e-mails!!!

Hope those that would get on did well!

72/73,

Steve the Sad

Steve,

My first Sprint. Have made plans in the past, but did not make it. I pulled out my FT817 (non-D) at 5W on 12V/35AHr battery connected to my 80m Windom up 30 ft. I've had the FT817 for about 10 years, but use very little. To test all I checked into couple FL traffic nets (FMSN & QFN) with the FT817 Tuesday night.

I looked for you with you being director for NFL, but did not hear. I worked only one FL station, WB4DKF, no NAQCC nr.

Most was on 40m. 20m seemed to be dying.

I made 16 contacts (13 on 40m, 3 on 20m) and tried another 10 with no response. W1AW/4 was in there, but I could not get a response. Longest from FL was to OR, K7VW, 449 nr 1702. The QSOs were from all over eastern US. Had one Canada, VE2TH 579 QC 214.

Seems most activity was on 40m right around 7.030-7.035 and on 20m 14.060-14.065. I was so busy on 40m I did not try 80m. Next time.

I worked the entire 2 hours which surprised me...I am not much of a contester, but I guess using the FT817 kinda excited things.

I probably got some of my info incorrect since QRM and QRN (S7) was high and of course QRP sigs were weak. I learned I need a CW filter for my FT817. I love the filters in the IC7410, really cuts down the noise. So I am looking for 300 Hz filter for the rig.

Steve the sad,

Sorry your operation did not work out. One would think one could do since only 2 hours. Sounds like a bunch of wimps, maybe thinking you a terrorist or something goofy. What hotel, maybe we get a group calling to complain and on our next week travel we will make sure we do not stay at that hotel, hi...we could make up things like we found blood or a dead dog in a hall way...just kidding.

Well next time. Look for you on the 25th.

Art,

Unfortunately I will be at work on Friday. I will be operating from Honeymoon Island State Park on July 27 for the Flight of the Bumble Bees.

72,

Joel WM4P

Hi Curt,

I heard you really good but all of a sudden there was a very strong beeping signal that came on so strong it actually hurt my ears. It finally stopped and I called you back a few times but no answer. Then Steve arrived and only had a 20 meter antenna so I went to 30 meters. Sorry it didn't work out this morning but it was not on you end because you had a great signal. I never heard Karen.

262. NAQCC-FLC August Event

Yahoo group: naqccfl
Date: 2014-08-08 00:45:34 UTC
From: wb4mnk@...
Topic: 262 Message: 262

It is time for our August 15, 2014 NAQCC Florida Chapter Event. This month’s almost secret location is at Riverside Pavilion Park in Port Orange, Florida (on the Halifax River). We should be up and running by 9:00 EDT, and will be operating until around 12:00 pm local time. At this time we know of at least two stations that will be on the air – those two “usual suspects” Steve WB4OMM #5913 and Art WB4MNK #5274. Operating frequencies will be posted on QRP Spots and NAQCC Spotter when we commence….20M, 30M, and 40M at least!
Hope to see you on the air!

270. Laptops for Sale

Yahoo group: naqccfl
Date: 2014-08-24 22:24:01 UTC
From: Stephen W. Szabo
Topic: 270 Message: 270

Hi All,

I have two Toshiba Satellite L25-S119 Laptop computers up for sale..you have seen (some of you have used!) this laptop at Field Day, and portable ops.

Both are in excellent condition - I have wiped the hard drives, and restored the units to "new purchase" status. I have also updated the operating system to the last available update version (Windows XP Service Pack 3).

The batteries and AC power supplies are about a year old, both in excellent shape and the batteries hold full charges.

In a nutshell, these two laptops sit in my office closet and do nothing, except one has been used a few times a year for Field Day and the Florida QSO party. I'd rather see them used!!

Here is a link to the specs on the units:
http://support.toshiba.com/support/modelHome?freeText=1124512

Summary:

* Intel CeleronR M Processor 370, 1.50GHz, 1MB L2, 400MHz FSB, 1BG Memory installed

* 60GB (5400 RPM) Enhanced IDE (ATA-6) hard disk drive; 9.5mm height; user removable;

* CD-RW/DVD-ROM drive maximum speed and compatibility: o CD-ROM (24x:read), CD-R (24x:write), CD-RW (24x:write), DVD-ROM (8x:read);

* Integrated V.92 software modem

* 10/100 Base-TX Ethernet

* AtherosR 802.11b/g wireless-LAN

* 15.0" diagonal TruBriteT TFT active-matrix LCD display at 1024x768 native resolution (XGA)

* ATI RADEONR X200M 32MB-128MB dynamically allocated shared graphics memory.

* 16-bit stereo software sound o Supports 3D Sound, Direct 3D Sound, DirectSound, Direct Music, MIDI (playback) . Sound Volume Control by keyboard . Built-in stereo speakers

I purchased both of these new in November of 2006 and have maintained them well. They are 100% guaranteed working, like new condition. Great for ham stuff, or a "backup", or travel use.

I am looking for $125 cash for each of them (firm). I am offering them locally to you folks at a reduced price before I put them up on reflectors for $150.00 each.

First come, first served.

I'll be advertising some other stuff (ham stuff, computer stuff, electronic stuff) as I go thru my office, dog house and garage! I have stuff!!! (too much!!)

Good price but just don't another computer. It is very nice of you to offer them to the local guys first.

272. NAQCC-FLC Sept Event

Yahoo group: naqccfl
Date: 2014-09-18 13:09:14 UTC
From: wb4mnk@...
Topic: 272 Message: 272

It is time for our September 19, 2014 NAQCC Florida Chapter Event. This month’s almost secret location is at Reed Canal Park in South Daytona, Florida. We should be up and running by 9:00 EDT, and will be operating until around 12:00 pm local time. At this time we know of at least one station that will be on the air – Art WB4MNK #5274. Steve WB4OMM #5913 will be on the air at the same time……but from Jacksonville Beach, Florida some 90 miles North (he is at a conference with his XYL). Operating frequencies will be posted on QRP Spots and NAQCC Spotter when we commence….20M (14060), 30M (10110), and 40M (7040) at least!

72,
Art, WB4MNK

Since Art and I have that 90 mile buffer, I will most likely start at 14055 on 20M….and he can be on the same band with me at the same time! That’s a nice change!! I’ll be looking for everyone! I will also post my operating frequency when I am setup on QRP Spots.

By the way, if you haven’t yet, take a look at my web page……particularly the “Portable Ops”, “Old like me”, and “I Built this” pages!!

www.wb4omm.com <http://www.wb4omm.com>

Enjoy and 72/73 to all!

Steve WB4OMM

I just uploaded more pics into the portable ops, including our group shot from FQP at the Astor Restaurant. I also just added a “Field Day Page”, have a few photos…will upload more later. Did you play the video at the bottom of the “I built this” page??

It is all Wordpress……that’s the web host. I have 15 GB of storage, currently at 2 GB. With domain registration, it’s $99 a year.

277. NAQCC-FL Monthly Outing

Yahoo group: naqccfl
Date: 2014-10-13 00:48:58 UTC
From: Stephen W. Szabo
Topic: 277 Message: 277

Hi Paul,

Can you please send this out in the usual fashion? THANKS!!

-- SOUTHERN PARKPEDITION ANNOUNCED --

WHAT: The Florida Chapter of NAQCC will be holding its monthly Field Event.

WHEN: Friday, October 17, 2013 9:00 AM - 12:00 noon (or whenever hunger wins out over propagation, or we just can't stand looking at each other anymore!)

WHERE: Spruce Creek Park, Port Orange FL

FREQUENCIES: Please listen for us near 7.041, 10.116, 14.061 and 18.080 - WB4OMM or AB8GU will post to <http://www.qrpspots.com> www.qrpspots.com via the Internet when we QRV and occasionally during the operation to let everyone know who is on and where. He will also post when we QRT. QSLs via the operator call.

WHO: Art WB4MNK & Steve WB4OMM & Darryl AB8GU plus whoever else can make it.

72/72,

Stephen W. Szabo

284. QRP Wattmeter

Yahoo group: naqccfl
Date: 2014-11-15 14:55:39 UTC
From: n4zq@...
Topic: 284 Message: 284

I'm looking for suggestions as to a good. accurate QRP wattmeter. Something that will show a scale that can be read below 1 watt. Like 250mW or there about.

And I don't want to break the bank to get one. I know Bird meters are great, If you get the correct slug. Heck, we use to calibrate them back in my days at the Kennedy Space Center Calibration Lab during the moon landing program. But they are a little rich for my retired wallet.

So, what are you guys using to accurately set your power levels at a reasonable price ?

Keith N4ZQ

Here’s a few to look at: I have the 4SQRP meter, it works FB!

Happy hunting!

Steve WB4OMM

4SQRP – ARP-o-Meter – this is retired, you might be able to get one built (used). You can solicit the folks there and see. http://www.4sqrp.com/QRPometer.php

Oak Hills WM2 QRP Wattmeter – another kit, still available (also a bit pricey) - http://www.ohr.com/wattmeter.htm

MFJ-9214 QRP Wattmeter - I have no idea how accurate – but it’s pretty cheap (maybe calibrate it on the low end?) http://www.gigaparts.com/Product-Lines/SWR-Watt-Meters/QRP-Wattmeter-Dummy-Load-1-8-150Mhz.html

MFJ-813 QRP Wattmeter – again, no idea on accuracy, but not a bad price - http://www.mfjenterprises.com/Product.php?productid=MFJ-813

Subject: [naqccfl] QRP Wattmeter

I'm looking for suggestions as to a good. accurate QRP wattmeter. Something that will show a scale that can be read below 1 watt. Like 250mW or there about.

And I don't want to break the bank to get one. I know Bird meters are great, If you get the correct slug. Heck, we use to calibrate them back in my days at the Kennedy Space Center Calibration Lab during the moon landing program. But they are a little rich for my retired wallet.

So, what are you guys using to accurately set your power levels at a reasonable price ?

NoGa QRP club has the NoGaWatt kit. It is pretty good and price is great.

http://www.nogaqrp.org/ and scroll down to the picture. Click on it and you can see the specs.

W8DIZ's KitsandParts.com seems down. Not sure what's up, but he had a kit PC Board (no meters but Ebay has some)

Might check it later and see if it is temp or if he is shutting down his Toroid biz

Keith,

I have been away but I see you've gotten some response to your query.

Have you also considered the, at least at one time, fairly popular Oak Hills Research WM-2 QRP Wattmeter?

http://www.ohr.com/wattmeter.htm

I've been very pleased with mine and it has QRPp, and QRPpp ranges on a large meter.

Hi Curt,

Thanks for trying today we all appreciate you guy's being there.
I was able to work Karen but she was as far north as I was able to work.
So it looked like 20 was the band to be on today.

I think December will be a vacation month for NAQCC-FLC. In January we are
planning on being at Lake Ashby, FL.

So Curt wish you and your Family a Merry Christmas and Happy New Year.

It's hard to beleive 2015 is only a few weeksaway.

Good Morning, and Happy New Year!

Attached is the January 2015 Newsletter for your reading enjoyment. PLEASE DISTRIBUTE THIS TO YOUR GROUPS, CLUBS, ASSOCIATIONS, AND SOCIETIES AS WIDELY AS POSSIBLE.

It is also available on the NFL Section Web Page at http://arrl-nfl.org/
- please pass that link around too!

Thank you for all of your work and efforts in the past year; I am happy to see our local groups working together and sharing resources.

Congratulations to Lou Mecseri KE1F in Palm Coast for winning the Newsletter Naming Contest.

Congratulations to West Central Florida Section Manager Darrell Davis, KT4WX who starts his term of office today.

Also join me in congratulating Phil Royce KE4PWE from the Gainesville Amateur Radio Society (GARS) who has been recently appointed to the communications section at State Emergency Management.

Have a great holiday, and best wishes for a safe and prosperous New Year!

73!

Steve Szabo WB4OMM

Interesting story on the code:

When i grew up in Detroit in the '50s my neighbor was a WWII vet. He told me he was in the US Army signal corp stationed in North Africa. They we taught morse code and copied messages to a "mill" (typewriter).

. One enterprizing soldier taught a local native to push little finger left hand when he heard "dit dah" soon this guy had 3-4-5 locals copying CW and they were 100% copy and he told me they got up to 40wpm. Now here is the punch line...

These locals could not read or write anything or knew English!!! The GIs paid them in C rations, chocolate bars, coffee and cigarettes. One day the translator told him the locals thought the GIs were goofy for paying them so much to push a button. Little did they know they were copying military traffic for north africa out of Allied command in England.
The brass knew what was going on and salted messages to see if there were leaks and there were not. Kind of a twist on our Navaho code talkers.

Only the guys copying the messages had no idea it was even a message.. they liked ringing the bell at the end of a line.

I should have stated the "I" in the article is not me, but got this good story from another board, sorry if I misled anyone.

Does show what really learning the code is...5wpm is not learning the code, but as for most of us was the start.

Ron.. Great Story ! I enjoy those ! My folks got me a set of 'Walkie-Talkies' at an early age, and I fell in 'Love' with Radio ! Never knew why ? Late at night or in Dad's car, tuning around the AM dial trying to find distant stations..then started SWL of the BCB Band..then saved up to get a 'Realistic DX-160' and became a SWL ! The CB craze in the 70's.. then started listening to Ham Op's ! Hey..these guys can 'talk back to each other' !
Dad told me 'you need to learn Morse Code and Electronics to do that stuff' ! So, I started to pursue it..as a young teen, I couldn't grasp that stuff..then towards my 20's..was still aspiring to 'just do it' ! I took a Local Club Sponsored Course..and it turned out to be the 'First Exam that would include 10WPM TX and RX ! Oh, I can't learn this ! Instructor gave everyone a copy of a 'Farnsworth Method Learning Tape'.. then 'It started to Click' ! I was 'So Proud' when I passed my 1st exam..used CW on an old SB-102 and a cheap RS (Fake)Brass Key for a Year ! Then Advanced Exam was 15WPM.. 'Piece O' Cake' for that one ! It wasn't until about 5yrs ago, a cousin was doing a 'genealogy book' on the family..that I discovered 'Grampa was a Morse Code Op' in Germany during WWI and WWII ! Apparently, his 'Duty' was to teach farmers, etc. CW..set them up with a radio, and to listen for the Enemy (us!) and report. They immigrated to Canada in '54..and Grampa passed away in '72 when I was Nine. He did not speak much English, and I never learned German. I was born in 62' and Dad never liked talking about his childhood and their struggles during those years. One day I asked him..so did Grampa 'like what he was doing' ? He said 'NO..he was a Farmer..he did not Want to Do It, but he Had To' ! I look at what 'Everyone went through back then', and I am sure 'No One wanted to be there'..but I think 'Grampa would be proud of his Grandson ! 'Another CW Op' still in the Family !
Thanks for sharing.

Jerry,

Good story from you as well. I think many from that first half of 1900s has lots of stories. WWI, depression, WWII, the atom bomb, all the aviation advancements, the automobile, etc etc. Some born in 1900 and lived to their 90s had seen a lot, lots not so good and lots very good.

I got started in radio similar as you...listing to an AM 540-1600 kHz radio. My grand mother gave me a tube Zenth radio. Just tuning around and finding stations. Did not listen much to what the stations played, but was something how far one could hear at night. Still that way, but now so much noise from power lines and all the electronics.

I too had an brass colored straight key as a Novice in 1966. Bought new for $2.95. They still sell it. Was pretty good, had ball barrings in it. I learned the code to 20 wpm. We as Novice had to learn only 5wpm to get license and the norm was to get on CW and build up your speed to 13 wpm to get General for which at that time had full Ham freq privileges in US. I had fun with that key.

In my family not much talk about technology. Radio was just something you listened to. But I got the interest and got my license. Worked whole summer to get enough money for station, DX100 and SX96 rcvr and 40m dipole. Had a ball.

Yes in WWII CW was used a lot. Even in the air craft the pilot used it to communicate. Even in the field so many used it. When I was in the Army in late 60s as commo sgt our trained radio ops had to get 18 wpm. Where I was we never used the code, but guys who were drafted and sent to radio op school had to learn the code. Now about only ones using it are us Hams. I still enjoy it. Gives me pride cannot get with a mic or computer. Just something about pounding that paddle. I was out of CW for about 20 years and about 2 years ago got back into it. I dug out my J38 and started to get on and I was so rusty I had to go with a electronic keyer. The key takes skill and now I am just too old to learn it all over again, but still like CW using a keyer.

I was 'So Proud' when I passed my 1st exam..used CW on an old SB-102 and a cheap RS (Fake)Brass Key for a Year ! Then Advanced Exam was 15WPM.. 'Piece O' Cake' for that one ! It wasn't until about 5yrs ago, a cousin was doing a 'genealogy book' on the family..that I discovered 'Grampa was a Morse Code Op' in Germany during WWI and WWII ! Apparently, his 'Duty' was to teach farmers, etc. CW..set them up with a radio, and to listen for the Enemy (us!) and report. They immigrated to Canada in '54..and Grampa passed away in '72 when I was Nine. He did not speak much English, and I never learned German. I was born in 62' and Dad never liked talking about his childhood and their struggles during those years. One day I asked him..so did Grampa 'like what he was doing' ? He said 'NO..he was a Farmer..he did not Want to Do It, but he Had To' ! I look at what 'Everyone went through back then', and I am sure 'No One wanted to be there'..but I think 'Grampa would be proud of his Grandson ! 'Another CW Op' still in the Family !

Thanks for sharing.

Interesting story on the code:

When i grew up in Detroit in the '50s my neighbor was a WWII vet. He told me he was in the US Army signal corp stationed in North Africa. They we taught morse code and copied messages to a "mill" (typewriter).

. One enterprizing soldier taught a local native to push little finger left hand when he heard "dit dah" soon this guy had 3-4-5 locals copying CW and they were 100% copy and he told me they got up to 40wpm. Now here is the punch line...

These locals could not read or write anything or knew English!!! The GIs paid them in C rations, chocolate bars, coffee and cigarettes. One day the translator told him

the locals thought the GIs were goofy for paying them so much to push a button. Little did they know they were copying military traffic for north africa out of Allied command in England.

The brass knew what was going on and salted messages to see if there were leaks and there were not. Kind of a twist on our Navaho code talkers.

Only the guys copying the messages had no idea it was even a message.. they liked ringing the bell at the end of a line.

Sounds a lot like my story Ron ! I managed to 'splurge' on a Nye Viking 'Master Key'..'Man I Loved that Key' ! (still have it..and a 2nd one as well !) Used to rattle off 15+ easily ! I got out of Ham Radio for about 15yrs after a Divorce..(don't think radio had anything to do with it ?) ;o)
Met a gal 12+yrs ago..bought a Home..she had 'Two Teenagers' (Wow, that was a shocker to get accustomed too !) Then one day while 'moving boxes around in the basement, she was going thru 'All my HF, VHF stuff'. What is 'All This' she asked.. so after I explained it to her, she say's 'Why don't you set it all back up'.. (Wow, She's a Keeper, eh' !) So..I did..and I think she is 'kicking herself now for ever suggesting that' ! But..as she say's.. 'At least I Always know where you are' ! ;o)
Have a lot of local 'No Code Op's (2M FM, IRLP, Echolink, etc. guys) who keep telling me CW is a 'Dinosaur Mode' ! When I tell them 'I have worked EA7, JA, XE, etc. on 6M CW'.. what have 'You Done' ? ;o) CW - 'Grand Father of All the Now Digital Modes'..and 'Still the King' ! I tell people I am a Bi-lingual Canadian.. English and Morse Code ! ;o) 73

Jerry,

Yes so many think of CW as old mode. Really they are saying they are too lazy to learn it, hi. But like DX, Slow Scan, ATV, nets, etc CW is another mode and facet of Ham Radio so pick and choose what is your interest.

Just with me it gives me pride I can do it. I am nothing like some of the long time vets running 35+ wpm, but I have fun at my 25 max speed. Just makes me feel I am more part of the station and operation. Does not take much to do EchoLink or IRLP although I like these as well. Just your station and the guy at the other end tend to give one more of a good feeling about a contact. I like it all except for the contesters who do not seem to care they trash the bands at times, hi. But contest can be fun also especially Field Day.

308. FW: NOVICE RIG ROUNDUP

Yahoo group: naqccfl
Date: 2015-01-08 18:00:26 UTC
From: Stephen W. Szabo
Topic: 308 Message: 308
Attachments: 2 described; binary payloads are missing from this source WARC

Below is a forwarded e-mail and web page link for the “Novice Rig Roundup” in February. Thought some of you might be interested. A fun time for old people like me!

I registered for the event; will be using my recently restored (last night!) HW-16. Photo attached! Put it on the air last night and made a QSO in seconds using a crystal for 7036..…45W out using the HD-10 Electronic Keyer. Worked a fella in WA state, he gave me a 469!

We had a nice QSO, and he said the rig sounded great! What a blast! Almost felt like I was 16 again……..

This Novice Rig Roundup sounds like a fun time. I will post to the spotting network when I’m on. (all CW , of course!).

Mark yer calendars! Look for the birds!! (chirpy signals!)

73 to All,

Steve WB4OMM

Novice Rig Roundup

Hi folks - Please consider participating in NOVICE RIG ROUNDUP next month, February 6 - 13th. Hundreds of stations will take to the airwaves for a week of NOVICE ERA fun using home brew and commercial rigs of up to 45 watts output (mostly tube rigs) and of course lots of straight keys and bugs. There is a Facebook Group and also a web page you can read all the details there! Hope you will give it a try!

http://NoviceRigRoundup.com

Everyone is welcome to participate.

309. Reply from our P-Op 01-07-15

Yahoo group: naqccfl
Date: 2015-01-08 18:52:17 UTC
From: Don
Topic: 309 Message: 309

With a lot of help from WB4MNK and WB4OMM, I was able to send some photos from our Wednesday P-Op to the gentleman with whom I chatted on 20 meters using Art's KX1. Following up some of our QRP portable contacts with photos often results in some very interesting email replies.

I thought the group might enjoy what "John" in NH had to say about the photos of our group huddling in the sun at Reed Canal Park yesterday.

Hi Don:

What a great set of comments - thank you so much!

I admire the spirit of your Wednesday get-togethers. That is ham radio "operating"

at its best.

I am a retired sales guy involved with digital storage oscilloscope technology for

the last 30 years in the greater Boston area. No writing - just a lot of gas bagging. :-)

Have a great 2015 and hope to catch you again on the air. Stay warm es 73

Best,

John

From: Stephen W. Szabo
Topic: 313 Message: 313

The Florida Chapter of NAQCC will hold their January Field Event on Friday, January 16, 2014 from 14:00z (9 AM EST) to 17:00z (Noon EST). This month's adventure will take us to Lake Ashby Park, a few miles South of New Smyrna Beach on SR415.

Please listen for WB4MNK, WB4OMM, AA4W, KG4LAL, AB8GU, and K3RLL on 7.060, 10.116, 14.060-14.062, 18.080, 21.060 and maybe 28.060. We will make sure we are "spotted" on the various reflectors.

Anyone even remotely close to the Daytona Beach area, please feel free to come by and share our stations or bring your own.

Look for us on the bands!

Steve WB4OMM, NAQCC-FL

Good Deal Jerry,

We appreciate your interest and maybe this time one of us will make contact with you. At this time we know of three stations that will be on around the QRP frequencies. Don K3RLL, Steve WB4OMM and myself Art WB4MNK. We will try and spot on QRP Spots where we can be found.

72,
Art WB4MNK

322. RE: [naqccfl] NAQCC-FL Chapter January in the Field Operation

Yahoo group: naqccfl
Date: 2015-01-16 01:09:34 UTC
From: Stephen W. Szabo
Topic: 313 Message: 322

After serious discussion and consideration, we will be cancelling tomorrow's NAQCC-FL Chapter outing due to inclement weather conditions - it's been raining here on the Florida East Coast all day, and a 20% chance thru mid-day tomorrow - everything at the site is sopping wet, and with the predicted 15-20 MPH winds all day and a high temp of 59 (it would be in the mid 40's at setup time!), doesn't sound like it would be conducive to our plans!

If we reschedule, we will let everyone know.

Have a GREAT weekend!

72/73,

Steve WB4OMM #5913

NAQCC-FL

Subject: [naqccfl] NAQCC-FL Chapter January in the Field Operation

The Florida Chapter of NAQCC will hold their January Field Event on Friday, January 16, 2014 from 14:00z (9 AM EST) to 17:00z (Noon EST). This month's adventure will take us to Lake Ashby Park, a few miles South of New Smyrna Beach on SR415.

Please listen for WB4MNK, WB4OMM, AA4W, KG4LAL, AB8GU, and K3RLL on 7.060, 10.116, 14.060-14.062, 18.080, 21.060 and maybe 28.060. We will make sure we are "spotted" on the various reflectors.

Anyone even remotely close to the Daytona Beach area, please feel free to come by and share our stations or bring your own.

Look for us on the bands!

Steve WB4OMM, NAQCC-FL

From: Stephen W. Szabo
Topic: 325 Message: 325

Hi Bob!
Glad to see the organization expanding! Welcome to the “Parkpedtions”…….here’s some info we have found helps us succeed.

Our group varies in composition just about every event. We schedule the second Friday of every month but skip December (Holiday break!). A week out our operation notice goes out to our local group (Yahoo!Group…you might consider setting one up for your group – makes it easy to coordinate and store files, photos, etc). I also copy Paull Huff at NAQCC so he can send out a notice to the entire organization.

Just so you know, I didn’t start this group….I joined about 4 years ago. I think Art actually started us up, in cahoots with Don. As the young “whippersnapper” (I’m only 60!) I would up doing the reports/notices, only ‘cause I like to! (fun for me).

In the field, our “normal” operation is usually 4-6 of us and looks like this:

* me with a KX-3 running 5W and verticals (Band specific 20/30/40M hamsticks, 2m-40M SuperAntenna) ground mounted with 4 radials.
* Art WB4MNK has a KX-1 running 3W to an endfed wire/vertical at 30’ or a doublet with a single radial.
* Don K3RLL runs a KX-3 with 5W also to an endfed wire/vertical with a single radial.
* Wally KG4LAL does SSB with a 5W Yaesu FT-817 to a wire dipole strung in trees around 30’ up
* Sometimes we have additional stations and most run 3-5W with some kind of wire antenna or small vertical.
* When we operate, we all “pick a band” - 40, 30, 20, 15M - and work NAQCC/SKCC/QRP windows from .040 to .060. If 10M is open one of us might try that too. We generally are at least 50-100 apart from each other. We generally do not experience any serious interference. We have had several of us in a single pavilion/area in a 50’ diameter, and again, as long as we stay in separate bands, we don’t have much of a problem. The success here is low power, and at least me using a single band resonant antenna. Plus the fact three of us are using Elecraft equipment (really good selectivity). If a band is “dead”, we swap around so we can all make some Qs.
* If we do experience interference, we “yell out” to each other and usually a small change in frequency solves the issue. I guess the real way to find out is just go out and see what happens!

Some other stuff we do:
* Figure out what amenities are at the operating site – BEFORE you go. Parking access/adjacency to operating areas, picnic tables, covered pavilions, restrooms, water fountains, AC power, WiFi access. Also look for how many, how close they are, and if you have “structures” (trees, etc) to string antennas. Also find out the normal “occupancy” of the park for the time you select. The is at least one site we use that has “summer school” type operation with about 80-100 7-12 year olds. The DO go outside! Anything with “Monkey Bars” is a clue!!! We go Friday mornings and have found that for the most part, the parks are empty, or very lightly populated. Just remember if you want to use a pavilion, or

picnic tables, they may be reserved, or first come first served. I also carry a small folding table and a few small folding chairs in my car just in case. So does Art. We pick parks (Federal, State, County, Local) for most of these reasons. Go online and usually you can see a site “map” with what’s there. Also make sure you check for fees (we go to free places) and note any restrictions that might interfere with your planned operation. (Some prohibit gas generators, camp stoves, etc). WE generally talk out where out next Op will be, and we mutually agree on the site.
* While in the field, Darryl AB8GU spots us on his WiFi enabled iPad to www.qrpsports.com <http://www.qrpsports.com> and I spot us on my laptop to www.dxwatch.com <http://www.dxwatch.com> – I use my iPhone 5 “WiFi hotspot” if necessary for both of us if there is not an open WiFi site…but you’d be surprised how many there are out there! Darryl doesn’t operate usually, but is our “gopher” (go for); he helps with setup, take down, spotting, troubleshooting. Nice to have someone NOT solely focused on the radio with a headset on! Good for safety and security too. We have thousands of dollars’ worth of stuff out there – hate to see it “walk away”.
* We do “show and tell”. Often one of us will bring a new “toy” to show off or let the other look at or try out. Makes it interesting for all.
* I bring some “spare equipment” (12VDC supplies, antennas, tuners, keys) and the others do too. If something breaks, quits, whatever, we always have a backup, even if it is LOANDED to someone else in the group.
* We try to arrive and start operating around 0900 local time, and we usually quit between 11am and 12 noon (earlier if the bands are dead, or WX is bad). We preplan lunch – if a local dive is available, we pack up and head to eat lunch together. If no restaurant within 5 miles or so, we “brown bag it” (sandwiches and stuff), and eat on site. We also bring “spares” or extras in case (see previous “loaning” statement!).
* We make sure to take photos and at least one group photo to include in our “monthly report” (Newsletter article that is sent to Paul Huff). I write the article usually, but all of us try to make it interesting and light. It’s supposed to be fun, so why not reflect that in the report!
* Others envy our success, and it’s all because of this simple premise: We are there for FUN. We operate, we treat each other (and the site!) with respect. We help each other out. We have no drama (and wouldn’t tolerate any). Notice the “we”. That’s our success. We invite folks to come with us based on the same priorities and it works for us.
*
I can’t think of anything else right now. Hope this helps…….My best wishes for your group’s success!! We’ll look for you at your op!!!
72/73,
Steve WB4OMM #5913

From: Robert Lundstrom [mailto:rcltitanum@...]
Sent: Friday, January 16, 2015 2:09 PM
To: sszabo1@...
Subject: Florida NAQCC field operation

Steve,

My name is Bob Lundstrom and my call is W9PZ. I'm the chairperson/spokesperson for the newly formed NAQCC Illowa chapter in the northwestern Illinois/northeastern Iowa area. I read the posting about your chapter's January Field Event at Lake Ashby Park and it generated some questions about how we might setup our chapter's field events. It is 10 degrees outside with 6 or so inches of snow on the ground so even though we won't be going

to the field for a couple of months it is a good time to start planning.

You listed six operators that will be particating in your event. Are they all planning to operate at the same time? What type of antennas will people be using? How do you handle interstation interference? In any multi-station events that I have been involved with such as Field Day antenna separation seems to have been a key factor in allowing several stations to operate at the same time and is that the case with your situation?

Any information, suggestions or tips that you would be willing to share would be appreciated Steve.

Thanks for the help.

Bob Lundstrom - W9PZ

326. February Outing

From: Stephen W. Szabo
Topic: 326 Message: 326

Good Morning All!

Setting up our February outing to Lake Ashby Park, 4150 Boy Scout Camp Road, New Smyrna Beach on Friday, February 27th at 9AM.

This will be a "brown bag lunch event" - bring food/drink as we are some distance from a commercial eating facility.

Additionally, you may wish to consider a small table/chair to operate from. (I haven't been there before, but I believe the "seating" is pretty limited..).

Who is planning on going so I can include in the announcement??

Steve WB4OMM

331. NAQCC Florida Chapter February Outing!!

Yahoo group: naqccfl
Date: 2015-02-24 17:56:23 UTC
From: Stephen W. Szabo
Topic: 331 Message: 331

REMINDER!! (And has anyone seen this come out from the NAQCC National??? – let me know please!)

It’s time for our February 27, 2014 NAQCC Florida Chapter Event.

This month’s not so secret location is again Lake Ashby Park, 4150 Boy Scout Camp Road, off State Road 415, Southwest of New Smyrna Beach, Florida. We should be up and running by 9:00 EST, and will be operating until around 12:00 pm local time. At this time we know of at least two stations that will be on the air – those two “usual suspects” Steve WB4OMM #5913 and Art WB4MNK #5274 at the least …hoping for others too!

Operating frequencies will be posted on QRP Spots and NAQCC Spotter when we commence….20M, 30M, and 40M at least. Look in the usual “watering holes” (.040, .050, .060) depending on band conditions and use.

We are hoping Mother Nature will extend her kind hand and give us some outdoor operating weather!! Still a bit “brisk” by Florida standards early morning (40’s the last few days), but still holding out for at least tolerable (60’s and dry) conditions.

Steve will be bringing his 4SQRP “Cyclone 40” transceiver to this month’s outing for a special treat! <http://www.4sqrp.com/cyclone.php> http://www.4sqrp.com/cyclone.php

Hope to see you on the air!

72/73

Hi Ed

Sorry we missed you today. I was on 20 so you were to close but that it's a shame that Steve missed on 40. There is always another time. Thanks for for being there and CA like you say is not the easiest on QRP portable but it has happened before. I have worked CA when conditions are right a few times.

Have a great trip back to California.

72,
Art WB4MNK

Yeah, thanks folks, I tried, but the 4W just wasn’t making the trip on 40M here.

Stay tuned for our adventure story from the frozen Florida tundra in next month’s NAQCC Newsletter….lotsa pictures too!

72/72!

Gemini Springs Park in DeBary...thoughts?? No fee, several pavilions, restrooms, other amenities; ample parking, easy to find. Free admission!

Plenty or restaurants on 17/92.

REMEMBER - VOLUSIA COUNTY SCHOOLS ARE OUT NEXT WEEK FOR SPRING BREAK!!!

Other considerations would be Lake Dias (Pierson), Hontoon Island (Deland), Buschman (Port Orange), Spruce Creek (Port Orange/NSB) - I am assuming (phew!) no large groups of kids at these..others, not so sure.

What you say folks? I need an answer pretty quick...no later than tomorrow afternoon (Thursday).

Steve WB4OMM

Hi Steve,

Just count me in which ever park the others decide on. If know one suggest
a park you and I can pick one.

How bout that.

Didn't you check the Park on 92 up from the Jail ?

345. NAQCC-FL Monthly Outing Announcement

Yahoo group: naqccfl
Date: 2015-03-19 17:44:16 UTC
From: Stephen W. Szabo
Topic: 345 Message: 345

Hi Paul,

Can you please send this out in the usual fashion? THANKS!!4

-- FLORIDA PARKPEDITION ANNOUNCED --

Our next adventure is quickly approaching!

WHAT: The Florida Chapter of NAQCC will be holding its monthly Field Event.

WHEN: Friday, March 27th, 2015 9:00 AM - 12:00 noon (or whenever hunger wins out over propagation, or we just can’t stand looking at each other anymore!)

WHERE: Gemini Springs Park, DeBary, FL

FREQUENCIES: Please listen for us near 7.041, 10.116, 14.061 and 18.080 – WB4OMM or AB8GU will post to <http://www.qrpspots.com> www.qrpspots.com via the Internet when we QRV and occasionally during the operation to let everyone know who is on and where. He will also post when we QRT. QSLs via the operator call.

WHO: Don K3RLL, Art WB4MNK, Wally KG4LAL, Steve WB4OMM & Darryl AB8GU plus whoever else can make it.

WHY: TO SATURATE THE ETHER WITH VAGUE AND NEBULOUS CHIRPS, BEEPS, AND OTHER RADIOWAVE NOISE……AND TO HAVE FUN, OF COURSE!!

72/73,

Steve WB4OMM #5913

Yes, you did! My first QSO of the day!

Art and I did pretty good, conditions on 20/30M good, 40M not so good. Between us I think we made 15 Qs. Weather was FB!

We met a fella that drove over from NSB (a “reclaimed” ham from 25 years ago!) that just joined NAQCC and is headed back to NY in a few weeks. He recently purchased a KX-3 and is getting “up to speed” – 15WPM by his estimate! Sound like another QRP CW Victim!

As always Curt, thanks for being there!

72/73!

I would love to participate in your poll, and perhaps someday I would be able to once I retire and move to FL, but right now, I must admit I haven't been to FL in many many years... forget what it's like. Only things I remember are Cuban music in Miami, palm trees, gators crossing the 'old' Tamiami Trail, and everyone having fake flamingos stuck in their front yards (thought they were pretty neat).
Perhaps some day..... ;-)

359. Next Friday's Parkpedtion Draft Announcement

Yahoo group: naqccfl
Date: 2015-04-11 20:16:11 UTC
From: Stephen W. Szabo
Topic: 359 Message: 359

Good Afternoon Fellow NAQCC-FL Chapter QRP/CW Aficionados (or victims, I'm not quite sure!!)

Our Poll results in order of percentage - it appears 5 folks voted:

Hontoon Island 20%

Lake Ashby 20%

Spruce Creek Park 12%

Lake Dias 12%

Veteran's Park 8%

Sunrise Park 8%

Gemini Springs 8%

Colby-Alderman Park 4%

Riverside Pavilion 4%

Reed Canal Park 4%

OK folks..please review the below draft announcement for next week's outing (Your thoughts?? Other suggestions?? Who is planning on attending??)
PLEASE LET ME KNOW ASAP SO I CAN SEND THIS UP TO JOHN FOR AN E-MAIL BLAST!

Steve WB4OMM

DRAFT ANNOUNCEMENT

-- FLORIDA PARKPEDITION ANNOUNCED --

Our next adventure is quickly approaching!

WHAT: The Florida Chapter of NAQCC will be holding its monthly Field Event.

WHEN: Friday, April 17th, 2015 9:00 AM - 12:00 noon (or whenever hunger wins out over propagation, we just can't stand looking at each other anymore, or other people show up and make us leave!)

WHERE: Hontoon Island State Park, DeLand, FL : https://www.floridastateparks.org/park/Hontoon-Island

FREQUENCIES: Please listen for us near 7.041, 10.116, 14.061 and 18.080 - WB4OMM or AB8GU will post to <http://www.qrpspots.com/> www.qrpspots.com via the Internet when we QRV and occasionally during the operation to let everyone know who is on and where. We will also post when we QRT. QSLs via

the operator call.

WHO: Don K3RLL, Art WB4MNK, Wally KG4LAL, Steve WB4OMM & Darryl AB8GU plus whoever else can make it.

WHY: BECAUSE WE CAN...AND TO HAVE FUN, OF COURSE!!

To: naqccfl@yahoogroups.com
Subject: [naqccfl] Friday's Outing

I was able to contact Steve WB4OMM on 20m (nice signal), but Art WB4MNK was waay too weak for a QSO on 30m. Karen W4KRN reported the same. I believe your next event will be May 15th, but I will be at the Dayton Hamvention on that date. However, if it is May 22nd, I will be operating portable from the Tennessee Smokies, and will look for you then.

Hi Curt,

Sorry it didn't work out today but bands seem down from normal on 30 meters. Maybe I need to get a Ham Stick like Steve is using. He does real well with that antenna.
If we miss you in May maybe we will make in June.

Thanks for trying to day and please let Karen know we all appreciate her being there also.

72,
Art

G'Day folks!!!

Rick and Wally.need your rig/ant/key and QSO info (call, name, NAQCC# and State)....

Don..I need your rig/ant/key info when you can.

Thanks fellas..

The report is pretty much done, just need to add this info and I will send a quick draft out before I send it to NAQCC for the Newsletter.

G'Day to all!

Trying to get a jump on things coming up.

I have us scheduled for Colby-Alderman Park in Cassadega on Friday, May 22nd for this month's NAQCC-FL outing.

Everyone OK with that?

Let me know so I can prep the announcement.

HAVE A GREAT WEEKEND!

Hi Rick,

Yes, there is. So far, looks like only Art, Darryl, and me….next Friday, June 22nd.

We’re trying to figure out where to go…..we originally were thinking Cassadega (Colby Park), but it’s a 45 min drive for us over here on the coast. Are you planning on coming over? If you are, where would you like to go, if you have a preference? We did the last two on the Westside of the County as we had three on that side attending. If you’re not coming over, we will probably look for somewhere here in Port Orange so we don’t have a drive.

Let me know so we can decide on something! WE have plenty of time, I forward the announcement on Monday of next week. I am headed to Dayton tomorrow, returning Sunday night.

Steve,

We over here in west Florida in Hernando have 2 groups planned for the May 22nd NAQCC event with you.

Mine will be at Veterans Park in Spring Hill in Hernando (NFL section) and Doug, NZ2W, will be in Wickee Wachee also in Hernando, both of us on west coast.

I think I have your freqs of 7.060 and 14.060 for 40 & 20m. Let me know if different. Doug might want some of the others.

Of course we will be looking for other NAQCC members and non-members.

Looking forward to the outing, my first for this event away from my home QTH.

We are getting lots of interest in NAQCC west Florida chapter here in Tampa Bay.

I had a blast, worked my bunnies off. I forgot to tell Darryl in my last e-mail, Winn stopped by to see me (the fella that showed up at the Gemini Springs outing). He said he moves in his house in Port Orange the first week of June, so we may be seeing him some. We'll need to send him an invitation to the Yahoo!Group. He got his NAQCC number last month.

I take it you are going. Well, So far me and you, maybe Rick.

Wally, you going??? If there might be 4 or 5 of us, I'm OK to go to Cassadega as planned if everyone wants to. We'll firm up by Monday night and I'll send something out.

Steve,

Is there a QRP outing planned for May?

Hi Art,
Right now I am near Memphis visiting family, buy later this week we will all 'migrate' to Gatlinburg in East Tennessee to my rented condo in the TN Smokies.
Will be operating from Sevier County, TN. Had a great time in Dayton,,, helped out with the SKCC booth.

Ok Curt,

I use to live in Cordova, Murfreesboro and Chattanooga. Been to Gatlinburg many times and love it up there. Went to college in Murfreesboro at MTSU. Have fun in Tennessee which is a great state and some beautiful areas in the north east.

72,
Art WB4MNK

389. NAQCC-FL Monthly Outing Announcement

Yahoo group: naqccfl
Date: 2015-05-18 22:15:47 UTC
From: Stephen W. Szabo
Topic: 345 Message: 389

Hi Paul,

Can you please send this out in the usual fashion? THANKS!!

-- FLORIDA MAY PARKPEDITION ANNOUNCED --

Our next adventure is in just a few days!

WHAT: The Florida Chapter of NAQCC will be holding its monthly Field Event.

WHEN: Friday, May 22nd, 2015 9:00 AM - 12:00 noon (or whenever hunger wins out over propagation, or we just can’t stand looking at each other anymore!)

WHERE: Reed Canal Park, South Daytona, FL

FREQUENCIES: Please listen for us near 7.041, 10.116, 14.061 and 18.080 – WB4OMM or AB8GU will post to <http://www.qrpspots.com> www.qrpspots.com via the Internet when we QRV and occasionally during the operation to let everyone know who is on and where. He will also post when we QRT. QSLs via the operator call.

WHO: At least Art WB4MNK, Steve WB4OMM & Darryl AB8GU (plus whoever else can make it).

WHY: TO SATURATE THE ETHER WITH VAGUE AND NEBULOUS CHIRPS, BEEPS, AND OTHER RADIOWAVE NOISE……AND TO HAVE FUN, OF COURSE!!

HOW: By the magic of QRP Ham Radio!

72/73,

Steve WB4OMM #5913

Steve,

We over here in west Florida in Hernando have 2 groups planned for the May 22nd NAQCC event with you.

Mine will be at Veterans Park in Spring Hill in Hernando (NFL section) and Doug, NZ2W, will be in Wickee Wachee also in Hernando, both of us on west coast.

I think I have your freqs of 7.060 and 14.060 for 40 & 20m. Let me know if different. Doug might want some of the others.

Of course we will be looking for other NAQCC members and non-members.

Looking forward to the outing, my first for this event away from my home QTH.

We are getting lots of interest in NAQCC west Florida chapter here in Tampa Bay.

Hi Curt!

We were there from 9 – noon. Three CW stations (WB4MNK, WB4OMM, AA4W), one QRP phone (KG4LAL) and “mascot” AB8GU. Art and I made 5 each (including Karen, W4KRN) Rick made 4 DX stations. Bands were DEAD, DEAD, DEAD. Karen had a 599 signal but the rest were 229 – 559. Not a good propagation day! But the WX was FB!

Sorry I missed you and Karen in Dayton! I was in the ARRL DXCC card checking booth all day Friday and Saturday, went to the SKCC booth at 1pm for the photo, and it was empty! I looked outside but couldn’t find anyone. Would have loved to “eyeball” you and Karen and be in the picture. Oh well…..maybe next year!

Sorry we missed you today…..safe travels, have a GREAT holiday weekend!

72/73,

Steve WB4OMM

I setup little before 9AM over here on west coast, FT817 with 2 HamSticks as dipole up 10 ft on 40m and heard nothing. I then went to 20m and think I heard you guys getting ready so changed ant to 20m, but never heard you again.

I did work a few stations on 20m, couple 7s, couple 8s, a few in north east of US.

I stayed until 1230.

20 was active, but seems 40 died around 10.

Was fun, but I think you guys on east coast just too close.

I'll post my log of those I worked and those I heard but could not hear me. I think the HamSticks are not all that good, but is easy to put up. Really worked about as well as I expected.

Hiya Ron,

Yeah, too close and the bands were doo-doo this morning. 40M not open, 20M was weak and hit or miss...30M was non-existent!! We had hamsticks on 20/40M ground mounted, end fed wires in the air so propagation was everything.

We'll keep trying! I am sure you folks will too....We had two other groups, never hear them either (from Tampa Area).

Thanks for trying!!

Steve,

I did ok on 20m. Heard a number of CQs, I think most were not QRP. Worked a OH station using a 400 ft wire ant.

Doug over here was to be operating on the Gulf in western Hernando. I did not hear him. I did hear couple stations on 7.251 SCARS from Tampa around noon, but NCS in NC could not hear me. I did check into the Mid Day FL Tfc Net, 7.242 at 12, but NCS was in Brooksville just a few miles east of me so he could hear me well.

my 5W and 40 and 20m HamStick dipoles do not make great station, but easy to put up and do work some. I think next time I am going to find a place to put up my 40m Windom up around 30 ft. Takes lot more to do, but does work well on 40 & 20m.

I did have some runners come by (I was on the running trail of the park) and ask what I was doing. Couple ask if I was trying to contact aliens, hi. I said well trying to contact east coast and in Daytona Beach they have about everything so just might get hold of some aliens, hi.

Was a good time.

Hiya Ron,

Yeah, too close and the bands were doo-doo this morning. 40M not open, 20M was weak and hit or miss...30M was non-existent!! We had hamsticks on 20/40M ground mounted, end fed wires in the air so propagation was everything.

We'll keep trying! I am sure you folks will too....We had two other groups, never hear them either (from Tampa Area).

Thanks for trying!!

Steve WB4OMM

Subject: RE: [naqccfl] Friday Outing

I setup little before 9AM over here on west coast, FT817 with 2 HamSticks as dipole up 10 ft on 40m and heard nothing. I then went to 20m and think I heard you guys getting ready so changed ant to 20m, but never heard you again.

I did work a few stations on 20m, couple 7s, couple 8s, a few in north east of US.

I stayed until 1230.

20 was active, but seems 40 died around 10.

Was fun, but I think you guys on east coast just too close.

I'll post my log of those I worked and those I heard but could not hear me. I think the HamSticks are not all that good, but is easy to put up. Really worked about as well as I expected.

Hi Curt,

Thanks for trying this morning. Was able to work your friend Karen and four others. I was on 20 which was not in that good of shape down here but pick up later in the morning.

Have fun in the Tennessee hills and watch out for the bears.

See you next month.

Hi Ron,

I think 40 dropped out a little early but I agree we were to close for 20.
Glad you made a few contacts like we all did on the east coast.
Hope bands get better than they have been lately.

72,
Art WB4MNK

BTW…this is now…….Sunspot number today of 36! Earlier today this was worse; the K and A index were high, (unstable - bad fading) and the Sig Noise level was S-5……..Quiet tonight…….

And we wondered why the bands were doo-doo!!!!! Wonder no more!!!

Yahoo group: naqccfl
Date: 2015-08-17 15:26:43 UTC
From: Stephen W. Szabo
Topic: 404 Message: 404

Good Morning All,

Glad to see you all had a great time at the luncheon. And thanks for the recap Frank! Much appreciated…..yes, our next meeting will be on Wednesday, September 9th at 7:00pm, at the Daytona Beach Police Department. Coffee and donuts for those in the throes of withdrawal!! Reminder notices and agenda will go out in a few weeks. Will also be planning a NAQCC-FL Chapter outing on Friday, September 25th, site to be determined. We will volunteer Frank for EVERYTHING.

I passed on this continuing DB CERT ARC adventure as I was planning on participating in the National Contest Journal's North American QSO Party (SSB) that started at 2pm local time. This is a 12 hour contest, of which you may only operate 10 hours – max power is 100W and no spotting assistance is allowed. Only QSOs with North American stations count. Because of the time shift there is a distinct advantage being on the West Coast as opposed to being on the East Coast. Looking at the last several year's winners across the categories, there are lots of 6's and 7's in the calls. Yeah, it's a tough contest and very competitive.

This was my "shakeout" exercise since my many changes in the shack occurred over the last three months. I wanted to test everything as I am intending to enter the ARRL SSB November Sweepstakes this year with the goal of finishing 1st place in the Unlimited Low Power Category (I finished 8th in 2013, and 11th in 2014 – I currently hold the Division and Section Records for this category). I hoped to manage at least a decent finish and see how my new arrangement of the shack worked.

My entry was in the NAQP 'test this year is QRP Phone. If you have never experienced the excitement (frustration) of operating QRP SSB in any national contest, I will preface my remaining statements with, "it ain't for the faint of heart"!!! Coupled with absolutely HORRIBLE band conditions this year it would make you wonder why anyone would do it (I already know I'm nuts). 10M/15M were dead (really, not a signal heard), 20M closed early with few signals, and deep QSB. 40M and 80M had S6 and S8 noise respectively – accompanied by deep QSB and really loud and frequent static crashes starting with the arrival of our daily thunderstorms around 4pm, that continued until around 11pm. Most of the signals were pretty weak requiring multiple tries to get the exchange completed.

It was a really, really, rough contest. Participants throughout the US complained about the poor conditions (running 100W!). When I quit just after 1:15 am, my ears were ringing (really), I had a slight headache, and I had the start of being hoarse. Thank God for the Digital Nosie Reduction and the Digital Voice Recorder in my Yaesu FT-2000!! The radio performed flawlessly, as did my new radio/antenna switching arrangement (very nice just to move a switch ¼ of an inch to change antennas!). The new equipment arrangement was also very comfortable and everything was easy to reach. The Dog House renovation was a success!! I have a bit of very minor tweaking to do on the antennas (outside), and I am adding another wire antenna for directional advantage, but they obviously performed well in this contest.

With most of the scores submitted already, here’s the QRP category results as of this morning. Last contest’s winner was K6UFO. This year he is third. Guess who is first this time! Wow! What a surprise!!

I also participated in my first Flying Pigs “Run for the Bacon” event Sunday night. A short, 2 hour QRP CW contest. Band conditions were still horrible, but I managed 10 Qs and finished in the middle of the pack. Oink, oink! I saw my good friend and local “snowbird” Don K3RLL in the log submissions, but never got to work him.

What a fun weekend! Ham Radio rocks!!!!

73 to all, see you soon.

Subject: [N4DAB] Saturday Meeting Minutes & Shooting Eyewear

We had a nice turnout for the informal DB CERT member & spouse/significant other BBQ lunch Saturday, August 15th at Backyard Boys BBQ on US 1 in South Daytona. In attendance were:

WD3B
N4GOA
W2EJG and XYL Carol
WA4IDI
WA4KKW
KB4T
KK4BHN

Conversation topics included Windows 10, Corel Software, old & new database programs, old radios, homebrew gear, DBARA adopting changes to its constitution and by-laws and myriad other subjects

After nearly 2 hours the group parted company after a good time was all by had.

KB4T ventured off to the Strickland range where nearly 300 rounds found their way into the berm behind the various paper targets sacrificed in the name of proficiency improvement.

It turns out that EYE PROTECTION is NOT required at Strickland Range. I was wrong about that. EAR PROTECTION IS REQUIRED and must be donned prior to entering the range. Eye protection is optional though highly recommended,

The official formal DB CERT meeting schedule resumes in September. I know that all of you who are donut-challenged will appreciate that! Unfortunately I will NOT be in attendance (please keep the applause to a dull roar!) thanks to a previously schedule vacation trip. I'm sure our esteemed leader will brief us on the agenda for the September meeting. I suspect planning for the antenna system upgrade will be one element of discussion at the meeting as well. Feel free to assign duties to me!!

Really enjoyed seeing everyone Saturday! I hope everyone else enjoyed the get together as well. Enjoy the September get together and I will see everyone in October.

73, Frank KB4T

405. NAQCC-FL Chapter Parkpedition - September 25th!!!

Hi Folks,

Getting this ready for the web page and to send out to NAQCC for distribution in about a week....need to know who is planning on going, and what you're bringing to operate.

We'll be doing a picnic lunch at the park pavilion. This is one of our favorite parks...

http://www.volusia.org/services/community-services/parks-recreation-and-culture/parks-and-trails/park-facilities-and-locations/ecological-nature-parks/candace-r-strawn-lake-dias-park.stml

Please respond if you are planning on attending by next Friday if possible!!

72/73,

Steve WB4OMM

-- FLORIDA SEPTEMBER PARKPEDITION ANNOUNCED --

Our next adventure is in just a few days!

WHAT: The Florida Chapter of NAQCC is back!!! We are resuming our monthly Field Event.

WHEN: Friday, September 25th, 2015 starting at 9:00 AM EDT

WHERE: Candace Strawn/ Lake Dias Park, DeLeon Springs, FL (5320 State Road 11, De Leon Springs, FL 32130)

FREQUENCIES: Please listen for us near 7.061, 10.116, 14.061, 18.080, and 21.061 - Look for posts to <http://www.qrpspots.com> www.qrpspots.com via the Internet when we QRV and occasionally during the operation to let everyone know who is on and where. We will also post when we go QRT. QSLs via the operator call.

WHO: At least Art WB4MNK, Steve WB4OMM & Rick AA4W (plus whoever else can make it).

WHY: TO SATURATE THE ETHER WITH VAGUE AND NEBULOUS CHIRPS, BEEPS, AND OTHER RADIOWAVE NOISE...AND TO HAVE FUN, OF COURSE!!

HOW: By the magic of QRP Ham Radio!

72/73,

Steve WB4OMM #5913

Importance: High

All City Departments should continue to monitor the progress of Tropical Storm Erika, review the City Emergency Management Plan and personal emergency plans.

If the storm track and intensity continues as forecast, Department Heads and Department Emergency Management personnel will meet Thursday afternoon to review anticipated impacts and coordinate preparedness plans. This meeting is tentative based on the Thursday NHC and State DEM Advisories at 0800 and 1100 hrs, and will be convened by the City Manager if deemed necessary.

Please review and brief/post/provide for those who may not have e-mail access.

Importance: High

Hi Folks,

Getting this ready for the web page and to send out to NAQCC for distribution in about a week....need to know who is planning on going, and what you're bringing to operate.

We'll be doing a picnic lunch at the park pavilion. This is one of our favorite parks...

http://www.volusia.org/services/community-services/parks-recreation-and-culture/parks-and-trails/park-facilities-and-locations/ecological-nature-parks/candace-r-strawn-lake-dias-park.stml

Please respond if you are planning on attending by next Friday if possible!!

72/73,

Steve WB4OMM

-- FLORIDA SEPTEMBER PARKPEDITION ANNOUNCED --

Our next adventure is in just a few days!

WHAT: The Florida Chapter of NAQCC is back!!! We are resuming our monthly Field Event.

WHEN: Friday, September 25th, 2015 starting at 9:00 AM EDT

WHERE: Candace Strawn/ Lake Dias Park, DeLeon Springs, FL (5320 State Road 11, De Leon Springs, FL 32130)

FREQUENCIES: Please listen for us near 7.061, 10.116, 14.061, 18.080, and 21.061 - Look for posts to www.qrpspots.com <http://www.qrpspots.com> via the Internet when we QRV and occasionally during the operation to let everyone know who is on and where. We will also post when we go QRT. QSLs via the operator call.

WHO: At least Art WB4MNK, Steve WB4OMM & Rick AA4W (plus whoever else can make it).

WHY: TO SATURATE THE ETHER WITH VAGUE AND NEBULOUS CHIRPS, BEEPS, AND OTHER RADIOWAVE NOISE...AND TO HAVE FUN, OF COURSE!!

HOW: By the magic of QRP Ham Radio!

72/73,

Steve WB4OMM #5913

Steve I have a battery for the Yaesu 817 I bought by mistake.

It is marked FNB-72eXX.

9.6 Volt 2500mAh NiMH.

If you know any body who can use it direct them to me.

Free for the asking all they have to do is pick it up.

Thanks Steve.

421. IMPORTANT!!!! PLEASE READ THIS RE: DARRYL AB8GU

Yahoo group: naqccfl
Date: 2015-09-05 20:20:33 UTC
From: Stephen W. Szabo
Topic: 421 Message: 421

This is one of the most difficult messages I have ever had to compose.

Art Petteway and myself visited Darryl Peterson, AB8GU today at his home here in Port Orange. Art was there this morning, and I just left his home a few hours ago. If you are not aware, Darryl has been courageously battling an aggressive cancer for the last two years; he has been through months and months of radiation and chemotherapy in an attempt to put the cancer into remission. Recently, (a few weeks ago) he underwent a new type of treatment that resulted in a undesirable and really bad reaction - this "new" treatment was a last resort as his viable treatment options have all been expended. He could not continue this treatment, hence, he is "out of options".

As of yesterday (Friday Sept 4th), he was checked for the status of the cancer, and it has returned and is aggressively spreading in his body. His physician has told him and Mary he probably has a few weeks left. He is under heavy medication for pain management, is weak, and is relegated to bed. He has some difficulty in speaking. Hospice is now involved and is helping out. Mary is not sure if he will remain at home or go to the Port Orange Hospice Center.

While Art and & I are probably his best known "henchmen", Darryl enjoyed the many DB CERT ARC and NAQCC outings and events, other ham radio related activities and the friendships he made along the way. I would urge everyone to try to stop by this next week (starting Monday) and say "hi"; if you are not able to, maybe send a card to him (I'd put it in the mail first thing Tuesday morning!). I would ask you don't call as he really can't talk much on the phone.

Please call before you visit - call late morning or early afternoon and make arrangements with Mary at 386-761- 9375; his home address is 480 Newton Road, Port Orange, FL 32127.

If anything changes, I will immediately send out a message to keep all informed of his condition and status.

Please keep Darryl, Mary, and their family in your prayers.

Thanks.

73,

Steve Szabo WB4OMM

Date: 2015-09-06 20:41:23 UTC
From: Stephen W. Szabo
Topic: 424 Message: 424

An update on Darryl Peterson AB8GU's status.

Mary called me a few minutes ago, Darryl is now in the Halifax Health - Hospice of Volusia/Flagler in Port Orange, 3800 Woodbriar Trail, Room #7. The telephone number is 386-322-4701.

While the center is open 24 hours, Mary suggested visiting between 8:30 am and 8:30 pm.

Thanks,

Steve WB4OMM

425. Some photos to share - Darryl AB8GU

Yahoo group: naqccfl
Date: 2015-09-08 01:36:03 UTC
From: Stephen W. Szabo
Topic: 425 Message: 425

I was sorting files tonight, and ran across a few pics of Darryl AB8GU that I had.then located several more from over the years. I thought it selfish not to share them since so many of you are in them, so they are now posted on our DB CERT ARC website. Unfortunately, Darryl was usually our "official photographer" on our outings, so he is missing from many of our photos.

Here is a link to make it easy: http://www.daytonacert.net/?page_id=313. If you access the web page, (www.daytonacert.net <http://www.daytonacert.net>) you can also access this page by clicking on the "Darryl Peterson AB8GU" tab. If you are planning on visiting Darryl, I strongly urge you to do it ASAP.

Thanks.

Steve WB4OMM

427. Darryl AB8GU Update

Yahoo group: naqccfl
Date: 2015-09-08 18:53:33 UTC
From: Stephen W. Szabo
Topic: 427 Message: 427

Hi Folks - Update,

I was at Hospice today around 1pm.

Darryl is sedated and non-responsive, but he can hear what's going on. If you visit, limit your time to about 10 minutes, and please do not ask him how he is feeling! It makes him "agitated".

He is still in room #7.

I added some names to this distribution, so if you get two (or more!) messages I apologize.

Steve WB4OMM

Subject: Darryl AB8GU Update

Hi Folks - Update,

I was at Hospice today around 1pm.

Darryl is sedated and non-responsive, but he can hear what's going on. If you visit, limit your time to about 10 minutes, and please do not ask him how he is feeling! It makes him "agitated".

He is still in room #7.

I added some names to this distribution, so if you get two (or more!) messages I apologize.

Steve WB4OMM

.

If you would like to sign the online "guest book" for Darryl, here is the link.

http://www.legacy.com/guestbooks/news-journalonline/darryl-l-peterson-condolences/175810693?

Please don't forget the service at 1pm tomorrow (Sunday the 13th) at Port Orange Presbyterian Church on Clyde Morris in Port Orange (just South of Herbert Street, West Side).

Subject: Darryl AB8GU Passing
Importance: High

It is with a sad, heavy heart, I am announcing the passing of Darryl Peterson AB8GU at 3:30am this morning. His wife Mary was with him. Please keep them in your prayers.

There will be a memorial service at Port Orange Presbyterian Church, 4662 S. Clyde Morris Blvd, Port Orange, this Sunday September 13th, at 1:00pm.

432. Darryl AB8GU Eulogy and Audio File

Yahoo group: naqccfl
Date: 2015-09-15 02:46:28 UTC
From: Stephen W. Szabo
Topic: 432 Message: 432

So many folks have requested a copy of the eulogy and audio file from Sunday, that I have updated our web page with this document and the audio file is embedded.

http://www.daytonacert.net/?page_id=337

I also appreciated the many kind comments sent to me about the eulogy; it was very difficult to keep composed when delivering these thoughts and I tried my best to do justice to my friend.

Feel free to pass this message along.

Thanks and 73!

Steve Szabo WB4OMM

OK you killers of the ions! (Bob, Art, Rick, and John)...

Attached is our "group photo" from today. Cleaned up nice!! (And you all have your eyes open! Hi hi hi!)

Please send me your operating summary (equipment, antenna, wattage, # of Qs, how many NAQCC members worked, and any other highlights you think are good for our chapter report.

I'd appreciate your sending as soon as practical so I can send the info up for publication.

(If you snapped any pics, send them too!!!)

72/72!

Steve WB4OMM

437. October NAQCC-FL Parkpedition

Yahoo group: naqccfl
Date: 2015-09-27 14:04:13 UTC
From: Stephen W. Szabo
Topic: 437 Message: 437

Good Morning All!

I have tentatively announced the next NAQCC-FL outing at Lake Ashby Park in New Smyrna Beach (that's what is scheduled on our list). I have updated the web page. Here's the link: http://wb4omm.com/naqcc-fl-chapter/ - and take a gander at the audio from this last outing that was sent to me!!!!

Please let me know if you are planning on attending, and if you think we should "brown bag it" again, or plan to eat at the McDonald's about 5 miles away on SR44. (My vote is to "brown bag it"..more time to operate!)

I should have the Sept Report done shortly, still waiting on some stats from folks (hint, hint if you haven't sent me any!!!!)

(Bob W2EJG and John KM4JTE -not sure if you are in the Yahoo!Group so you might get this twice!)

72/72,

Steve WB4OMM

Curt,

Enjoyed the contact with you during our October NAQCC-FLC event.

It was fun.

72,
Art WB4MNK

451. Monthly Report!! NEED YOUR INFO!!!

Yahoo group: naqccfl
Date: 2015-10-25 16:23:09 UTC
From: Stephen W. Szabo
Topic: 451 Message: 451

Hi Folks!!!

I'm almost done with the Parkpedition report from Friday...I need a description of your equipment, - radio, tuner, antenna, key, etc..; any Qs you made (including band, QTH-State and whether they were a member or not), and anything else you want to add (Rick, I don't need your QSO info - I have it!!). I have plenty of photos in this issue. Please get it to me quickly, I'd like to send the report in tomorrow morning! This is gonna' be a great report!

73!

Thanks!!!

Steve WB4OMM

Steve,

WB4MNK
EQUIPMENT: KX1, Z100 tuner, 31' vertical wire fed with coax through a 9:1
UNUN sitting on a nice big tripod.
The 31' vertical on tripod was built by John KD4JS
and it works great.
Q's : KD2JC NJ on 20 and 30 meters, member
WA2JSG NJ 30 meters member
NX8Y OH 30 meters member
WA2FBN NY 20 meters member
Total of five contacts and all were members of NAQCC.

72/73,
Art WB4MNK

460. NAQCC ParkPedition from Florida on November 20th

Yahoo group: naqccfl
Date: 2015-11-16 03:51:19 UTC
From: Stephen W. Szabo
Topic: 460 Message: 460

Hi John,
Can you send this out please?? THANKS!!! Steve WB4OMM

-- FLORIDA OCTOBER PARKPEDITION ANNOUNCED --

Our next adventure is in just a few days!

WHAT: The Florida Chapter of NAQCC - monthly Field Event.

WHEN: Friday, November 20th, 2015 starting at 9:30 AM EDT (NOTE START TIME!)

WHERE: Colby-Alderman Park, Cassadega, FL (1099 Massachusetts St., Cassadaga, FL) – Park webpage with directions: COLBY-ALDERMAN PARK WEB PAGE & DIRECTIONS <http://www.volusia.org/services/community-services/parks-recreation-and-culture/parks-and-trails/park-facilities-and-locations/ecological-nature-parks/colby-alderman-park.stml>

FREQUENCIES: Please listen for us near 7.061, 10.116, 14.061, 18.080, and 21.061 – Look for posts to www.qrpspots.com <http://www.qrpspots.com> via the Internet when we QRV and occasionally during the operation to let everyone know who is on and where. We will also post when we go QRT. QSLs via the operator call.

WHO: “The Usual Suspects” – Art WB4MNK, Steve WB4OMM, Rick AA4W, Don K3RLL, Wally KG4LAL, John KM4JTE, & John KD4JS (and whoever else can make it).

WHY: TO SATURATE THE ETHER WITH VAGUE AND NEBULOUS CHIRPS, BEEPS, AND OTHER RADIOWAVE NOISE……AND TO HAVE FUN, OF COURSE!!

HOW: By the magic of QRP Ham Radio!

MORE: See our web page at: http://wb4omm.com/naqcc-fl-chapter/

72/73,

Steve WB4OMM #5913

463. NAQCC-FL Outing is CANCELLED!!

Yahoo group: naqccfl
Date: 2015-11-20 02:18:37 UTC
From: Stephen W. Szabo
Topic: 463 Message: 463
Attachments: 2 described; binary payloads are missing from this source WARC

(John can you forward to the NAQCC members please!)

It's raining now, and won't stop until about 3am..and cloudy tomorrow with a 30% chance of rain (in Florida, that means it will rain). With the amount of rain today and it being cloudy, our Parkpedition site will be soaked and very unfriendly to us radio dudes. Hence, with a heavy heart, we are cancelling the NAQCC-FL Chapter outing for Friday, November 20, 2015. So sorry.

BUT...look for our announcement for our next adventure soon!

Happy (and SAFE!) Thanksgiving to all of our friends in the land of ham radio!

73,

Steve WB4OMM #5913.

These outings are more fun when it rains and it keeps it cool. This assumes of course there is a shelter.

Good afternoon Steve,

John, W2IV NAQCC #6150, and I had a good morning in sunny, DRY, Colby Park. (This area didn't get much of that coastal rain that you guys in the high rent district got yesterday.)

We made some contacts and ran some fairly definitive RBN tests between the 31' Unun wire vertical and the latest iteration of an elevated Hamstick with counterpoise.

Temperature 80F and clear skies, so without many clouds some of our RF managed to escape into outer space - but not all of it!

Also, many thanks to our most loyal of loyal supporters, Curt, WA2JSG there in NJ who was there for us again.

John and I have some photos. Would you like me to submit a report for the Newsletter?

Good afternoon Steve,

John, W2IV NAQCC #6150, and I had a good morning in sunny, DRY, Colby Park. (This area didn't get much of that coastal rain that you guys in the high rent district got yesterday.)

We made some contacts and ran some fairly definitive RBN tests between the 31' Unun wire vertical and the latest iteration of an elevated Hamstick with counterpoise.

Temperature 80F and clear skies, so without many clouds some of our RF managed to escape into outer space - but not all of it!

Also, many thanks to our most loyal of loyal supporters, Curt, WA2JSG there in NJ who was there for us again.

John and I have some photos. Would you like me to submit a report for the Newsletter?

72/73,
Don K3RLL <>< <http://www.qsl.net/k3rll/> http://www.qsl.net/k3rll/

473. NAQCC-WFL

Yahoo group: naqccfl
Date: 2015-11-26 17:20:46 UTC
From: lt_wright_flg@...
Topic: 473 Message: 473

We are trying to start up a west Florida NAQCC group. We have created a FaceBook page at:

Log into Facebook | Facebook https://www.facebook.com/groups/967110089994401/

Log into Facebook | Facebook https://www.facebook.com/groups/967110089994401/ Log into Facebook to start sharing and connecting with your friends, family, and people you know.

View on www.facebook.com https://www.facebook.com/groups/967110089994401/
Preview by Yahoo

We welcome all interested in QRP and especially those on west coast of Florida who are interested in attending monthly QRP events as is done by the east side.

I hope NAQCC approves of the group. We see the NAQCC-WFL as a west Florida Chapter of NAQCC. I also apologize if I over stepped my bounds by including NAQCC in the name. We wish to continue and follow in the steps of NAQCC and not become a separate group, but just a group working to get some of us Hams here in west Florida more involved in QRP.

73, ron, n9ee/r

Hi Ron…….

Happy Thanksgiving! And good for you and the West Coasties (FL that is!). I’m sure National will be happy to include your group.

Just a note. I don’t do Facebook. I don’t know if anyone else does. A web page or Yahoo!Group would make access universal.

Steve WB4OMM #5913.

Steve,
I do both yahoo and FaceBook. FaceBook is so much friendlier than yahoo for messages and the way yahoo has screwed up the system in last year I get frustrated with it, but still like it.
Facebook really makes staying in touch very easy. I am on about 20 boards, mostly all Ham Radio related.
I do like yahoo boards for they do better job with things like files and photos and links.
I get about 50 FaceBook messages each day and maybe 3 from the 30 or so I am a member of yahoo boards. Seems FaceBook is where most are these days.

The West Florida chapter of NAQCC will host 2 QRP event, our first.

1. Saturday, Dec 12th from Tampa HamFest in Polk Co, east of Tampa, FL.

2. Cypress Point Park Saturday Jan 23rd 0900-1200 hrs working 7.060, 14.060 & 28.060 CW and maybe some SSB on 7.220, 14.220 and 28.320 MHz.

All are welcome (will need admission, $10, for Tampa HamFest) we will be in tail gatoring section.

See FaceBook page for more on these events: Log into Facebook | Facebook https://www.facebook.com/groups/967110089994401/

More info as we get close to the events.

Hi Steve,

Ron, N9EE, is organizing a new local chapter of the NAQCC over in the Tampa Bay area and we are calling it the “West Florida Chapter.” We can keep “Florida Chapter” as the name of your group but I was wondering if you would want to modify the name a bit to more closely reflect the area of the state that you are in? Talk it over with your members and let me know what you want to do.

Thanks and 73,

Paul - N8XMS

NAQCC President

We over here on the west coast have admired Steve and the east side with the Friday events and wish we could attend. I have gone out and set up on the event day and tried to work them. And I know going out to a park or other out door setting is fun. I always enjoy it, even at out club picnics...take a small station and sometimes we just set around and talk about it.

So I thought setting up something for us over here would be fun and with NAQCC being the lead in all this, why not.
We in Florida can be out in the wild most all year round, but I am sure other parts of the US and world would like to also. So more the merrier. And just getting together with fellow Hams is always a good time. This is major reason for doing these events, IMHO.

Steve WB4OMM,

As a tenderfoot rookie participant in the FL NAQCC, I have the following observations:

Operating QRP is an interesting and exciting approach to HF Ham radio. The hobby certainly needs more/new ways to spread it's base of HF operations.

I suspect that many/most of the "new" Hams are VHF/UHF Techs until they discover HF. An affordable and fun way to test the HF waters would promote that discovery. And who better to make that introduction than some of the seasoned veterans of QRO who demonstrate their magic via QRP!

Outdoor excursions are FUN and add a wrinkle to the inherent challenges of low power and improvised antennas. Just look at what our group keeps showing up with at the outdoor operations. There is something new to be tested, dissected, discussed, and perhaps copied - all the time. This is the part of Ham radio where we can still tinker and invent. I know I can't build a DSP rig, but I can cut some wire, throw it up in a tree, and try for something better than I was using last time..

The NAQCC can sustain Lots of new members and operating events. Florida offers a long outdoor season too. I think we should encourage more groups to have the same experiences we enjoy.

Now as to what we call these groups(and ourselves) --- in an environment where we were "The" group in FL --- that's a good question. I don't have the answer, but a few questions:

1. should each group stand entirely alone under the national organization, or be a sub chapter
of "the" existing state chapter? Does the national organization have guidelines already on this?
(would a state chapter even -wish- to accept the overhead of "management and co-ordination" of sub chapters?)
2. what has been the practice in other states- do we know?
3. whose decision is it? national? state? local? free-for-all? ..just asking...

I feel the bottom line is to encourage the growth (ie: health) of QRP in a way that allows all groups to be creative and have an identity. If it turns out there are no precedents (unlikely) then FL has the challenge to set at least one style for ourselves, and perhaps others.

I think I read that there are 39,000 plus Hams in FL. That's a bunch. We need to do this well.

respectfully,
John Scholtens
KD4JS

490. Re: [naqccfl] FW: New West FL chapter of NAQCC

Yahoo group: naqccfl
Date: 2015-12-10 13:45:00 UTC
From: Ron Wright
Topic: 486 Message: 490

As the originator of the NAQCC-WFL chapter (only because no one else was doing it, but I knew there is interest) I put WFL on the title to show it was for west Florida, an obvious thing.
The activity of most chapters in NAQCC are short 3 hour type outings and done at the local level only. I would not expect a Ham from Miami or even Orlando to come over for what we are planning, a 3 hour event. But of course they are welcome.

NAQCC-FL was not an all Florida group although I am sure they would welcome any Ham, even one from NY, hi. Just the standard operation in the events is by the locals wherever it is. We can say same for Field Day. Just how it is.
I guess Paul's writing was maybe to encourage Steve and his group to label itself EFL to kinda show up front where the activity really is. We say FL to indicate Florida and for good reason.
What any chapter is called as long as it has NAQCC in it, the events they plan really say what they are. I could have called NAQCC-WFL DsQRPG for Dogs QRP Group, hi (don't sound that bad), but since NAQCC has supported and established a good organization IMHO it is good group to be member of and many understand what it is about.

  Steve WB4OMM,
As a tenderfoot rookie participant in the FL NAQCC, I have the following observations:
Operating QRP is an interesting and exciting approach to HF Ham radio. The hobby certainly needs more/new ways to spread it's base of HF operations.
I suspect that many/most of the "new" Hams are VHF/UHF Techs until they discover HF. An affordable and fun way to test the HF waters would promote that discovery. And who better to make that introduction than some of the seasoned veterans of QRO who demonstrate their magic via QRP!
Outdoor excursions are FUN and add a wrinkle to the inherent challenges of low power and improvised antennas. Just look at what our group keeps showing up with at the outdoor operations. There is something new to be tested, dissected, discussed, and perhaps copied - all the time. This is the part of Ham radio where we can still tinker and invent. I know I can't build a DSP rig, but I can cut some wire, throw it up in a tree, and try for something better than I was using last time..
The NAQCC can sustain Lots of new members and operating events. Florida offers a long outdoor season too. I think we should encourage more groups to have the same experiences we enjoy.
Now as to what we call these groups(and ourselves) --- in an environment where we were "The" group in FL --- that's a good question. I don't have the answer, but a few questions:
1. should each group stand entirely alone under the national organization, or be a sub

chapter of "the" existing state chapter? Does the national organization have guidelines already on this? (would a state chapter even -wish- to accept the overhead of "management and co-ordination" of sub chapters?)2. what has been the practice in other states- do we know?3. whose decision is it? national? state? local? free-for-all?
 ..just asking...
I feel the bottom line is to encourage the growth (ie: health) of QRP in a way that allows all groups to be creative and have an identity. If it turns out there are no precedents (unlikely) then FL has the challenge to set at least one style for ourselves, and perhaps others.
I think I read that there are 39,000 plus Hams in FL. That's a bunch. We need to do this well.
respectfully,John ScholtensKD4JS

From: lt_wright_flg@...
Topic: 491 Message: 491

We will be operating QRP from the Tampa Bay HamFest in Plant City, just east of Tampa tomorrow, Saturday, Dec 12th.

We will be operating from 0900-1300 hr.
Frequencies: 7.060, 14.060 & 28.060 CW. Will do some SSB phone on 7.220, 14.220 and 28.320 MHz still QRP.

Hiya Folks,

I'm thinking, "East Florida Chapter". Simple change. If others follow, they can worry about being more "localized", I guess (rather than us!)

Thoughts folks??? Please respond – so I can send a response to Paul as noted below.

Yahoo group: naqccfl
Date: 2015-12-16 20:30:34 UTC
From: Stephen W. Szabo
Topic: 494 Message: 494

Hi Paul,

After a few discussion with local members of our group (and the initial forming parties), we have decided to retain our currently registered identification – the Florida Chapter of the NAQCC – without change. We have several members that are from outside Florida, and our in state members are currently from at least three counties; we also operate from various sites in our region, so any “location” in the Chapter name is really not necessary for our operations or member identification. We’re fine with Ron and his folks adopting the West Florida Chapter (we hope he stays a member with us!), or others adopting similar names to differentiate from other groups in the state.

Please continue to list us as the “NAQCC Florida Chapter” in the Newsletter and other references at NAQCC National.

Thanks much for the solicitation! It was appreciated none the less!!!

And…..Merry Christmas, Happy Holidays, and best wishes for a prosperous New Year! Might “see” you in the mW event tonight.

72/73,

Steve WB4OMM #5913

Subject: Re: New West FL chapter of NAQCC

Hi again Steve.

I forgot to mention that if you are going to change the chapter name I will need to know by the end of this month so that I can change the newsletter page for the January issue. I don’t think that there would be any need to change the little graphic that we are using. It does say “Florida Chapter” on it but the print is very small and the full name of the chapter would always be right next to it in full-sized text. But you could change it if you want.

We are almost having “Florida weather” up here. Yesterday the high was in the mid-60’s. I drove by a golf course yesterday and there were golfers on it wearing shorts! It’s only going to last another day or two and then we will be back to our normal Michigan weather, although they are predicting that we will have below-normal snowfall this winter. So far we have only had to clear snow once.

Greetings and Salutations all of you brass poundin' low power folks!

Attached is the tentative operating schedule for the NAQCC-FL Chapter for 2016.

As previously arranged, most dates are the third Friday of the month, and times are from 0930 to 1230 (Local EST//EDT time); the two changes - in May we will operate the 2nd week - Daytona Hamvention starts on the third Friday; and September it will be the 4th Friday as I am out of state that week the 3rd Friday - in all places, Hartford, CT! Will have to stop by the ARRL and W1AW!

Take a look see, give me some comments, please!!

(And I have updated our Web Page tentatively showing the January op site and date).

Merry Christmas, Happy New Year Folks!!!!

72/73!

Hiya Wally,

A few drops here…..similar prediction. I already have my lunch made and car packed, and nothing else planned for today….I am going to drive over there and will see what it looks like. If not good, I'll just head to breakfast and then home. Hoping like last scrubbed outing in November the site is good even though home and other locations are not. I'll e-mail all when I arrive and provide a status (probably around 8:30 to 9:00 am).

Subject: Weather.

Hi Guys;

The 6:30 A.M. weather radar shows solid light rain from Daytona to the Tampa area which I confirmed when bringing in the news paper. Looks like a few hours followed by a short break and more rain off the Gulf, no nearby lightning at this time. I recommend scrubbing the Lake Diaz location and those able, to try from their home QTH.

511. UPDATE - UPDATE

Yahoo group: naqccfl
Date: 2016-01-23 03:17:15 UTC
From: Stephen W. Szabo
Topic: 511 Message: 511

Close…..”Go-Fer”……Hi Hi Hi!

Been trying to work VP8STI (S. Sandwich Islands) for 4 days straight. Either I can’t hear them (as usual……) or they can’t hear me. Would be #325. I have maybe 4 days left……..Also have about 40% of my SDR transceiver done (Softrock Ensemble RXTX). Lotsa teeny, tiny, almost invisible solder pads (several SMT parts, and most all I need a magnifier just to read the component values. Soldering with a magnifying headset is a whole ‘nother world too. So I’m going very, very slow and meticulously quadruple checking everything. So far. Everything tests/works as it should. I connected it to the computer and it gets accessed by the SDR program….yea!!!!! I have 4 steps (build modules) out of 10 done (The 12VDC power supply, the USB and 5VDC supply, the local oscillator and voltage dividers). Next comes the RX mixer. Was very cool to see the LO change frequency via the software (and hear the LO on my FT-2000!).

While I have everyone’s temporary attention (yeah, ADD…..)……

An update on the National Parks on the Air….I spoke to the Canaveral Seashore Park coordinator…and got the permit application - $150.00 NON-refundable fee!!!! Also….NO GENERATORS, NO TABLES, NO TENTS/COVERS, NO STRUCTRES. Maybe operate out of vehicles like we do with Florida QSO Party with hamsticks? Will be taking a ride down there to scope out the North park area to see what we might want to do. If I figure something out, I will ask for a ‘Waiver” of the fee; else we can “operate” in another, non-fee manner……..

We’ll see what happens……..

Next week, I will send out the scripts and such for the Daytona 500 SE Operation (4 weeks out!) I have not heard from Ron about resetting the web page. I will wait another week or so before I send out a solicitation for who wants what- that I will spread sheet and post to the daytonacert.net page or the yahoo group for everyone.

Our ham class/test session is already up to 8 folks!! (and it hasn’t gone out to the PD or City yet). Looks like a good group so far. Will let you know how that progresses too……

I was planning on going to Sanford with the QRP fellas tomorrow morning, but 45 degrees and 17 mph winds (read: wind chill of 38)…..nah, I’m staying home.

Maybe another “doghouse-pedition” in the wilds of Port Orange! Listen for Kelly K4PUG and the CFL QRP Group in Wekiva Park, and the new NAQCC-WFL fella Ron N9EE tomorrow starting around 9am on the “usual” CQ QRP freqs…..(7.050-7.060, 14.050-14.060, 10.110-10.115, 21.050-21.060).

73!

Stay safe (and warm).

515. Dayton Hamvention

Yahoo group: naqccfl
Date: 2016-02-04 03:47:15 UTC
From: Stephen W. Szabo
Topic: 515 Message: 515

Greetings folks (you may be getting two of these.I sent it to two different groups).
Is anyone contemplating going to the Dayton Hamvention this year? (May 20-22)? I am almost sure I am going, also attending some of the ARCI-QRP groups FDIM event).

After several hours of perusing the airlines (no more non-stops from Orlando) and giving up on car rentals (all over $250) I am considering driving the 14 hr one-way trip.

I can get a hotel room in Dayton for about $100 per night..the kinda plan is...

* Leave Wednesday (18th) mid-morning, stop at hotel early evening (after 7-8 hrs - hotel is $100)

* Thursday morning (19th) out early, arrive Dayton hotel around 4-5pm, check into hotel in Dayton
* Thursday night 8pm, FDIM "Four Days in May" QRP event in Fairborn OH at Holiday Inn..

* Friday morning (20th), Dayton Hamvention
* Friday afternoon, FDIM Build-a-thon starting at 3:30pm
* Friday night starting at 8pm, FDIM "Show and Tell, QRP Club and Homebrew Competition".

* Saturday (21st), Dayton Hamvention
* Saturday night, FDIM Grand Banquet at 7:30pm

* Sunday(22nd), Check out of hotel around 10am, Dayton Hamvention, head for home by 3pm; stop at hotel after 6-7 hours ($100 hotel night again).

* Monday (23rd) finish last leg of trip home; arrive Daytona area sometime around 6pm or so.

My "guestimate" of the gas and hotels for the entire trip is $150 for gas and $500-600 for hotel rooms, total of around $700 (and most likely less, I estimate, "high". If anyone is interested, and will spilt costs, this drive is waaaaay cheaper than flying and renting with one passenger, even better with two!!! (No, I think three is the limit in my car, and I can rent suites that have a third bed (pullout couch - will be a bit more).
The guesstimate travel cost is $350 each with two of us, $250 with three of us. I will do all the driving. And you will need to get tickets for the FDIM and Hamvention (online). As an aside, I may be working the ARRL booths for several hours on Fri/Sat/Sun, still waiting to hear.

For those that can't spend that many days..I am willing to discuss flying out Thursday morning and returning Sunday night, we just split hotel and car rental... ($375 plus $250) - airfare on your own - Delta out of Daytona is about $300 roundtrip right now (leaving at 7:30 am Thursday morning, one-stop Atlanta; leaving Daytona Sunday at 2:15 pm and back in Daytona around 8:30pm).

Before I do any more work, is anyone interested, and which mode of travel? And I need to know ASAP to make motel arrangements!

Thanks for the bandwidth!
73!
Steve WB4OMM

Yahoo group: naqccfl
Date: 2016-02-04 04:59:42 UTC
From: WA2JSG
Topic: 515 Message: 516

I will be at the Hamvention again this year (my 43rd consecutive year), God willing. I almost always drive (about 10 hours from NJ). I usually stay at a Quality Inn on I-75 in Miamisburg ($72 a night for us 'regulars'). I leave NJ that Thursday morning, late lunch at the Waffle House in Columbus, and get to the FDIM at the Holiday Inn around 6pm that evening. Finally reach my hotel around 9pm or so. I will be helping out at our inside booth for the SKCC on those 3 days (group picture that Saturday around 1pm or so), and sometimes help Karen W4KRN with her outside booth (I help for free beer hi hi).
I leave Dayton around noon that Sunday, quick lunch at the Hamburger Wagon downtown Miamisburg (http://www.hamburgerwagon.com/) then drive to Memphis for a few days with daughter & her family (about 8 hour drive).
(guess you can tell I've been doing this for awhile)
Y'all be sure to look me up while there! ...and be sure to bring your cameras... many oddities happen at Hamvention.

Hey Steve.. I forwarded your NAQCCFL Info to Doug, VE5UF
dougf@... who is 'driving down to Florida' at the end of
April..I believe he and his XYL Joni are spending most of May there ! He
looked you up on QRZ and says your QTH is only about 15min SW of where
they will be staying in Daytona Beach ! So far I have not been able to
convince him to join the NAQCC Ranks ! He is a Great Op and Great
Guy..heck you may have met him at one time ! He was a contractor at
NASA and spent a lot of time in the area years ago..(along with a time
share he and Joni used to have..I think he sold it years back though !)
He does travel to FL every year..also 6Y and XE as well.. does a lot of
contesting on 10 and 160M..WW Tests..and is a great CW Op' as well ! He
sounds interested in 'meeting up' for one of your 'Park Excursions' or
just meeting some fellow Op's..whenever ! I will keep him in 'your
loop' as to what your announcements are.. and feel free to contact him
yourself if you like ! 73

519. RE: [N4DAB] NAQCC-FL CHAPTER FLORIDA JANUARY PARKPEDITION ANNOUNCED

Yahoo group: naqccfl
Date: 2016-02-16 13:31:11 UTC
From: Stephen W. Szabo
Topic: 498 Message: 519

Hi John,

Can you send this out please?? THANKS!!! Steve WB4OMM

-- FEBRUARY PARKPEDITION ANNOUNCED --

Our next adventure is in just a few days!

WHAT: The Florida Chapter of NAQCC - monthly Field Event.

WHEN: Friday, February 19th, 2016 starting at 9:30 AM EST

WHERE: Gemini Springs Park, DeBary, FL (37 Dirksen Drive, DeBary, FL) -
Park webpage with directions: GEMINI SPRINGS PARK WEB PAGE AND DIRECTIONS
<http://www.volusia.org/services/community-services/parks-recreation-and-cul
ture/parks-and-trails/park-facilities-and-locations/ecological-nature-parks/
gemini-springs-park.stml>

FREQUENCIES: Please listen for us near 7.061, 10.116, 14.061, 18.080, and
21.061 - Look for posts to <http://www.qrpspots.com/> www.qrpspots.com via
the Internet when we QRV and occasionally during the operation to let
everyone know who is on and where. We will also post when we go QRT. QSLs
via the operator call.

WHO: "The Usual Suspects" - Art WB4MNK, Steve WB4OMM, Rick AA4W, Don K3RLL,
Wally KG4LAL, John KM4JTE, & John KD4JS (and whoever else can make it).

SPECIAL NOTE: Watch for members operating as N4DAB, 2016 Special Event
Station for the Daytona 500. More info at: www.qrz.com
<http://www.qrz.com> (lookup N4DAB) or www.daytonacert.net
<http://www.daytonacert.net> !! Watch the spotting networks!!

WHY: TO SATURATE THE ETHER WITH VAGUE AND NEBULOUS CHIRPS, BEEPS, AND OTHER
RADIOWAVE NOISE...AND TO HAVE FUN, OF COURSE!!

HOW: By the magic of QRP Ham Radio!

MORE: See our web page at: <http://wb4omm.com/naqcc-fl-chapter/>
http://wb4omm.com/naqcc-fl-chapter/

Hi;Steve;Technical information as follows;
Rig= Yaesu 817 all mode, running 5 watts off a 7 AH 12 Volt Battery. Output through an LDG Tuner and coax feed to a 13' Grumman aluminum canoe. The canoe was set up as a vertical tied to some trees and isolated from the ground. A 13' wire counterpoise ran at 90 degrees about a foot off the ground. In theory this would be close to the 17 meter band and the tuner would handle any lack of precise length. With an alligator clip attached close to the bottom of the canoe and paired with the counterpoise the LDG tuned right in on the 17 meter band. Reception was fine with stations from Germany, Italy , Spain, and California very strong and easy to hear on SSB. Efforts to make a contact with those stations were not successful, as was the case with calling CQ for a short period. The question remains why reception was great, but effective transmission was lacking. (Note that a 13' canoe standing on end may be viewed as a safety hazard in a public area.) This in no was pretends to be a stealth antenna, just lots of fun.
Thanks,WallyKG4LAL

From: lt_wright_flg@...
Topic: 532 Message: 532

NAQCC-WFL March 19th Event, Tampa Bay, Florida

Lettuce-Lake-Regional- Park off Fletcher just west of I75 for our March 19th QRP event. By then the weather should be nice and warm, would not have to worry about wind, and is centrally located for many.

Setup 8AM. Start operating around 10AM.

Will be on 7.060 & 14.060

Bring your rig and antenna, I think no electric so must have power/battery/etc.

73, ron, n9ee/r

From: Stephen W. Szabo
Topic: 540 Message: 540

Hiya Fellas.....can you get this out!
Thanks!
Steve WB4OMM

==========

FLORIDA CHAPTER NAQCC MARCH PARKPEDITION ANNOUNCED

Our next adventure is in just a few days!
WHAT: The Florida Chapter of NAQCC monthly Field Event.
WHEN: Friday, March 18th, 2016 starting at 9:30 AM EST*
WHERE: Hontoon Island State Park, DeLand, FL (2309 River Ridge Road, DeLand, FL) – Park webpage with directions: HONTOON ISLAND STATE PARK WEB PAGE AND DIRECTIONS <https://www.floridastateparks.org/park-history/Hontoon-Island>
FREQUENCIES: Please listen for us near 7.061, 10.116, 14.061, 18.080, and 21.061
Look for posts to www.qrpspots.com <http://www.qrpspots.com> via the Internet when we QRV and occasionally during the operation to let everyone know who is on and where. We will also post when we go QRT. QSLs via the operator call.
WHO: “The Usual Suspects” – Art WB4MNK, Steve WB4OMM, Rick AA4W, Don K3RLL, Wally KG4LAL, John KM4JTE, Bob W2EJG, Charlie WX4CB, & John KD4JS (and whoever else can make it).
WHY: TO SATURATE THE ETHER WITH VAGUE AND NEBULOUS CHIRPS, BEEPS, AND OTHER RADIOWAVE NOISE……AND TO HAVE FUN, OF COURSE!!
HOW: By the magic of QRP Ham Radio!
MORE: See our web page at: http://wb4omm.com/naqcc-fl-chapter/

72/73,
Steve WB4OMM #5913

543. Carol Brannigan in Hospital

Yahoo group: naqccfl
Date: 2016-03-18 02:24:05 UTC
From: Stephen W. Szabo
Topic: 543 Message: 543

Hi All,

Last night Bob's wife Carol was not feeling well, and that's why he called and told me he wouldn't be at the DB CERT meeting. I got a call from Bob tonight on my way home from UCF Daytona - he was at Halifax Hospital. After some time last night he finally convinced her to go to the Emergency Room, and on her arrival in the ER, she "flatlined". They brought her back and in a nutshell, had to continue to provide an electric charges to keep her heart working - by Bob's account, about every 30 seconds! They used a "temporary" pacemaker type device and admitted her. This evening she was having a permanent pacemaker put in. I went by the hospital (8:00pm), but couldn't see Bob as only immediate family is allowed in the Cardiac Unit, and Carol was still in surgery. However, I did talk to Bob before I left, and he is in good spirits, and Carol's prognosis is very good. Bob will let us know what's going on as he knows, but wanted all to know he will not be making the NAQCC-FL activity tomorrow (Friday), nor will he be able to make the NPOTA event on Saturday. Even after several offers, he said he needs nothing and is OK.

I would not call him as he is in the hospital room with Carol. He'll let us know when he is taking calls. They are in room 404 -Concentrated Cardiac Care.

Please keep them both in your thoughts and prayers. IF I hear anything I will let all know.

Steve WB4OMM

556. NAQCC-WFL April event

Yahoo group: naqccfl
Date: 2016-04-08 13:11:50 UTC
From: lt_wright_flg@...
Topic: 556 Message: 556

Anclote Park, Holiday, FL
Saturday, April 16th

For our NAQCC-WFL April event we will meet at Anclote Park in Holiday (south west Pasco Co), the park north of the power plant. We will be about 50ft from the Gulf so if would like to try a vert in the water here is your chance.

So bring your CW QRP and work along side of us and get a taste of CW.

operate around 7.060 & 14.060 MHz.

All welcome, Ham or not, NAQCC member or not.

73, ron, n9ee/r

Surprising as to how many using HW8. I wanted to make a IF/osc combo for the xmtr to marry with the rcv VFO and make a transceiver.

Some add a DSS or other VFO which I am sure works well, just more work, hi.

73, ron, n9ee/r

-- APRIL NAQCC-FL PARKPEDITION ANNOUNCED --

Our next adventure is in just a few days!

WHAT: The Florida Chapter of NAQCC monthly Field Event.

WHEN: Friday, April 15th, 2016 starting at 9:30 AM EST

WHERE: Sunrise Park, Holly Hill, FL (1135 Riverside Drive, Holly Hill, FL)
- Park webpage with directions:
<http://www.sportsvolusia.com/facilities/holly-hill%20/sunriseholly.stml>
SUNRISE PARK WEB PAGE AND DIRECTIONS

FREQUENCIES: Please listen for us near 7.061, 10.116, 14.061, 18.080, and 21.061. Look for posts to www.qrpspots.com <http://www.qrpspots.com> via the Internet when we QRV and occasionally during the operation to let everyone know who is on and where. We will also post when we go QRT. QSLs via the operator call.

WHO: "The Usual Suspects" - Art WB4MNK, Steve WB4OMM, Rick AA4W, Don K3RLL, Wally KG4LAL, Bob W2EJG, Paul NU4C, Charlie WX4CB, John KM4JTE, & John KD4JS (and whoever else can make it).

WHY: TO SATURATE THE ETHER WITH VAGUE AND NEBULOUS CHIRPS, BEEPS, AND OTHER RADIOWAVE NOISE...AND TO HAVE FUN, OF COURSE!!

HOW: By the magic of QRP Ham Radio!

MORE: See our web page at: http://wb4omm.com/naqcc-fl-chapter/

NAQCC-WFL April 2016 Event is this coming Saturday

Anclote Park (see map, bubble 3)
Holiday, FL
April 16, 2016

Start at 0900 hr

For our NAQCC-WFL April event we will meet at Anclote Park in Holiday, the park north of the power plant.

So bring your CW QRP rig. Other modes can be operated so if you like bring your gear and work along side of us and get a taste of CW. Although next to a big electrical power plant, I am sure there is not electric so need your batteries.

Will operate 7.060 & 14.060 or any other CW frequencies one likes.

this site is about 50 ft from the Gulf so might try a vert in the water.

All welcome, Ham or not, NAQCC member or not.

73, ron, n9ee/r a know code Extra

I'm afraid I never heard Steve this morning, but did work Art on 30m.
However, while looking for Steve on 40m, I did 'bump into' NAQCC VP John
N8ZYA in WV for a nice QRP 339x2 chat.
Hope to see some of the guys at FDIM in Dayton next month.

Topic: 508 Message: 566

This last Saturday we had our April NAQCC-WFL event at Anclote Park in Holiday. Was very nice day, little windy as one would expect being on the Gulf.

Results of event:

Attending:
Ron N9EE Spring Hill, FL 6145
Joe KW1K Spring Hill
John KK4ITX Zephrhills 7249
Knight W9PNS Port Richey
Mike WB8ONY Holiday

Log
TIME CALL RST/MY RST FREQ COMMENTS
1012 N4CD 599/339 14.041 National Park op
1015 K2GOT 589/559 14.051 Bob, NY, 5266
1047 W2MM 599/599 14026
1057 W9ZN 599/559 14.047 Bill, IL, 1 kW
1120 K1PU 589/559 14.052 Hank, CT, SKC12486, 95W, 3 ele beam
1200 SM5CA 589/449 14.062 Lars, Sweden
1204 WB7TOK/8 599/599 14.062 David, WVa, 100W, long wire

20m was very good start to finish, 40m was dead.

Considering either Lettuce Lake Park or Bloomingdale Tree park in Brandon for May event. Also considering date of May 28th, the day of the 1st INTERNATIONAL FIELD RADIO EVENT. The 21st is Armed Forces day so maybe this would be good also.

568. FW: Youth in Amateur Radiosport Survey

Yahoo group: naqccfl
Date: 2016-05-06 14:58:18 UTC
From: Stephen W. Szabo
Topic: 568 Message: 568

-----Original Message-----
From: ARRL Members Only Web site [mailto:memberlist@...]
Sent: Friday, May 6, 2016 8:43 AM
To: sszabo1@....com
Subject: Youth in Amateur Radiosport Survey

The Contest Advisory Committee (CAC) is studying how to get more youth involved in the contesting aspects of our hobby and have designed a very thorough survey to solicit input. They would like as many people to take the survey as possible and ask that you take the survey and ask any youth you know, whether they are hams or not, to take it as well. The survey asks different questions that depend on the answers you submit and will only take a few minutes to complete.

The link to the survey is: tinyurl.com/YouthHamRadio

As the Board's Liaison to the CAC, I am especially pleased with the CAC's efforts in constructing the survey. Please help them to gather data by taking the survey, asking others to take it, and sharing this email with your friends and clubs.

To all radio amateurs

SB QST ARL ARLB016
ARLB016 Missouri Radio Amateur Petitions FCC to Designate "Symbol Communication" Subbands

James E. Whedbee, N0ECN, of Gladstone, Missouri, has petitioned the FCC to designate Morse (radiotelegraphy) Amateur Radio band segments as "symbol communication" subbands. The FCC has invited comments on his Petition for Rule Making (RM-11769), filed on May 2. Arguing that retaining the current regime of "legacy" CW subbands has proven to be grossly inefficient, Whedbee said he'd like to see the FCC delete all privilege restrictions that limit any part of the Amateur Radio spectrum to Morse code to the exclusion of other modes.

RM-11769 can be found on the web at,
http://apps.fcc.gov/ecfs/comment/view?id=60001692464

"Nostalgia for retention of Morse code telegraphy-only subbands is also an insufficient reason to avoid moving forward to [the] elimination of such subbands, because nothing about this Petition suggests the elimination of the mode itself, only that it not be the sole authorized mode in the subject subbands," Whedbee told the FCC.

Whedbee characterized CW-only subbands as "an excessive regulatory constraint, as well as a poor use of the spectrum concerned." He proposed that the FCC's Part 97 rules reflect the "ultimate form of communication reproduced at the receiving end." As he explained it, his regulatory scheme would break down modes into three categories - "symbol communication mode" - for CW, digital, and other emission modes that reproduce a discrete symbol on the receiving end - "voice mode," and "image mode."

"[C]ontinuing regulation by specific emission designator is proving to be onerous with changes to the state of the art," Whedbee said. "Accordingly, to continue developing the state of the art in radiocommunications, Amateur Radio needs to clearly get away from regulating in that fashion and return to consideration of what the receiving end of the communication reproduces."

He proposed that where the Part 97 rules refer to exclusive radiotelegraphy allocations - or subbands - privileges be changed to reflect symbol communication modes. Where the rules prohibit voice and image modes, he would revise the rules to reflect symbol communication modes. In situations where current rules prohibit symbol communication modes other than Morse, that voice and image modes would be permitted, "with an exception for manually keyed"
radiotelegraphy.

For example, he would drop the distinction between 75 meters and 80 meters, authorizing symbol communication modes between 3.5 MHz and
3.65 MHz, and voice and image modes between 3.65 MHz and 4 MHz, with manual radiotelegraphy authorized throughout the band.

Whedbee told the FCC that, if his Petition is accepted for filing and put on public notice, he would submit an appendix spelling out proposed service rules as part of his Petition.

Commenters have 30 days to respond to Whedbee's Petition.

588. NAQCC-WFL May 28th event

Yahoo group: naqccfl
Date: 2016-05-20 14:28:58 UTC
From: lt_wright_flg@...
Topic: 588 Message: 588

Our next NAQCC-WFL QRP event will be May 28th along with the First International Field Radio Event.

Lettuce-Lake-Regional- Park off Fletcher just west of I75 on north side of Fletcher Ave for our May 28th QRP event.

Lettuce Lake Regional Park

6920 East Fletcher Avenue

Tampa, FL 33637

Setup 8AM. Start operating around 9AM.

This event is with the International Field Radio Event.

We will try to set up in the open area to the left of the stop sign in rear of park. Where we turned right to go to our March event, look to left and see wide open area.

We will be operating on the frequencies of the International Field Radio Event.

CW frequencies

40 metres – 7.035 Mhz

30 metres – 10.115 Mhz

20 metres – 14.035 Mhz

17 metres – 18.075 Mhz

15 metres – 21.035 Mhz

Bring your rig and antenna, No electric so must have power/battery/etc.

73, ron, n9ee/r a know code Extra

Hi Curt,
Not a sound! But, then I usually don't hear them anyway as close as I am to them. I checked the spotting networks and did not see anything either. Ron is on this reflector, maybe he will respond. He was scheduled for today, as is the other group I believe up in Illinois. While I'm at it, try to hook up with you at Dayton, you were in the first group photo, and then disappeared! Asked about you several times, but just couldn't find you. There's always next year old man! I did get to meet Karen, and John Smithson.
Hope to talk to you soon! Safe travels.

Good Morning!

Today starts the 2016 Hurricane Season. Please review the attached documents for information related to this Season's predictions and preparedness recommendations. Please note, the 2016 storm names of "Alex" and "Bonnie" have been used. Let's hope that's it for named storms this year!
As in previous advisories, the widest distribution is requested, including printing and posting these documents for those who do not have internet/e-mail access.
Stay Safe!

Subject: *Tropical Depression Three forms in the southern Gulf of Mexico***
Importance: High

TD#3 has formed in the Gulf of Mexico

Summary:

.Current observations indicate that the area of low pressure near the northern coast of the Yucatan Peninsula has become better organized and the National Hurricane Center has begun issuing advisories on Tropical Depression #3.

.The low is expected to move more into the southern Gulf of Mexico later today, where conditions are favorable for additional development and strengthening.

.A Hurricane Hunter reconnaissance mission into the system is scheduled for this afternoon.

.The next name on the 2016 Atlantic storm name list is Colin.

Florida Outlook:

.T.D. #3 is expected to bring heavy rainfall and a threat for severe weather to much of the state through Tuesday. Current timing suggests bands of thunderstorms could be felt in the Keys and Southwest Florida as early as tonight, spreading north along the Gulf Coast throughout Monday morning and affecting the Florida Peninsula through Tuesday evening.

.Rainfall amounts from Sunday to Thursday could reach 3-6" across much of the Florida Peninsula, with isolated higher totals of 8-10" possible along the Nature Coast.

.Severe thunderstorms with damaging winds are possible across North Florida today as a result of the frontal system, with additional severe weather possible, including isolated tornadoes, on Monday across portions North and Central Florida.

.In addition, increased wave heights are expected along the Gulf Coast beginning early Monday, leading to an elevated risk of rip currents and possible minor coastal flooding and erosion.

A review of pre-event planning with emphasis on heavy rainfall and associated flooding is recommended.

Next advisory will be Monday morning at 0900 hours, unless a change of significance occurs.

What we here on west coast near Tampa are expecting:
Report from Pasco Co EOC: Potential impacts of the storm:
o Above normal tides 3-4 feet Monday afternoon into Tuesday morning.
o Storm surge of 3-4 feet
o Coastal flooding similar to Tropical Storm Debby
o Flooding rain of 6 to 8 inches late Sunday night, Monday, and Monday night
o River flooding developing Monday night and persisting through Thursday 73, ron, n9ee/r

597. ***FYI: Tropics Update- T.D. #3 Becomes Tropical Storm Colin***

Yahoo group: naqccfl
Date: 2016-06-05 22:39:49 UTC
From: Stephen W. Szabo
Topic: 597 Message: 597
Attachments: 1 described; binary payloads are missing from this source WARC

THE NATIONAL WEATHER SERVICE IN MELBOURNE HAS ISSUED A FLOOD WATCH FOR...VOLUSIA...INDIAN RIVER... MARTIN... BREVARD... LAKE...OKEECHOBEE... ORANGE...OSCEOLA... SEMINOLE... AND ST. LUCIE. FROM LATE TONIGHT THROUGH MONDAY EVENING. SHOWERS AND SQUALLS WILL MOVE NORTHWARD ACROSS EAST CENTRAL FLORIDA ALL DAY MONDAY. PERIODS OF HEAVY RAIN ARE EXPECTED WITH RAIN TOTALS OF 3 TO 5 INCHES POSSIBLE OVER THE WATCH AREA. LOCALLY HIGHER AMOUNTS WILL BE POSSIBLE.

Summary:
.At 530pm EDT Sunday, T.D. #3 was upgraded to Tropical Storm Colin based on observations from Hurricane Hunter reconnaissance aircraft.
.At 5pm EDT, T.S. Colin was located in the southern Gulf of Mexico about 475 miles south-southwest of Apalachicola, or about 465 miles southwest of Tampa.
.Maximum sustained winds have increased to 40 mph with higher gusts, and some additional strengthening is predicted.
.There is still some uncertainty in regards to the eventual strength of this system. Most models, along with the official NHC forecast, predict weak tropical storm status prior to moving across the Florida Peninsula. However, some models have the system at tropical depression status while others show the potential for a stronger tropical storm in the Gulf.
.Tropical Storm Colin is currently moving north at 12 mph, but a turn to the northeast is expected within the next 24 hours. Forecast track models remain fairly consistent, with a Florida impact Monday into Tuesday and a potential landfall point in the Big Bend or northern Nature Coast.
Florida Outlook:
.Portions of the Florida Big Bend and northern Florida Peninsula are within the 3 day track cone of error. However, impacts from this system are expected to affect a majority of the state, especially near and east of where the center of the storm travels.
.Tropical Storm Warnings are in effect from Indian Pass to Englewood. This includes the counties of Franklin, Wakulla, Jefferson, Taylor, Dixie, Levy, Citrus, Hernando, Pasco, Pinellas, Hillsborough, Manatee and Sarasota. Tropical Storm Watches have been issued for the East Coast counties of Flagler, St. Johns, Duval and Nassau.
.Current timing suggests bands of thunderstorms could be felt in the Keys and Southwest Florida as early as tonight, spreading north along the Gulf Coast throughout Monday morning and affecting the Florida Peninsula and Panhandle through Tuesday afternoon.
.Rainfall and potential flooding remain the largest threat. Total rain amounts from Sunday to Thursday could reach 3-6" across much of the Florida Peninsula, with isolated higher totals up to 8" possible along the Nature Coast. Flood Watches have been issued for Central and Southwest Florida.
.Severe thunderstorms with damaging winds are possible across North Florida

today as a result of the frontal system, with additional severe weather possible, including isolated tornadoes, on Monday across the Peninsula and eastern Panhandle. SPC has placed these areas in a "marginal" to "slight" threat for severe weather through Tuesday morning.
.The greatest chance for receiving sustained tropical storm force winds will be mainly coastal locations in the warning area. Inland wind warnings are in effect for Franklin, Wakulla, Taylor, Dixie, Levy, Citrus, Hernando, Pasco and Hillsborough Counties.
.In addition, increased wave heights are expected along the Gulf Coast, leading to an elevated risk of rip currents and possible minor coastal flooding and erosion. Increased waves are also expected along the Atlantic Coast on Tuesday with rip currents expected.

598. RE: ***FYI: Tropics Update- T.D. #3 Becomes Tropical Storm Colin***

Yahoo group: naqccfl
Date: 2016-06-06 13:04:37 UTC
From: Stephen W. Szabo
Topic: 597 Message: 598
Attachments: 1 described; binary payloads are missing from this source WARC

Summary:

.At 8am EDT Monday, Tropical Storm Colin was located in the south-central Gulf of Mexico about 278 miles south of Pensacola, or about 315 miles west-southwest of Tampa.

.Maximum sustained winds have increased to 50 mph with higher gusts, and some additional strengthening is possible today before moving inland.

.Colin is moving north-northeast at 14 mph, but a turn to the northeast with an additional increase in forward speed is expected today, with a rapid forward movement predicted on Tuesday.

.Forecast track models remain fairly consistent, with a potential landfall point in the eastern Big Bend or northern Nature Coast.

.Most models, along with the official NHC forecast, predict Colin to remain a weak tropical storm prior to moving across the Florida Peninsula. However, some models have the system getting a little stronger before landfall.

.Tropical-storm-force winds extend outward up to 185 miles mainly to the east of the center.

Florida Outlook:

.However, impacts from this system are expected to affect a majority of the state, especially near and east of where the center of the storm travels.

.Tropical Storm Warnings are in effect from Indian Pass to Englewood on the Gulf Coast and from Sebastian Inlet to Altamaha Sound on the Atlantic Coast. This includes the counties of Franklin, Wakulla, Jefferson, Taylor, Dixie, Levy, Citrus, Hernando, Pasco, Pinellas, Hillsborough, Manatee, Sarasota, Flagler, St. Johns, Duval, Nassau, Volusia, Brevard, Orange, Seminole, Lake, Sumter, Marion, Alachua, Clay, Putnam, Bradford, Union, Baker, Columbia, Suwannee and Lafayette. Wind gusts to 50 or 60 mph are possible in these areas.

.Bands of showers and thunderstorms will continue to stream northward today and affect much of the state. Rain may begin to decrease overnight in the Panhandle and push east off the coast through Tuesday afternoon and evening.

.Rainfall and potential flooding remain the largest threat. Total rain amounts from Sunday to Thursday could reach 3-6" across much of the Florida Peninsula, with isolated higher totals up to 8" possible along the Nature Coast. Flood Watches have been issued for the Florida Big Bend, Northeast Florida, Central Florida and Southwest Florida.

.Severe thunderstorms with damaging winds and isolated tornadoes are possible across the Florida Big Bend and entire Florida Peninsula today. The Storm Prediction Center has placed these areas in a "marginal" to "slight" threat for severe weather through Tuesday morning. A marginal risk for severe weather will continue for the Peninsula on Tuesday.

.In addition, increased wave heights will lead to a high risk of rip currents and minor coastal flooding and erosion as storm surge heights reach up to 4 feet with breaking waves of up to 10 feet. Increased waves are also expected along the Atlantic Coast on Tuesday with rip currents expected.

THE NATIONAL WEATHER SERVICE IN MELBOURNE HAS ISSUED A FLOOD WATCH FOR...

VOLUSIA...INDIAN RIVER... MARTIN... BREVARD... LAKE...OKEECHOBEE... ORANGE...OSCEOLA... SEMINOLE... AND ST. LUCIE THROUGH MONDAY EVENING. SHOWERS AND SQUALLS WILL MOVE NORTHWARD ACROSS EAST CENTRAL FLORIDA ALL DAY MONDAY. PERIODS OF HEAVY RAIN ARE EXPECTED WITH RAIN TOTALS OF 3 TO 5 INCHES POSSIBLE OVER THE WATCH AREA.

NEXT ADVISORY IS SCHEDULED FOR 5:00 PM EDT TODAY; INTERMEDIATE ADVISORIES AND UPDATES MAY BE PROVIDED AS NECESSARY.

599. ***FYI: Tropics Update - Monday evening update on TS Colin***

Yahoo group: naqccfl
Date: 2016-06-06 21:52:11 UTC
From: Stephen W. Szabo
Topic: 599 Message: 599
Attachments: 1 described; binary payloads are missing from this source WARC

Summary:
.At 5pm EDT Monday, Tropical Storm Colin was located in the northeastern Gulf of Mexico about 70 miles southwest of Apalachicola, or about 190 miles west-northwest of Tampa.
.Maximum sustained winds remain near 50 mph with higher gusts, and additional strengthening is unlikely before moving inland. Colin is expected to become post-tropical tomorrow.
.Colin is moving quickly north-northeast at 23 mph, but a turn to the northeast with an additional increase in forward speed is expected tonight and Tuesday.
.Colin is expected to make landfall within the next few hours along the Big Bend Coast and move into southeastern Georgia around midnight, exiting into the Atlantic near Savannah, Georgia, early Tuesday morning.
.Tropical-storm-force winds extend outward up to 230 miles, mainly to the east of the center.

Florida Outlook:
.The strongest winds and heaviest rains are well removed from the center. Thus, impacts from this system are expected to affect a majority of the state, especially near and east of where the center of the storm travels.
.Tropical Storm Warnings are in effect for 34 Florida counties: Franklin, Wakulla, Jefferson, Taylor, Dixie, Levy, Citrus, Hernando, Pasco, Pinellas, Hillsborough, Manatee, Sarasota, Flagler, St. Johns, Duval, Nassau, Volusia, Brevard, Orange, Seminole, Lake, Sumter, Marion, Alachua, Clay, Putnam, Bradford, Union, Baker, Columbia, Gilchrist, Suwannee and Lafayette. Wind gusts to 50 or 60 mph are possible in these areas. Gusts to 50mph have already been reported along the Gulf Coast.
.Rainfall and flooding remain the largest threat. Rainfall amounts of 1-3" have fallen across West Central Florida, Southwest Florida and the Florida Big Bend and eastern Panhandle, with higher amounts to 6-8" already reported in portions of Bay, Wakulla, Leon and Jefferson Counties.
.An additional 3-5" of rain is possible over the next 24 hours and Flood Watches remain in effect for 59 Counties.
.Severe thunderstorms with damaging winds and isolated tornadoes remain possible across the Florida Big Bend and entire Florida Peninsula tonight. The risk for severe weather will continue for the Peninsula on Tuesday.
.Increased wave heights will lead to a high risk of rip currents and minor coastal flooding and erosion as storm surge heights reach up to 4 feet (above normal tide) with breaking waves of up to 10 feet along much of the Gulf Coast, with the highest levels predicted in Apalachee Bay and along the Nature Coast. Increased waves are also expected along the Atlantic Coast on Tuesday with rip currents expected.

601. Tuesday morning update on TS Colin *** FINAL ADVISORY ***

Yahoo group: naqccfl
Date: 2016-06-07 13:15:59 UTC
From: Stephen W. Szabo
Topic: 601 Message: 601
Attachments: 1 described; binary payloads are missing from this source WARC

Summary:

.Shortly after 11 pm EDT Monday, Tropical Storm Colin made landfall along the Florida Big Bend coast near Keaton Beach (Taylor County) with maximum winds near 50mph.

.Colin quickly exited the state and at 5am EDT Tuesday, Tropical Storm Colin was located off the Georgia coast about 40 miles southeast of Savannah, Georgia, or about 90 miles northeast of Jacksonville, Florida.

.Maximum sustained winds remain near 50 mph with higher gusts. Some strengthening is possible today, but Colin is expected to lose its tropical characteristics by tonight as it races into the northern Atlantic Ocean.

Florida Outlook:

.All Tropical Storm Warnings for Florida have been cancelled.

.Lingering tropical moisture will result in elevated rain chances for Central and South Florida for the next few days.

.An additional 1-3" of rain is possible over the next 48 hours and Flood Watches remain in effect for 24 Counties.

.River flooding is not currently anticipated, although many rivers are near bank full.

.The risk for severe weather is low, but thunderstorms with lightning and gusty winds will remain possible today.

.Wave heights along both coasts will subside today, but remain elevated enough to cause a high risk of rip currents along the Gulf Coast and a moderate risk of rip currents along the East Coast.

This will be the last advisory on Tropical Storm Colin. For more information on this system visit the NHC website. For the latest forecast, visit your local National Weather Service homepage.

Subject: K4DEQ to QSY

Hi Steve -

It seems that a touch of dementia has set in for both my wife and me and we have decided to move to the Pacific Northwest. In going through my garage, I find that I have some old equipment that I would sell at a very reasonable price.

— West Mountain Radio RigBlaster Pro
— Kantronics Packet Communicator 3
— Alinco Dataradio DR-1200
— Kenwood TM-231 (2m only) I think the mic connector needs to be rewired — All traps and most other components for a TA-33 tribander. Traps have been stored in my garage and are clean. Boom and other element tubing has been outside — Very nice assortment of high quality parts that were going to make a 6 meter linear amp using a pair of 4CX250B tubes, Included are:
— Power transformer (exact specs unknown)
— Power supply components including 16 400uf 400 volts electrolytic caps along with bleeder resistors mounted on boards
— Very nice 0-500 ma DC panel mount meter
— Brand new high voltage tuning caps for the final tank circuit
— Numerous other related parts including relays, coils etc.

If you can spread the word about this among local clubs, I'd appreciate it. $75 takes it all. Pick up only in Port Orange.

73,
Dave, K4DEQ=

Subject: ARRL Urgently Requests the help of Members in Florida To Support of the Amateur Radio Parity Act

To All Our ARRL Members in Florida –

I am writing to you today because we are at a critical juncture in our efforts to obtain passage of The Amateur Radio Parity Act in the U.S. Senate (S.1685).

Senator Bill Nelson (D-FL), is not yet supporting the legislation despite the recent agreement between ARRL and the Community Associations Institute (CAI). This agreement is supported by all parties to the issue and leaves no visible opposition to the bill. However, Senator Nelson’s support is critical to the success of our efforts.

You are one of well over 40,000 licensed Amateur Radio Operators living in Florida. Many of you already live in deed-restricted communities, and that number grows daily.

If you would like to have the opportunity to have an effective outdoor antenna but are not currently allowed to do so, or you already have outdoor antennas and want to support your fellow hams, then we need you to reach out to Senator Nelson TODAY! Right away.

Please go to this linked website and follow the prompts. The link will provide you with a letter that you can send to Senator Nelson.

https://arrl.rallycongress.net/ctas/contact-senator-nelson-regarding-amateur-radio-parity-act

Thank you.

73,
Rick

Hi folks!

Anyone have a spare or unused manual antenna tuner that Nicole can use? Small manual with SWR/Wattmeter (for 100W radio) is good. Something with a small footprint (not a KW unit!) and not too complicated for a beginner.

Or if you have an auto tuner that's ok too!

Thanks for checking!

Cc: AG1T Gary Roberts <gtroberts@...>
Subject: N3AQC QSL Manager now ready

Hi Guys,

I am very pleased to let all of you know that we have a new QSL Manager for our N3AQC club callsign. He is Gary Roberts, AG1T, and he will be taking care of all of the QSLing for our various N3AQC operations from now on. So if your local chapter wants to signup and use the club call for a special outing all you will need to do is send your log in to Gary and he will take care of any QSL requests that come in. Our QRZ.com <http://qrz.com> page, as well as a couple of other online callsign databases, have been updated to tell people how to request a QSL card. We have also added a new page to our club website with the same information on it (http://www.naqcc.info/n3aqc_info.html).

The instructions for how to format your log and send it in can be found in the attached text file. (Which will be resent each time someone sings up to use N3AQC.) Gary has the ability to work with a variety of log formats. You can contact him if you have any questions. His email address is given in the instructions.

Some of you have previously used N3AQC and we would like you to send in your old logs to Gary on the off chance that QSL requests might still come in for those operations.

Thanks and 73,

Paul - N8XMS

NAQCC President

NAQCC #0675
paul142857@... <mailto:paul142857@...>

P.S. John, K3WWP, I’m assuming that you have kept all of the logs for the different Western PA N3AQC operations, but if any of your other guys have separate logs please pass this information on to them or let me know their names and I will contact them about sending in their logs.

OK you hammin' folks...mark your calendars for the August 23 (Tuesday night) at 8:00 pm....Steve is gonna' be the "Bonus Station" for the SKCC Straight Key Sprint!!!

Go to http://www.skccgroup.com/operating_activities/weekday_sprint/ for details...lotsa' fun!

(And I finished 1st place in July for QRPp... .9W! On a G5RV no less! OK, there were only 3 entries... :))

I will be QRO this month (100W) using my beam for 20M, and the G5RV on 40M and 80M. This is a 2 hour CW "sprint" for the unknowing.

Look for me, I am worth "big points".

72/73 to all!

623. NAQCC-WFL event

Yahoo group: naqccfl
Date: 2016-09-14 17:19:13 UTC
From: lt_wright_flg@...
Topic: 508 Message: 623

This Saturday

NAQCC-WFL September Event Saturday, September 17th at 9 AM - 12 PM

Cypress Point Park
I275/Memorial Parkway
5620 W Cypress St.
west Tampa, FL

Cypress Point Park I275/Memorial Parkway, 5620 W Cypress St. west Tampa, FL
The West Florida chapter of NAQCC will be at Cypress Point Park NW corner of Memorial Parkway and I275 on west coast of Tampa/Old Tampa Bay.

From 0900-1200 hr or when we want to QRT.

Bring you gear, QRP or more with antennas and will need power for I think there is no AC.

624. Important Message about Supporting the Amateur Radio Parity Act

Yahoo group: naqccfl
Date: 2016-09-20 14:11:21 UTC
From: Stephen W. Szabo
Topic: 624 Message: 624

Folks, this takes seconds to do - it is so easy. PLEASE DO IT !!! It helps the hobby.

Thanks!

Steve

We have an opportunity to positively affect Amateur Radio for years to

come. H.R. 1301, the Amateur Radio Parity Act, has unanimously passed

the House of Representatives and moved on to the Senate for

consideration. All you need to do is spend two minutes of your time to

send an email to your two Senators supporting the Bill. By doing so,

you will have helped the future of Amateur Radio by guaranteeing our

ability to have an effective outdoor antenna in a deed-restricted

community.

The number of people living in such communities grows exponentially

each year. Often, a ham homeowner has no choice but to live in a

community restricted by covenants. There are nearly 3/4 of a million

licensed hams in the United States, more than ever before. But that

may change if we are forced to live in a community that refuses to

allow an antenna.

Help yourself and help your fellow hams. Go to this link:

<https://arrl.rallycongress.net/ctas/urge-senate-to-support-amateur-radio-parity-act>
https://arrl.rallycongress.net/ctas/urge-senate-to-support-amateur-radio-parity-act

Enter your zip code and follow the prompts. The letters are there.

All you need to do is fill in the blanks, hit save, then send.

That's it. Under 2 minutes and you're done.

If you haven't yet done so, please do so today. Your voice counts!

625. NAQCC-WFL Oct event

Yahoo group: naqccfl
Date: 2016-10-04 18:37:13 UTC

Topic: 625 Message: 625

NAQCC-WFL
October 15th event

The West Florida chapter of NAQCC will be at:

EAGLE LAKE PARK
1800 Keene Road
Largo, FL 33771

Saturday, Oct 15th

From 0900-1200 hr or when we want to QRT. Bring you gear, QRP or more with antennas and will need power for I think there is no AC.

We will meet up around Shelter 3, see map.

We will be operating on the frequencies CW frequencies
40 m – 7.060 Mhz
30 m – 10.115 Mhz
20 m – 14.060 Mhz
17 m – 18.075 Mhz
15 m – 21.060 Mhz

Bring your rig and antenna, No electric so must have power/battery/etc.

All invited, Ham or not, member or not and work any mode you like, but our primary interest is CW QRP.

626. FW: Hurricane Matthew Update

Yahoo group: naqccfl
Date: 2016-10-05 12:07:38 UTC
From: Stephen W. Szabo
Topic: 626 Message: 626
Attachments: 1 described; binary payloads are missing from this source WARC

All Florida Coastal Counties ARES Groups should be at Activation Level 2 (local). I will most likely invoke a Level 1 (statewide) tomorrow morning. SARNEt will be activated starting tomorrow morning.

Daytona Beach EOC Citizen Call-in-Center (386) 671-5555 will be active today from 0800 to 1800 hours.
The Daytona Beach EOC is on partial activation from 0900 hours until 1800 hours
Sandbags are available at Public Works for residents (10 bags max) again today.

Tropical Summary:
.At 5am EDT, Hurricane Matthew was located 65 miles north northwest of the eastern tip of Cuba, or approximately 480 miles southeast of Miami, Florida.

.Maximum sustained winds are currently 125 mph with higher gusts, making Matthew a Category 3 hurricane on the Saffir-Simpson scale.
.Matthew is moving toward the north near 10 mph. A turn toward the north-northwest is expected later today, followed by a northwest turn tonight. Matthew will be moving through the Bahamas through Thursday, and is expected to be very near the east coast of Florida by Thursday evening.
.It is important not to focus on the center line of the forecast cone. Only small deviation in the forecast track to the left could bring the core of a major hurricane onshore, while a small deviation to the right could keep all of the hurricane-force winds offshore. It will likely take another day or so for the potential impacts of Matthew in the United States to clarify.
.Matthew remains a large storm, with tropical storm force winds extending 160 miles from the center, and hurricane force winds extending 40 miles from the center.
.Tropical Storm Nicole is located 490 miles north northeast of San Juan, Puerto Rico. Nicole is moving to the west-northwest at 6 mph. A turn toward the northwest is expected later today, followed by a turn toward the north by late Thursday. The system poses no threat to Florida.
.Elsewhere, a tropical wave is producing a large area of disorganized showers and thunderstorms several hundred miles east of the Windward Islands. Development, if any, of this system is expected to be slow to occur while the wave moves westward at 10 to 15 mph during the next several days. Regardless of tropical cyclone development, locally heavy rains and gusty winds are possible in the Windward and southern Leeward Islands during the next day or two as the wave moves through the area.
.The system has a 10% (low) chance of development over the next 48 hours, and a 20% (low) chance of development through the next five days.

Florida Outlook:
.Hurricane Warning is in effect for Broward, Palm Beach, Martin, St. Lucie,

Indian River, and Okeechobee Counties, along with Lake Okeechobee.
.Hurricane Watch is in effect for Nassau, Duval, St. Johns, Flagler, Clay, Putnam, Volusia, Brevard, Osceola, Orange, and Seminole Counties.
.Tropical Storm Warning is in effect for Miami-Dade, Monroe, Collier, Hendry, and Glades Counties.
.Tropical Storm Watch is in effect for Lake, Sumter, Polk, Highlands, Marion, Union, Bradford, Baker, and Alachua Counties.
.All of the eastern Florida peninsula is within the 3-day average error cone.
.Regardless of track, Matthew is a very large storm and it has the potential to generate gusty winds and rough seas long the East Coast of Florida, along with minor coastal flooding, beach erosion, and dangerous rip currents.
.Any additional impacts are dependent on future track and size of the storm, which still remain somewhat uncertain at this moment.
.Areas along the east coast of Florida (from Miami to Jacksonville and inland to Orlando) have a greater than 70% chance of seeing tropical storm force winds within the next three days. Areas from Ft. Pierce to West Palm Beach have a 90% or greater chance of seeing tropical storm force winds.
.Tropical storm force winds could arrive Thursday morning across Southeast Florida and spread from south to north across East Central Florida through the day on Thursday, and into Northeast Florida overnight Thursday into Friday morning.
.Hurricane force winds will be just off the coast of Florida, and any westward deviation of the current track will bring those destructive hurricane force winds onshore.
.The current forecast calls for 4-7" of rain near the I-95 corridor with isolated totals of 10" possible, but it is highly dependent on the track of the storm.
.Storm surge values of 1-3' is possible along the Southeast Florida coast, with storm surge heights of 3-5 feet possible from northern Palm Beach County through Nassau County. A few areas could experience higher values depending on the proximity of the core of the hurricane relative to the coast.
.The combination of a dangerous storm surge and the tide will cause normally dry areas near the coast to be flooded by rising waters moving inland from the shoreline. There is a danger of life-threatening inundation during the next 36 hours along the Florida east coast from North Palm Beach to the Sebastian Inlet.
.There is the possibility of life-threatening inundation during the next 48 hours from Sebastian Inlet to the Flagler/Volusia county line.
.Isolated tornadoes are possible Thursday and Friday.
.Tropical Storm Nicole does not pose a threat to Florida.

EVERYONE COUNTS!

Just a quick note - all of the city and county parks are closed (and full of tree debris) from Hurricane Matthew. That, coupled with the horrendous propagation, lends me to suggest canceling this month's adventure. I definitely won't be able to make it as I am still working at the PD/EOC.

What say ye? Please let me know!

Yes we in Florida are on standard, not daylight time, although seems sometimes some here are on no time, hi.
When I make postings with times I give in local along with EST or EDT and also UTC for when on the internet no telling who is listening, hi. Most all know UTC reference.

Earlier this week, I sent our normal announcement about our monthly NAQCC event at Lake Dias. I actually included the DB CERT team and the DBARA Wed P-Ops folks. What I have found out is that many folks I assumed were in the NAQCC-FL Yahoo!Group , evidently, were not – hence, some folks have not been getting mailings (shame on me). For this, I apologize. I would NEVER deliberately leave anyone out, and encourage as many folks that could make it to come out and enjoy the fun.

Starting with this e-mail, I will continue to include all of the addressees that are in the list……if you get more than one message delivery, let me know, and I can try to eliminate the duplicate mailings.

Also, attached is the 2017 proposed “Parkpedition” schedule of dates/locations. (One new park to try – Lake Beresford in DeLand in November). Please let me know if these sites/locations are OK. As always, suggestions, recommendations , comments are always welcome. If I get no response that does not agree with the attachment, I will post this to the web page in a week or so.

72/73,

Steve WB4OMM #5913

Sorry I missed you guys this past Friday. Why? Don't ask! Another senior moment.

BUT, the good news is, Hooton State Park on January 20th. Guess what?
If all goes to plan, maybe (did I emphazise "maybe") I might be 158 miles away in Bradenton (2hr, 58 min drive according to my sources). I just MIGHT leave at 6am and join you guys around 9am. I always carry a lil IC-703, battery pack, and portable antenna with me. Can't promise 'cause things always seem to change at the last minute, but we shall see.

Sorry I missed you guys this morning. I decided to operate right here in Manatee County instead of making the long drive up to the park where you guys were. I set up a 40m Big Stick on top the car and used my IC-703. 5 watts, using a little Bencher Straight Key. I parked on a causeway that links Anna Maria Island with the mainland at Bradenton. I did pretty well making several contacts/states, probably because of the large bodies of water on both sides of the road, and of course the Gulf just behind me. I was following along on QRP Spots on my tablet and saw Steve was on 20m and 30m. I figured we were too close for 20m, and I had no antenna for 30m, so I was hoping y'all would move down to 40m, but guess it didn't happen.
In any case, I'll be here for another week or so, and will be operating a lot from that same location, watching the kite-surfers go by hi hi).

675. NAQCC-WFL event

Yahoo group: naqccfl
Date: 2017-03-22 13:36:05 UTC
From: lt_wright_flg@...
Topic: 508 Message: 675

Our Saturday March 25th NAQCC-WFL chapter location is Anna Marie Island just before the main island on SR64, just past the west side of the bridge. Plan on being on north side, but if cannot find good location might be on south side.

We plan on getting there by 9AM, be there until 1 or so.

I will be on 40 & 20m, 7.060, around 7.026, 14.060 and around 14.026 CW. Any band, freq and mode ok.
Hope to see you members in southern part of Tampa Bay there, but all are invited, member or not, CW op or not, Ham or not.

Will need power/battery and if you have a table good to bring it. I dont think there are any tables.

Look for the antenna poles.

Only 2 days left til long drive down to Anna Maria Island. got lots of interest, some coming from way off. Sounds like we will have very good turn out and some are even bringing their gear, hi. Looks like we will need lots of room.
NAQCC-WFL Anna Maria Island, Saturday March 25th, 9AM-1PM, just after the bridge on SR64.

I will be on 7.026, 7.060, 14.026 and 14.060 QRP 5W CW, but all welcome, any mode, and power level.

73, ron, n9ee/r

CFL QRP will be out same day and times in Sanford, FL at Sylvan lake park.

We'll listen for ya with some NVIS antenna... best bet is 40m, sometimes
30m is OK too.

72,

Kelly K4UPG

Curt,
Yes it is always questionable about propagation and if one has a path on HF to anywhere. You had great sig last month to Tampa area so hope band is good tomorrow morning. I'll be on 14.060 and 14.026 MHz as well as 40m. Looks like we will have a few stations set up.
I hope to have better antenna. Last month just set up my 20m HamSticks, but this month got portable 20 ft flag pole and plan on putting up my 40m Windom. It works great on 40, 20 & 10m.
This is first event we are doing in south WFL, south of Tampa. I'll take some photos and post on the NAQCC-WFL FB page. 73, ron, n9ee/r

It was great we could finally hear you guys up north! You are a good signal, and Bob W2EJG, was the Op at the key. But I yelled "Hi" Curt from the other side of the table! Hi hi hi!
It was a great day we had another record amount of folks come out and play. Excellent weather, wonderful food, rotten propagation conditions, but we all made some Qs, so it was a top shelf day!
Thanks to all of you out there that either operate, look for us, will support us!

I am getting rid of some "stuff" for the widow of a local (Port Orange) ham.

I am going to advertise this "stuff" locally first, before trying other groups, then the internet.

All sales final.

Fluke 77 multi-meter, with probes, external protective guard, instructions, manual, new 9V battery, and original box...new was $200, first $30 takes it.

Works great.

Astron RS-35A 35Amp 12VDC power supply - new at Ham Radio Outlet/Gigaparts/Universal - $179 plus tax/shipping. With original box; first $100/OBO takes it. I won't ship, to heavy!

Heathkit V-6 VTVM with probes, original box, seem to work fine! First $10

Staco VARIAC Variable Autotransformer 1010CT - new in the box!. New..$437..on eBay for $199.00.....first $50/OBO takes it (also won't ship.too heavy).

This is cased, with knockouts for input/output connectors. 0-140 VAC, 3.5 amps.

(Can't find a photo, and it's out in the garage. If interested, tell me, I'll send you a photo.

I have a number of "how to repair ham radio" "troubleshooting" ham radio/electronics books, will photo and list shortly..probably $1 apiece.

Please respond by e-mail, as always, first come, first served!

73!

Yes, always fun to look for you guys Steve, and also the WFL guys on the Gulf. I always try to 'advertise' your Expeditions on Facebook QRP group, and on Twitter, so I'm sure there were others that were looking for you. To be honest, I had concern about finding y'all because of the lousy band conditions lately, so was happy to hear you guys on 2 bands. Yup, noise took out the "W2" but I got the "EJG" part, so then I realized it was Bob I had. We'll gonna have to get him signed up in NAQCC hi hi.
See y'all again next month, but I may be operating froM Tennessee.

I understand the NAQCC-FL has just announced their Florida May Expedition for this Friday May 12th at 9:30am. I thought it was on May 26th, so glad to hear it is this coming Friday instead.
In any case, I'll be there with friends looking for you Florida mosquitoes.

Also don't forget, the NAQCC 2-hiour Sprint is this Wednesday evening 8:30pm (EDT).

Good Day to You! I hope this message finds you enjoying the Greatest Hobby and Service in the World!

Attached is this month's SM Message (a bit long, so left it in an attachment), QST NFL copy, Hurricane related materials.

HURRICANE SEASON STARTS TOMORROW JUNE 1ST!!!! Get Ready!

I have no scheduled visits to Hamfests and "tailgates", club and ARES meetings for this month. I will be participating in the prep and operations of my own local group, DB CERT ART for Field Day - both days this year. The next big trip will be the Milton Hamfest, July 7 and 8. Hope to see you there!

The 2017 ARRL Field Day event, the weekend of June 24-25 - start preparing! I have asked for a State Proclamation form the Governor - I am still waiting on it - I will post/provide as soon as I receive it.

More on Field Day here: http://www.arrl.org/field-day .

Get involved, get active, get happy! Stay safe, get on the air, and have fun!!

I hope to see you at a club meeting/activity soon!

EVERYONE COUNTS!

Topic: 719 Message: 719

Hi all,
An update on our friends.
I visited Art today. He is in great spirits and doing ok. He has not had his surgery yet. He is having open heart bypass surgery in the next few days. Yes, he can have visitors, and emails. He is in room 324 at Florida memorial hospital on Williamson in Daytona. His prognosis is good.

Then I stopped by to see Bob at Brookdale Assisted Living at 550 wilmette in Ormond. He is not doing so well. While he was lucid and talking to me, he is physically fading quickly. He can also have visitors, and I am encouraging all to do it soon, like this weekend if possible. I am that concerned.

As I get more information I will pass it on.

720. Hurricane Irma Status

Yahoo group: naqccfl
Date: 2017-09-04 15:39:24 UTC
From: Stephen Szabo
Topic: 720 Message: 720
Attachments: 2 described; binary payloads are missing from this source WARC

Forwarded message for all to review:

From: Szabo, Stephen
Sent: Monday, September 4, 2017 11:29 AM
Subject: Hurricane Irma Status

Good Morning,

Due to the number of calls I've received yesterday and today, I thought it prudent to send out some information on this storm - although the first actual advisory bulletin will not go out until tomorrow sometime mid-morning.

It is still too early to predict the storm's path past Friday - here is the 11:00 AM EDT info from the State:

Irma Summary:

. At 8am EDT, Hurricane Irma was located about 610 miles east of the Leeward Islands, or about 1900 miles east-southeast of Miami, and was moving west-southwest at 14 mph.

. Maximum sustained winds are near 120 mph, making Irma a category 3 storm on the Saffir-Simpson scale. It is expected to main strength or gradually strengthen over the next couple days due to low wind shear and favorable sea-surface temperatures.

. Irma is expected to turn west later today and then west-northwest tomorrow. Irma will move into the Turks and Caicos and eastern Bahamas on Friday. This weekend, Irma is expected to turn northward as it interacts with a trough across the eastern United States.

. Exactly when the turn northward occurs is still being debated by the models. A later turn would mean more impacts to Florida. However, it could also mean Irma interacts with the mountainous terrain of Cuba and Hispaniola.

. Hurricane hunter aircraft will continue to investigate the system regularly through the week.

Florida Outlook:

. The tropical wave in the southwestern Gulf of Mexico does not pose a direct threat to Florida.

. The tropical wave in the open, tropical Atlantic does not pose a threat to Florida during the next week. This system is likely to remain out to sea but

will be monitored.

. Irma does not pose a direct threat to Florida through Friday.

. Wave heights will begin to increase along the East Coast of Florida Thursday and into the weekend. The rip current risk will also begin to rise. These impacts are a definite, even if Irma remains a couple hundred miles off the coast.

. It is too early to speculate on other impacts from Irma (rainfall amounts, winds, storm surge, etc.). These details will begin to come into line likely within the next 48-72 hours. How close Irma gets to Florida before the turn north remains the key part of this forecast that still needs to be nailed down.

. No part of Florida is currently in the National Hurricane Center's 5-day cone for Hurricane Irma. If the current forecast does not change, parts of South Florida may begin to enter the day 5 portion of the cone late tonight or tomorrow.

As in previous advisories, the widest distribution is requested, including printing and posting these documents for those who do not have internet/e-mail access.

It only takes one storm to change your life and community!

Stay safe!

Have a safe and wonderful Labor Day Holiday!

EVERYONE COUNTS!

721. RE: Hurricane Irma Status And Guidance

Yahoo group: naqccfl
Date: 2017-09-08 02:44:38 UTC
From: Stephen Szabo
Topic: 721 Message: 721
Attachments: 1 described; binary payloads are missing from this source WARC

Good Evening All,

It is obvious Hurricane Irma is going to strike Florida in a bad way. While the exact landfall site remains a "moving target", the SFL Section is going to get hammered, and if it comes up the middle of the state as it appears in the last advisory, both WCF and NFL Sections (East of Tallahassee) are also going to take a huge hit.

I have been buried in e-mails and phone calls. I have also received many requests from charities, hospitals, corporate groups, and countless others for pre-arranged "deployments". Dozens of nets, thanks, prayers and folks looking to "send stuff". Today, I received over 183 e-mails, and another 27 cell phone calls. The following response is what I have been providing to folks as fast as I can get to them:

* Requests for Operators: We are not "pre-deploying" any assets before landfall and the storm passes. Primarily, I am not sending folks into an impending, active hurricane zone as we are a peninsula - the storm comes North, you have to drive South. Seems like common sense, but some folks just don't get it. Additionally, we STILL DON'T KNOW when landfall will be, what areas will receive what level of damage, and who will need the resources. Seems foolish to send resources somewhere they are not needed, and not have any available for desperate, critical needs elsewhere. I am directing organizations to the State EOC to request operators once the storm passes through and we all have some semblance of an idea of where they should go; then have a priority need based, coordinated effort.

* Health and Welfare Messages: Direct folks to their local Red Cross for this service - they will forward to the State EOC and back to our net systems for servicing - later, when the life safety priorities are resolved.

* Offers of Assistance: I appreciate the dozens and dozens and dozens of offers of help - I really do - but will no longer acknowledge them as there are just too many to respond to. Trust me, I am saving the messages and will scream, "Help" when needed! QRX!

What "WE" need to be doing (everyone!) KEEP MONITORING THE STORM - Irma's track has stubbornly moved all over the place since it was first named. Shifts to either coast make HUGE differences to the other coast. Earlier today, I hoped the WCF Section, and the Tallahassee and West Panhandle areas would be safe, and could help support the adjacent NFL and SFL Sections. As of tonight, WCF is on the "hit list", and now Georgia, Alabama, South Carolina are all in the cross-hairs! How quickly things change.

I am planning on invoking the SARNet System under Net Operations starting tomorrow at 12 noon to assist with monitoring traffic & weather conditions,

and provide an alternate to communicate with County EOCs in the State. All of the Interstates were packed today (North and West bound) as was many of the US Highways. People are evacuating (as they should) from South Florida and the coasts, and we probably will see them packed again tomorrow and Saturday.

WORK WITH YOU LOCAL SERVED AGENCIES - PLEASE! Your local community will most likely need your support - if not, "stand-by" as we will send out requests for communications help and assistance through multiple avenues specifying what is needed and where. If that need doesn't arise, VOLUNTEER WITH ONE OF THE RESPONSE ORGANIZATIONS THROUGH VOLUNTEER FLORIDA. https://www.volunteerflorida.org/

Please.....

DO NOT SELF DEPLOY

DO NOT CONTACT/CALL THE STATE EOC

Lastly...I have "heard" from three (yes - 3) ECs since Monday providing me with information on what they are doing. I AM ASKING ALL NFL ECs, ARES Groups, Leadership and Appointees to send me at least a short summary of prep actions, activations, any activities you are doing or involved in for pre-storm preparedness. I'd appreciate it before Saturday night if at all possible.

After the storm passes through the state and leaves us Monday night, if you are able to get a status report to me (e-mail, SARNet, carrier pigeon, yak!) let me know your local conditions and needs. If you can't get it to me, get it to another league official if possible.

Make your plans! Protect yourself, loved ones, and your home. If you are in a designated evacuation zone and you get the order to leave, get out of there! Your safety is paramount. Please stay safe - AND THANK YOU FOR WHAT YOU DO!

EVERYONE COUNTS!

Project path yesterday, Thursday, National Hurricane Center had Irma moving up east coast of Florida. Today at 11 AM NHC is projecting to be moving west of Orlando over to west coast.
When Irma hits Miami is projected to be CAT 4 and by Sunday afternoon down to CAT 1, still deadly.

726. Updated Hurricane Irma Advisory and SitRep Report

Yahoo group: naqccfl
Date: 2017-09-08 23:31:29 UTC
From: Stephen Szabo
Topic: 726 Message: 726
Attachments: 2 described; binary payloads are missing from this source WARC

Good Evening -

Attached is the current Weather Advisory and a Northern Florida Section SitRep as of today. THANK YOU to all that sent in reports. If possible, please send another IF YOUR ACTIVITIES OR STATUS IS DIFFERENT sometime tomorrow so I can sent another SitRep out. None requested on Sunday or Monday...but definitely on Tuesday after the storm passes! And use whatever means is available. I am sure the power and internet will be out.

You should have secured your home and checked your equipment by now! Protect yourself, loved ones, and your home.

If you are in a designated evacuation zone and you get the order to leave, get out of there! Your safety is paramount.

Please stay safe - AND AGAIN, THANK YOU FOR WHAT YOU DO!

EVERYONE COUNTS!

Might add from Hernando Co although not directly with ARES
From our EOC/Ham EmComm service Officer.
Hernando County has decided to open 5 shelters as of 2 PM today, Friday. We will need to provide communications support for these shelters, to and from the EOC. We would like to have 2 operators per shelter. The shelters to open at 2PM are (subject to change):
Challenger K-8 School (special needs shelter)D.S. Parrott Middle School (pet shelter)Nature Coast Technical High SchoolExplorer K-8 SchoolHernando High School
It is my intent to not send operators to the shelters until the sustained winds approach 35 mph. The exact timing for this is still fluid, but it would appear that our operations not be before late Saturday,with the greatest storm threat Sunday and Monday. I will refine this info as time passes.
Depending on conditions, it is possible more shelters could be opened. I need your help.
Please indicate by return email your availability to support this emergency effort.
I am to report to one of the shelters, Explorer K-8 School Sunday morning at 0800 hr and remain til Monday 2000 hr. Might get relief, but if not I will remain there.
From predictions our most difficult time will be from late Sunday afternoon til Monday morning with Iram at CAT 1 or 2.

729. Updated Hurricane Irma - Landfall Tonight and tomorrow

Yahoo group: naqccfl
Date: 2017-09-10 02:37:24 UTC
From: Stephen Szabo
Topic: 729 Message: 729
Attachments: 3 described; binary payloads are missing from this source WARC

Good Evening All,

No SitRep tonight, just got home, have to be back at the EOC at the crack of dawn. Will try to get one out tomorrow if possible. Thanks for all the reports today.

While I was deeply concerned Friday morning, I am now mostly relieved (although that could change..) as it now seems our friends in WCF and SFL are going to slammed, not us on the East Coast so much anymore..and now the NFL Section - Panhandle is now also in the target sights! Whew! This storm is tough!

Keep those unfortunates in your thoughts and prayers. Take care of yourselves and your families. The storm is over the bottom of the state working it's way North tonight.

The State EOC is already getting requests for operators, as soon as the storm clears the State and we get a change to evaluate the impacts, we will send out requests for assistance.

God Bless all of you. Good luck.

Please stay safe - AND AGAIN, THANK YOU FOR WHAT YOU DO!

731. Updated Hurricane Irma Advisory (Daytona Beach Area)

Yahoo group: naqccfl
Date: 2017-09-10 13:56:53 UTC
From: Stephen W. Szabo
Topic: 729 Message: 731
Attachments: 1 described; binary payloads are missing from this source WARC

Storm Wind Fields Arrival Timing: Start of Tropical Storm Winds (39 MPH+) around 3PM today, continuing and increasing to highest sustained wind peak around 7-8AM Monday, decreasing and clearing around 3PM Monday afternoon – HOWEVER, storm “bands” will be earlier and may remain later. Potential wind gusts are estimated around 50-70 MPH, but could be higher. Tornado possibility is higher today than Monday. Rainfall amounts could reach as high as 10-15” with isolated higher totals of 20” possible in the Peninsula over the next 24 hours.

REMEMBER – THIS IS MOTHER NATURE. This storm will do what it wants.
Summary of Information:
• Volusia County is under a mandatory evacuation of the entire beachside peninsula, low-lying (flood prone) areas, and mobile home parks.
• A countywide curfew will be in place beginning at 9 p.m. tonight. Once the storm passes, public safety officials will advise when the curfew will end.
• The bridges will be locked down as conditions deteriorate. Officials anticipate this to be after 9 a.m. today (the threshold is sustained 39 mph winds). An announcement will be sent once this decision has been made.
• Once the storm passes, law enforcement will determine when it is safe to open the bridges. If there is limited access due to damage from the storm, beachside residents will need a photo identification and a utility bill or other document as proof of residency. An announcement will be sent once this dedication is made.
• Daytona Beach EOC and Citizen Call in Center (386-671-5555) are fully activated and will remain activated until further notice.
• The Volusia County EOC and Citizen Information Center are open 24 hours until further notice. (VolCo CIC Number is 866-345-0345).
• Volusia County Shelter list – Volusia County has opened shelters throughout the County today - https://www.volusia.org/services/public-protection/emergency-management/pin/shelters.stml. If planning to stay at a public shelter, go there now! Most shelters are already full, or near capacity.
• Volusia County Public Schools are closed thru Tuesday (re-opening on Wednesday) - check the Volusia County School Board page for updates: http://myvolusiaschools.org/Pages/default.aspx

Storm Summary
Irma
• At 7am EDT Saturday, Hurricane Irma was moving northwest at 8 mph with maximum sustained winds of 130 mph, making Irma a category 4 storm on the Saffir-Simpson hurricane wind scale.
• Irma is expected to maintain strength as it crosses the Florida Straits this morning, but it is now expected to remain a category 4 storm as is approaches Southwest Florida.
• On the current forecast track, Irma is crossing the Lower Keys this morning and will then move along or near the Florida West Coast this afternoon through Monday morning.
• The forecast then brings Irma into the Big Bend of Florida and southwestern Georgia late Monday morning through Monday evening.

• The forecast track again shifted slightly westward in this advisory as Irma has yet to make a north-northwest turn, potentially bringing Irma's center through eastern portions of Leon County around noon on Monday.
• Tropical Storm force winds extend out 220 miles from the center, and hurricane force 80 miles, meaning a large portion of the Peninsula and Big Bend may experience hurricane force winds and much of the state will at least feel tropical storm conditions.

Florida Outlook:
• Nearly all of the Florida Peninsula and Florida Panhandle will feel impacts from this system.
• A Hurricane Warning is now in effect for all Florida counties east of a the Apalachicola River, including Lake Okeechobee and Florida Bay.
• A Storm Surge Warning is now in effect from the Ochlockonee River southward around the Florida Peninsula to North Miami Beach and from Jupiter Inlet to Fernandina Beach, including the Florida Keys and Tampa Bay.
• A Tropical Storm Warning is in effect for Bay, Calhoun, Gulf, Holmes, Jackson, Walton, and Washington counties.
• Rainfall amounts could reach as high as 10-15" with isolated higher totals of 20" possible in the Peninsula. Lesser amounts of 4-9" are expected in the Big Bend and less than that in the Panhandle.
• Flash Flood Watches are in effect for the entire Peninsula and Big Bend.
• Significant river flooding is expected in the coming days in many rivers of Central and Southwest FL.
• Life-threatening storm surge will be impacting the West Coast of Florida today, especially SW FL.
• Isolated tornadoes are possible in the outer bands of Irma and will spread northward tonight and tomorrow. A Tornado Watch is in effect for South Florida, with additional tornado watches possible today for Central and Northeast Florida.

PROTECT YOURSELF. DON'T DEPEND ON "SOMEONE ELSE" FOR YOUR PERSONAL SAFETY!!

Next Advisory will be Sunday, September 10, 2017 at approximately 1800 (6PM) hours EDT (after NOAA/NHC/NWS 0800 EDT updates)

732. NFL, WCF, and SFL Sections Under Level 1 Activation

Yahoo group: naqccfl
Date: 2017-09-11 02:39:04 UTC
From: Stephen W. Szabo
Topic: 729 Message: 732

Folks, if I didn't make it clear, yes, we are at a Level 1 event as described in our NFL Communications Plan. I apologize that I did not specifically state that in my messages over the last two days.

Most of Central Florida (and the northern part of the state) should be clear of the storm by late tomorrow. If you require operators for you areas after you solicit local resources (if available)have your County EM contact the State EOC and request ham operators through the State Constellation Tracking System as soon a possible. We will then prioritize needs and ask for resources to deploy.

Please stay safe - AND AGAIN, THANK YOU FOR WHAT YOU DO!

Good evening all,
Will keep this short as I am home and have no power - but ok with no damage to house.
I hope this message finds you safe.
Please let me know your status (personal and ARES) when you can. If your area, group, served agency needs hams for support communications, have the request sent to the State EOC for a mission ASAP by your county or organization's emergency manager. I have 5 requests for hams that will be verified tomorrow - I will be soliciting volunteers tomorrow via Volunteer Florida for those needs.
Generally, equipment is Dual band HT, spare batteries, mag mount or "accessory" antenna (rather that that rubber duck).
Self sufficient for a specified period of time - they usually provide food/drink, place to sleep/shower. All this will be provided in solicitations.

Again, if you have needs - not wants - get the request in so we can get you help!

Watch for more tomorrow.

736. NFL, WCF, and SFL Section Level 1 Activation CANCELLED

Yahoo group: naqccfl
Date: 2017-09-14 00:38:27 UTC
From: Stephen Szabo
Topic: 736 Message: 736

Good evening to All,

I hope this message finds you safe.

I got power late this afternoon. Whew!

I dropped our full-scale EOC activation here in Daytona Beach, and will close out the EOC by Friday. I am slowly making my way through another 117 e-mails from ham folks regarding the storm as I have time. (yes, 300+ e-mails, I lost count of the calls by Tuesday morning).

The LEVEL 1 STATEWIDE ACTIVATION IS NOW CANCELLED – those areas that still need that status are authorized to invoke protectives measure as they see as necessary and prudent. SARNet is also released from Statewide Activation.

It appears that all of the Section (and other two sections) met the local needs of their communities and did pretty well. They prioritized and made do – signs of intelligent decision making, delegation, and priority assignments. There are currently NO requests for Ham Radio at the State EOC, and none were fulfilled. There were 3 “pre-storm requests”, but all three were not needed….(more on this in a later message…….). It also appears that some folks still haven’t figured it out (meaning local served agencies). Having your UHF Public Safety System go down pre-storm does not speak well of a government entity – and then having your own “ham operator volunteer” solicitation on the local news (evading the State system and our mutual State Comm Plan) just floors me. Thank you, it was not a county in the Northern Florida Section!

You folks did great. So far, no “bad ham” stories or complaints. You did yourselves proud. While a majority of the state is in a “stand down” posture, I am aware that some of you are still out there serving in shelters, EOC, and the like. Please be careful, reach out if you need relief.

Again, Please let me know your status (personal and ARES) when you can. If your area, group, served agency needs hams for support communications, have the request sent to the State EOC for a mission ASAP by your county or organization's emergency manager. Earlier today, I requested the ARRL send out a request for operators for a probable deployment to the Florida Keys. They were devastated down there and have a need for support. - Volunteers need to register through Volunteer Florida.

The same solicitation follows this e-mail message – Bert, please post – the rest of you, feel free to distribute as widely as you can, post to web pages, newsletters, reflectors, etc.

I will be soliciting for an after-action report with suggestions and observations in the next few weeks – don’t send it now, it’ll get lost in the mountain of stuff I’m wading through!! Wait for the solicitation.

Again, if you have needs - not wants - get the request into the State so we can get you help!

73, Thank you for your efforts!!!!

Stephen W. Szabo WB4OMM

NFL Section Manager

.

737. Hurricane Irma Ham Operator Volunteer Solicitation

Yahoo group: naqccfl
Date: 2017-09-14 00:41:58 UTC
From: Stephen Szabo
Topic: 737 Message: 737

There is a potential need for Amateur Radio operators to provide communications support in the Florida Keys. Volunteers will need to bring a dual-band HT with earphone/headset, external (gain) antenna, spare batteries, chargers. While food & beverage, sleeping quarters and showers are available, responders need to be self-sufficient for other personal needs. Deployment requests will vary as will the served agencies. DO NOT SELF-DEPLOY. These missions will be filled through the State of Florida EOC, ESF2 liaison.

Hams interested will need to register at https://www.volunteerflorida.org/irma/ . Select the “Casework/Recovery” option under the type of work on Step 1, and under “Step 3”, “Volunteer Skills”, select “Amateur Radio”. Once requests are made to the State, you will be notified of the mission and can accept or decline the assignment. THESE ARE VOLUNTEER ASSIGNMENTS. Non-compensated. You may be required to pass a background check.

Steve Szabo WB4OMM

NFL Section Manager – ESF2 State Liaison

738. Hurricane Irma Cancelled Parkpediton

Yahoo group: naqccfl
Date: 2017-09-15 00:13:52 UTC
From: Stephen Szabo
Topic: 738 Message: 738

I apologize, I meant to send this out earlier.

The NAQCC-FL Parkpediton for tomorrow is canceled due to Hurricane Irma. It will not be re-scheduled.

Our next scheduled event is Friday, October 20th, 2017.

72/73!

Steve WB4OMM

739. RE: Temporarily out of service

Bob,
I am glad your safe and getting somewhat settled. Stay in touch and let us know how you progress.
As of last night, WB4OMM is QRT for a while. My tower fell, destroying $2K of antennas. Not sure about the tower base. Retaining bolts on bottom legs were bent from storm. No damage to anything else or me! (I was there when it dropped - luckily into an adjacent tree which slowed the fall). About 6 hours of disassembly. Oh well.....will be re-stringing the G5RV in a few days to at least get me on the air.
73 to All,
Steve WB4OMM

Hi Steve,
Very sorry to hear about your tower coming down and all of the damage.
Hope you're able to at least get a wire back up so you can re-join the quiet, empty bands.
Really, if you had to pick a time, ...

Greetings North Florida Hams! Welcome to the GREATEST HOBBY IN THE WORLD!

Hi Folks,

The obvious topics of interest are Hurricanes Irma and Maria. Please keep those folks Puerto Rico in your thoughts and prayers. That could have been us. Stay aware and prepared. Have a plan!!!

As I have time to "recover", I will go through the hundreds of messages, e-mails, reports, and try to come up with a composite of Hurricane Irma with necessary changes in our plans if necessary. I will get this out to all as soon as I can.

I will be meeting with the WCF and SFL Section Managers and ARRL HQ Staff at the Melbourne Hamfest in two weeks (October 13 and 14). Hope you can attend this great event and support our folks in SFL!

Lotsa' contests in the immediate future..and while propagation is not great, the contests are! Look here for a schedule of contests and activities: http://www.hornucopia.com/contestcal/contestcal.html.

Also the Simulated Emergency Test is next week, Saturday and Sunday, October 7 and 8, more info is here: http://www.arrl.org/news/get-with-the-set-arrl-simulated-emergency-test-set-fall-classic-just-ahead . My guidance for the SET? LOCAL!!!! Work with your local partners, shore up, strengthen, or initiate relationships with our served agencies. RESTOCK, REPLENISH, REVIEW! With Irma gone, you may have used items that are stored for use - and now is a good time to replace those items used, and maintain your equipment! Yes, now is great time to get that generator serviced, buy water and fresh batteries, make arrangements for you and your family should another storm/event appear. Don't wait until there is a CAT 5 hurricane in the Atlantic Basin to go do that stuff!

Check out our fabulous NFL Section Web Page and read our spectacular Newsletter (October issue - attached just in case) QST NFL. http://arrl-nfl.org/ .

I don't have any planned visits for this month, but then again, who knows, I may just show up somewhere!

Keep vigilant on the weather and Happy Halloween!

Get involved, get active, get happy! Stay safe, get on the air, and have fun!!

Please stay safe - AND AGAIN, THANK YOU FOR WHAT YOU DO!

EVERYONE COUNTS!

Hi Folks,

Good Morning!

Tropical Storm Nate is in the Gulf. This is the initial advisory. Next Advisory tomorrow morning at 0900 unless there is a change of significance that impacts Volusia County/Daytona Beach.

Storm Summary:

.At 8 AM EDT Thursday, Tropical Depression 16 was upgraded to Tropical Storm Nate with maximum winds near 40mph.

.T.S. Nate is located just off the coast of Nicaragua, or about 1,125 south of Tallahassee, Florida.

.Nate is moving northwest at 8mph, and this motion is expected to continue this morning.

.A north-northwestward motion at a faster forward speed is forecast to begin later today and continue through Friday night, with the center emerging over the southern Gulf of Mexico on Saturday.

.Confidence in the eventual track and intensity are still currently low, with the range of possibilities for landfall anywhere between south-central Louisiana and the Florida Panhandle.

.Nate is expected to gradually strengthen and become a hurricane in the Gulf of Mexico.

.Elsewhere, a non-tropical low pressure disturbance located over the Florida Straits will continue to increase rain chances across South Florida as it moves west.

.Although development of this system is not expected, it will likely produce heavy rain and gusty winds over portions of Florida during the next day or so.

Florida Outlook:

.Rainfall amounts of 1-3" (with isolated amounts up to 5" possible) is forecast for portions of the Florida East Coast and Florida Keys during the next 48 hours.

.A Flood Watch is currently in effect for all coastal counties between and including Brevard and Miami-Dade counties.

.Strong east winds combined with the lunar "King Tide" could have the potential to produce high waves and minor coastal flooding during high tide. Any locally heavy rainfall during times of high tide could exacerbate coastal flooding issues.

.A Coastal Flood Advisory is in effect from Miami-Dade to Volusia County, with a Coastal Flood Warning in effect for the St. Johns River and tributaries.

.It is too early to specify the timing, location, or magnitude of impacts to Florida from Nate, but forecasts should be closely monitored.

.However, a system moving towards the U.S. Gulf Coast would have the ability to produce storm surge, dangerous surf conditions, isolated tornadoes, gusty winds, and heavy rain.

Get involved, get active! Stay safe, get on the air!!

Please stay safe - AND AGAIN, THANK YOU FOR WHAT YOU DO!

EVERYONE COUNTS!

746. TS Nate Update - Final

Yahoo group: naqccfl
Date: 2017-10-06 17:48:35 UTC
From: Stephen Szabo
Topic: 746 Message: 746
Attachments: 1 described; binary payloads are missing from this source WARC

Summary:

.At 5 AM EDT Friday, Tropical Storm Nate was located over the northwestern Caribbean Sea, or about 895 miles south of Apalachicola, Florida.

.Nate is now moving north-northwest near 14mph, and this motion is expected to continue during the next couple of days with a further increase in forward speed.

.The center of Nate is forecast to emerge into the southern Gulf of Mexico early Saturday morning and make landfall along the U.S. Gulf Coast early Sunday morning.

.Maximum sustained winds are currently near 45mph and Nate is expected to gradually strengthen, becoming a hurricane in the Gulf of Mexico before landfall.

.Computer models are in good agreement on track and confidence is high on a landfall between New Orleans and Pensacola, but models are in some disagreement on strength.

.Elsewhere, an area of low pressure is forecast to form over the northeastern Atlantic and could acquire some subtropical or tropical characteristics early next week while it remains nearly stationary.

Florida Outlook:

.The western Florida Panhandle is now within the 3 day cone of error, and the chances for tropical storm force winds have increase to 30-50% for much the western Florida Panhandle and 10-30% for the eastern Panhandle and Big Bend, which could arrive in gusts in the outer bands of Nate as early as Saturday afternoon.

.A Tropical Storm Watch has been issued for Escambia, Santa Rosa and Okaloosa Counties.

.There are no storm surge watches for Florida as surge values are expected to be below 2.5'. However, breaking waves of 6-10' could cause minor coastal flooding and erosion.

.Rainfall amounts of 1-3" (with isolated amounts up to 4-6" possible) is forecast for portions of the Florida Panhandle on Saturday and Sunday.

.Isolated tornadoes will also be possible Saturday and Sunday in the Panhandle.

.Breezy winds and increasing ocean swells will continue a high risk of rip currents along the entire Panhandle coast through this weekend.

.Breezy east winds combined with the lunar "King Tide" will continue to produce minor coastal flooding during high tide along the Florida East Coast. A Coastal Flood Advisory is in effect from Miami-Dade to Volusia County, with a Coastal Flood Warning in effect for the St. Johns River and tributaries through Saturday.

No further advisories will go out on this storm....but those in the Panhandle, West Panhandle need to closely watch this storm!!!!

Get involved, get active! Stay safe, get on the air!!

Please stay safe - AND AGAIN, THANK YOU FOR WHAT YOU DO!

pr

Subject: Auxcomm Course in Wetumpka, AL

Phil & Bob,

Alabama is holding a Auxcomm Course in Wetumpka, AL October 28th and 29th. They are opening the course to Florida and Georgia for any students who wish to attend, and are looking for 3-5 students to participate.

Can you please pass this along to the ARES & AUXCOMM Communities to let them know of the opportunity?

Only catch, is this is time sensitive, and needs to be sent today, with a deadline of Friday to sign up to participate. Students would of course need their ICS100b, 200b, 700a, 800b along with Amateur license to participate. Class info and registration POC is below:

October 28-29 (0800-1800hrs, daily)

Elmore County EMA

Wetumpka, AL 36092

Contact: Sheldon Hucherson of Alabama Emergency Management

205-280-2293

Subject: October 2017 NFL SM Message

Greetings North Florida Hams! Welcome to the GREATEST HOBBY IN THE WORLD!

Hi Folks,

The obvious topics of interest are Hurricanes Irma and Maria. Please keep those folks Puerto Rico in your thoughts and prayers. That could have been us. Stay aware and prepared. Have a plan!!!

As I have time to "recover", I will go through the hundreds of messages, e-mails, reports, and try to come up with a composite of Hurricane Irma with necessary changes in our plans if necessary. I will get this out to all as soon as I can.

I will be meeting with the WCF and SFL Section Managers and ARRL HQ Staff at the Melbourne Hamfest in two weeks (October 13 and 14). Hope you can attend this great event and support our folks in SFL!

Lotsa' contests in the immediate future..and while propagation is not great, the contests are! Look here for a schedule of contests and activities: http://www.hornucopia.com/contestcal/contestcal.html.

Also the Simulated Emergency Test is next week, Saturday and Sunday, October 7 and 8, more info is here:
http://www.arrl.org/news/get-with-the-set-arrl-simulated-emergency-test-set-fall-classic-just-ahead . My guidance for the SET? LOCAL!!!! Work with your local partners, shore up, strengthen, or initiate relationships with

our served agencies. RESTOCK, REPLENISH, REVIEW! With Irma gone, you may have used items that are stored for use - and now is a good time to replace those items used, and maintain your equipment! Yes, now is great time to get that generator serviced, buy water and fresh batteries, make arrangements for you and your family should another storm/event appear. Don't wait until there is a CAT 5 hurricane in the Atlantic Basin to go do that stuff!

Check out our fabulous NFL Section Web Page and read our spectacular Newsletter (October issue - attached just in case) QST NFL. http://arrl-nfl.org/ .

I don't have any planned visits for this month, but then again, who knows, I may just show up somewhere!

Keep vigilant on the weather and Happy Halloween!

Get involved, get active, get happy! Stay safe, get on the air, and have fun!!

Please stay safe - AND AGAIN, THANK YOU FOR WHAT YOU DO!

EVERYONE COUNTS!

Hiya Curt!

Yeah, 20M was the place to be…….deep QSB but signals were OK. We made some on the other bands, but not all that many.

Thanks for being there for us!

Hi Folks,

Attached is the “draft” of the NAQCC Report.

Phil NW4X – I need your QSO information please!

John KM4JTE – I need your QSO information and equipment list please!!

Did anyone else make any QSOs??

I will send the completed QSL card .jpg “photo file” to each operator with the QSLs ready to print via e-mail.

Please review the document and tell me if there are errors or heaven forbid, omissions. I don’t want to leave anyone/thing out!

I NEED THIS INFO QUICKLY PLEASE!

Thanks!

Steve WB4OMM

nice job Steve with the write up and photos.

I noticed 2 corrections: Phil's call is listed as KW4X in one place instead of NW4X. And, John's (KM4JTE) rig is a KX-2, not a KX-3 if I remember right...

Good Morning All!

We have a VE Test session at the PD tomorrow afternoon at 1pm...I only have two VE's (myself and Kevin KK4BFN)...I need a third! (a 4th would be even better!)

Winn can't make it, Bob L. is a SK....can anyone help me out?? (Only need to be there at 1pm, until testing is over - I have 5-10 folks testing for a Tech license).

Only work involved is checking the tests - Kevin an I have the remaining paperwork taken care of.

Please let me know if you can help out ASAP!!!

Thanks!

759. Initial Advisory Tropical Storm Phillipe 1/5A

Yahoo group: naqccfl
Date: 2017-10-29 00:53:47 UTC
From: Stephen Szabo
Topic: 759 Message: 759
Attachments: 1 described; binary payloads are missing from this source WARC

Yes, yet another weather event in our neighborhood.....

Summary:

* Potential Tropical Cyclone 18 became Tropical Depression 18 at 11am EDT when aircraft reconnaissance found a well-defined center of circulation. It is now Tropical Storm Philippe, the 16th named storm of the 2017 Atlantic hurricane season.
* At 5pm EDT, Philippe was located about 20 miles southwest of Havana, Cuba, or about 120 miles south-southwest of Key West, and was moving north at 29 mph. Maximum sustained winds are near 40 mph with higher gusts.
* Philippe is expected to strengthen some over the next 48 hours while turning northeast tonight and accelerating to the northeast on Sunday.
* On the NHC forecast track, Philippe would move into the Florida Straits this evening, across the Keys or the southern tip of the Florida Peninsula overnight, and across the northwestern Bahamas tomorrow morning.

Florida Outlook:

* A Flood Watch is in effect for Broward, Collier, Indian River, Mainland Monroe, Martin, Miami-Dade, Okeechobee, Palm Beach, and St. Lucie counties.
* Storm total rainfall across the Keys and much of South Florida will generally be 2-4" with locally higher amounts of 6" possible. These amounts could cause some localized minor nuisance flooding, especially in urban and low-lying areas. Expect any lingering showers to clear the Peninsula by late Sunday morning.
* Stronger thunderstorms could produce a couple brief, isolated tornadoes and damaging winds in Southeast Florida and the Keys this evening.
* A Tropical Storm Watch is in effect from Craig Key to Golden Beach. Tropical storm force winds, primarily in gusts from brief, heavy squalls, are possible overnight in the watch areas.
* The strongest winds are expected to remain east and southeast of Philippe's center.
* On Sunday, in the wake of the cold front, winds of 20-25 mph, with gusts up to 30 mph, are expected in the Keys. Gusts between 20-25 mph are possible in the Peninsula.

Next advisory, if warranted, will be sent out mid-day Sunday, October 29, 2017.

Get involved, get active! Stay safe, get on the air!!

Please stay safe - AND AGAIN, THANK YOU FOR WHAT YOU DO!

EVERYONE COUNTS!

Hi Folks,

Short and sweet this month!

I am looking for a new Section Emergency Coordinator - our good man Strait KT4YA, has worked quietly in the background and understandably wants to spend more time with family..he has resigned as of this month. The job description is at: http://www.arrl.org/section-emergency-coordinator . If you are interested, please let me know.

Lotsa' contests in the immediate future..and while propagation is not great, the contests are! Look here for a schedule of contests and activities: http://www.hornucopia.com/contestcal/contestcal.html.

Check out our fabulous NFL Section Web Page; and read our spectacular Newsletter (November issue is attached) QST NFL. http://arrl-nfl.org/ .

I have no travel plans for the month - but will be at several outings the first weekend of December.

Keep vigilant on the weather and Happy Halloween!

My sincere wishes for a safe and Happy Thanksgiving Holiday to each of you.

EVERYONE COUNTS!

Hi Folks,

Greetings this holiday month!

Last month I got to visit with the Lake Amateur Radio Association (LARA) at their annual tailgate in Tavares...it was fun. Even I bought something! If you are in the area next year, make it a point to stop by! Support your local club functions! In a few days I will be at the Silver Springs (Ocala) Hamfest and the Orlando Holiday Banquet. I have invitations to many holiday extravaganzas and will make as many as I can!

I have found a new Section Emergency Coordinator - and most likely some assistants (maybe 2??). More on this in to come in the new year...

On an important note - it's taken me much introspection and many discussions with some folks over the last few months..but I have decided I am not running for re-election for the next term (July 1, 2018 - June 30, 2020). After serving the last 5 years (1 year as SEC, and almost 4 years as SM), I feel it's time for some fresh perspectives and renewed energy. While I am proud to reflect back on the many positive changes and initiatives that I helped foster, I hope someone will step up to continue the service to the NFL Section and community. I would also hope the new SM would welcome our excellent Newsletter Editor and Webmaster!! (Along with many other excellent appointed folks who work diligently and quietly in the background). With the many events that have impacted our Section in the last few years, everyone should be proud of what we experienced and accomplished. We all showed, "We Count!".

Check out our fabulous NFL Section Web Page and read our spectacular Newsletter (December Issue) QST NFL. http://arrl-nfl.org/

As always, my best wishes to each of you and your families for a safe and wonderful Holiday Season, no matter what you celebrate. Remember those not so fortunate.

EVERYONE COUNTS!

768. End of Hurricane Season

Yahoo group: naqccfl
Date: 2017-11-30 13:54:53 UTC
From: Stephen Szabo
Topic: 768 Message: 768
Attachments: 1 described; binary payloads are missing from this source WARC

Effective at midnight tonight, the 2017 Hurricane Season officially concludes. And what a season it has been!

The 2017 Atlantic hurricane season has been a hyperactive and extremely destructive season, featuring 17 named storms, tying it with 1936 as the fifth-most active season since records began in 1851, and the most since 2012. The season also features both the highest total accumulated cyclone energy (ACE) and the highest number of major hurricanes since the 2005 season. All ten of the season's hurricanes occurred in a row, the greatest number of consecutive hurricanes in the satellite era. In addition, it is by far the costliest season on record, with a preliminary total of over $368.66 billion (USD) in damages, which is more than double the cost of 2005□s total, and nearly all of which was due to three of the season's major hurricanes □ Harvey, Irma, and Maria. This season is also one of only six years on record to feature multiple Category 5 hurricanes. Irma's landfalls on multiple Caribbean islands and Maria's landfall on Dominica made 2017 the second season on record (after 2007) to feature two hurricanes making landfall at Category 5 intensity. In addition, Irma was the strongest hurricane ever recorded to form in the Atlantic Ocean outside of the Gulf of Mexico and Caribbean Sea. Most of the tropical cyclones impacted land but some remained over water without impacting land, including a tropical depression, Tropical Storms Arlene, Don, and Rina, and Hurricanes Gert and Lee. This season is the only season on record in which three hurricanes each had an ACE of over 40: Irma, Jose, and Maria.

The season officially began on June 1 and will end today. These dates historically describe the period of year when most tropical cyclones form in the Atlantic basin and are adopted by convention. However, as shown by Tropical Storm Arlene in April, the formation of tropical cyclones is possible at other times of the year. In addition, Arlene was among one of the northernmost pre-season storms on record. In mid-June, Tropical Storm Bret struck the island of Trinidad, which is only rarely struck by tropical cyclones due to its low latitude. A few days later, Tropical Storm Cindy struck the state of Louisiana. In late August, Hurricane Harvey became the first major hurricane to make landfall in the United States since Wilma in 2005, while also setting the record for the costliest tropical cyclone on record, as well as the most rainfall dropped by a tropical cyclone in the US. In early September, Hurricane Irma, a Cape Verde-type hurricane, became the first Category 5 hurricane to impact the northern Leeward Islands on record, later making landfall in the Florida Keys as a large Category 4. In terms of maximum sustained winds, Irma is tied with the 1935 Labor Day hurricane as the strongest hurricane ever to make landfall in the Atlantic basin. In late September, Hurricane Maria became the first Category 5 hurricane to strike the island of Dominica on record. It later made landfall

in Puerto Rico as a high-end Category 4. The season also featured the fastest-moving tropical cyclone ever recorded in the Gulf of Mexico (Hurricane Nate). In mid-October, Hurricane Ophelia became the easternmost major hurricane in the Atlantic basin on record, and later impacted most of Northern Europe as an extratropical cyclone.

Initial predictions for the season anticipated that an El Niño would develop, lowering storm activity. However, the predicted El Niño failed to develop, with cool-neutral conditions developing instead, later progressing to a La Niña □ the second one in a row. This led to forecasters upgrading their predicted totals, with some later anticipating that the season could be the most active since 2010.

As always we should remain vigilant and prepared as a weather induced emergency can happen regardless of an "officially declared season"....as history has shown us this past year (Arlene).

Thanks for all of your preparedness efforts. My best wishes for a safe and happy holiday season. Stay safe!

The Daytona Beach City EOC is now inactive/monitoring status (HURCON 1, Level 3)

EVERYONE COUNTS!

GA Steve,

Nice rotation but surprised you want to go back to Beresford Park.

And why cancel in the summer because of a little heat.

Just drive a bit north. It's nice in PA that time of year.

Hiya Don!

Ha ha ha....yeah, but from I'm seeing these last few years in your neck of the woods, it's cooler down here!!

I was OK with Beresford...have another suggestion? I'm all about the adventure!!!! Still looking for new sites.

Steve

1. Shipping update <http://www.qrp-labs.com/qcx> <http://www.qrp-labs.com/qcx> <http://www.qrp-labs.com/qcx>

At the time of wiring, the QCX CW transceiver kits <http://www.qrp-labs.com/qcx> on order have reached serial number 2,821. Of these, 2,191 have been shipped already and 630 are pending shipment. The QRP Labs shipment office continues to be some way behind, with this large backlog of orders. But the backlog has been significantly decreased compared to last month. Much of this was due to additional helpers since 1st December. By the end of December they will have shipped 709 orders, significantly reducing the backlog. This is a tactical solution to the backlog and we are working on finding a strategic solution so that we can scale more easily to meet periods of high demand, in future.

If you are waiting for a QCX <http://www.qrp-labs.com/qcx> shipment, you can find out which serial number the shipment office will ship next, on the QCX CW transceiver kit <http://www.qrp-labs.com/qcx> page http://qrp-labs.com/qcx.html <http://www.qrp-labs.com/qcx.html> . All updates about the QCX <http://www.qrp-labs.com/> will be on this page.

Other QRP Labs shipments are also delayed. If you are concerned or have any particular requirements or questions please contact us <http://www.qrp-labs.com/contact.html> .

Currently 40m and 20m LPF components have run out; more supplies are on the way and shipping of orders containing those kits (including QCX orders) should resume in the next week or so.

<http://www.qrp-labs.com/qcx.html> <http://www.qrp-labs.com/qcx.html>
<http://www.qrp-labs.com/qcx.html> <http://www.qrp-labs.com/qcx.html>
<http://www.qrp-labs.com/qcx.html>

2. QCX CW transceiver articles in January RadCom and January CQ DL editions!

A 4-page technical article about the QCX design by Hans G0UPL appears in the January edition of the RSGB's RadCom monthly journal (right).

The January edition of DARC's CQ DL magazine contains a nice review of the QCX by Hajo DL1SDZ. The front cover of CQ DL is a picture of the QRP Labs junior lab technician testing the QCX (20m version)! See far-right.

---

3. First QCX to QCX QSO,Jerry KI4IO and Donald K3RLL!

This may not really be the first QCX to QCX QSO - but this is the first that has been reported, so it claims the title! Jerry KI4IO writes:

"Amazingly enough, I had never QSO'd anybody that was using a QCX and my 1st QSO after powering mine up was with K3RLL o/a 7040kHz at 0353Z on 17 Dec 2017. Log says "599" both directions (hmmmm). Log notes indicate that QSB killed us after a few go-arounds.

"Interesting little radio and maybe one of the best receivers I've ever used. Quiet & sensitive. I was curious what '50dB opposite side-band rejection' sounded like and found one bruising signal that must have been at least 40dB over S9. There was a barely discernible trace of signal on his OSB. I've built one phasing rig (Rick Campbell's IQ Crystal Set) that used the venerable 2Q4 and the OSB rejection of that radio was probably a little North of 30 dB. Hah".

Congratulations to Jerry KI4IO and Donald K3RLL!

---

4. Canadian C3 expedition: continuing as VE0EXP

As reported last month <http://www.qrp-labs.com/newsnov2017.html> , the Canadian C3 expedition is now officially complete. QRP Labs was proud to sponsor the Canadian C3 Coast-to-Coast-to-Coast expedition <https://canadac3.ca/en/homepage/> celebrating Canada's 150th birthday, by providing an Ultimate3S kit <http://www.qrp-labs.com/ultimate3/u3s> and accessories (QLG1 GPS receiver kit <http://www.qrp-labs.com/qlg> , relay switched filter board, 20/30/40m Low Pass Filter kits <http://www.qrp-labs.com/lpfkit> , and enclosure kit <http://www.qrp-labs.com/u3box>). The radio was installed by a team led by Barrie VE3BSB.

The Polar Prince has been granted permission to continue operating the Ultimate3S <http://www.qrp-labs.com/ultimate3/u3s> using the callsign VE0EXP, while the ship returns to Canada's East Coast via the Panama canal. The callsign change was undertaken by Michael VE7XMC. Read more on the RAC website:
http://wp.rac.ca/update-on-canada-c3-and-rac150-awards/

Note: the Ultmate3S <http://www.qrp-labs.com/ultimate3/u3s> onboard Polar Prince transmits in Extended WSPR mode (with 6-character Maidenhead locator) 24 hours a day autonomously, on 40, 30 and 20m. QRP Labs provides a tracking solution that populates a live map at http://qrp-labs.com/c3 <http://www.qrp-labs.com/c3> - Jeff VE3EFF has provided a computer

and stable internet connection to run the tracking.

The map below shows the tracked path of the entire expedition.

<http://www.qrp-labs.com/c3>

-----

5. Balloon flights update

U3B-12: David VE3KCL launched the 12th QRP Labs U3B test flight on 03-Dec-2017. It had a good flight, as far as Kazakhstan; radio coverage in this area is sparse and it is normal to lose contact for a day or two. But this time (as on some previous occasions), U3B-12 never re-appeared. It probably went down in Kazakhstan or China. More details: http://qrp-labs.com/flights/u3b12.html <http://www.qrp-labs.com/flights/u3b12.html> ; flight path below, TOP LEFT.

Stella9: Dan DL6OW's Stella9 flight was postponed several times due to bad weather, finally launching on Saturday 16-Dec-2017. This was a Latex balloon, high altitude flight. This style of balloon ascends to a very high altitude, then bursts, and returns to Earth with a parachute to slow it down. It is a different type of flight to the mylar "floater" balloons, which reach a stable altitude and can endure very long duration flights.

Due to a manual error on my part, the tracking spreadsheet wasn't running during the flight. I will be able to reconstruct the flight profile reported by the Ultimate3S <http://www.qrp-labs.com/ultimate3/u3s> transmitter from the WSPRnet data downloads, when I have time. Dan DL6OW reports:

"The balloon was flown very fast deep into eastern Germany. We traveled behind and the car got smashed on a snowy and icy trail, but no one was injured. We slept in an hunting house. The hunter, a girl was very nice and was going with us to find the balloon in the forest the next morning. Also she organized someone to get the car on the road again.
We found the probe hanging at 25m high in a pine tree.
Later, we traveled very slowly back home through winter wonderland.
Everything is fine now, and the car only has some minor scratches.
The girl will go every two or three days to the landing site from now on, to look if the wind will bring the probe down.
So we will look positively forward to get the recorded images from the stratosphere.
This time an prototype of an APRS ballontracker from Taner Schenker DB1NTO was onboard and it’s still transmitting now".

See some photos from Dan's adventure below; more will later be on the Stella9 flight page http://qrp-labs.com/flights/stella9.html <http://www.qrp-labs.com/flights/stella9.html> .

BB01: Bob ZL1RS launched his first balloon flight on 09-Dec-2017. Despite this being Bob's first flight, he is not new to ballooning! Bob has probably one of the nicest listening locations in the world, with a high elevation sloping down to the sea and no close-by neighbours. He has enough space to use low-noise beverage antennas which he can aim (manually by moving the wire) in the direction of interest. Bob has previously tracked Andy VK3YT's flights <http://picospace.net> and also reported spots of Dave VE3KCL's flights, even when on the opposite side of the world with less than 20mW RF! So it's great to see Bob launching balloons now! BB01 uses a modified QRP Labs Ultimate3S <http://www.qrp-labs.com/ultimate3/u3s> firmware version transmitting special WSPR telemetry messages, the same as Dave VE3KCL and Jim N2NXZ's flights. It flew East over the

Pacific for 5 days; you can read more information about the flight payload etc. here http://www.qrp-labs.com/flights/bb01.html.

Bob's second flight, BB01, was launched on 17-Dec-2017. At time of writing it has been flying 5 days and is well on the way towards South America in clear skies, at an altitude of around 9,500m. Pictures of the launch and other information are at http://www.qrp-labs.com/flights/bb02.html

<http://www.qrp-labs.com/flights/bb01.html> <http://www.qrp-labs.com/flights/bb02.html>

---

6. Season's greetings to all QRP Labbers everywhere!

A very Merry Christmas and Happy New Year, happy holidays, etc. to all QRP Labbers wherever you are in the world! QRP Labs had a very busy 2017. Thank you all for your support and encouragement. More exciting developments are in the pipeline, so hopefully 2018 will be an interesting and busy year also.

See you in 2018!

---

7. Social media, feedback, unsubscribing

Social media: QRP Labs has the following presence on social media. If you use these social media then please join or follow QRP Labs! Announcements such as new products, balloon launches, etc., will be made first in these media!

1) QRP Labs groups.io discussion group https://groups.io/g/QRPLabs for discussion and support on all QRP Labs products
2) QRP Labs Facebook page https://www.facebook.com/QRPlabs/
3) QRP Labs is @qrplabs on Twitter https://twitter.com/qrplabs
4) QRP Labs on YouTube https://www.youtube.com/c/QRPLabs

Feedback: As always, please do write <http://www.qrp-labs.com/contact.html> with any comments, ideas, criticism, feedback of any kind!

Unsubscribing: If you want to unsubscribe from this monthly newsletter, then either log in to your QRP Labs shop account <http://shop.qrp-labs.com> and un-check your newsletter preference, OR, email <http://www.qrp-labs.com/contact.html> and we'll take care of it.

784. NAQCC-FL Revised Parkpedition Schedule

Yahoo group: naqccfl
Date: 2018-01-04 23:24:11 UTC
From: Stephen Szabo
Topic: 784 Message: 784
Attachments: 2 described; binary payloads are missing from this source WARC

Soooooooooo……Happy New Year! Hope everyone had a GREAT holiday!

After the last round of discussion about locations……in the never ending quest to find great radio places, I think I found some good prospects. All have water features! I attached the revised schedule for everyone's review, and here is a short descriptiuon and link for the "new places":

* April – Mill Lake Park, Orange City: Small park with several picnic tables and a pavilion – small lake. http://www.sportsvolusia.com/facilities/orange-city/millake.stml
* May - Port Orange Riverwalk Park, Port Orange: So new, the official City link has almost nothing yet! Covered pavilion/picnic benches, fronts the Halifax River. This link is a prive site but gives you the scoop! http://www.volusiacountymoms.com/2017/12/riverwalk-park-in-port-orange-splash-pad-kayaking-playground-and-more.html
* September – Mary McLeod Bethune Park, NSB: Several pavilions and covered tables. Fronts the Atlantic Ocean (yeah, how's that for water!) - this site has intrigued me for some time. http://www.sportsvolusia.com/facilities/new-smyrna/marymcleod.stml
* November – Bethune Point Park, Daytona Beach: Was used some years ago, then a skateboard park went in – and it had the neighbor "hoods" there for a while; then came the homeless. Cleaned up and not so populated any more, but it was slammed by Matthew and Irma and is currently closed for repairs right now – but scheduled to re-open in the spring. Covered tables front the Halifax River. http://www.sportsvolusia.com/facilities/daytona-beach/bethune.stml

As of now, I have "posted" the schedule to the groups web page https://wb4omm.com/naqcc-fl-chapter/ .

Thoughts, comments????

Stay warm!

72/73!

Steve Szabo WB4OMM #5913

Attachments: 1 described; binary payloads are missing from this source WARC

Good Evening All!

Well folks, I hate to do this but…….the WX for this Friday's NAQCC-FL Parkpediton is NOT looking favorable. Thursday night's low is forecast at 33 degrees, and the hourly is showing 34 degrees at 5am, 42 degrees at 9am, less than 50 degrees at noon. While not put off by a bit of chill, when it's below 50 degrees with the open water breeze on Hontoon Island State Park, the wind chill is going to be quite "blustery" to say the least! There is no shelter there to speak of to retreat from the cold.

So with that said (sigh), I am suggesting we postpone our outing for a week – re-scheduling for Friday, January 26th. It should be a bit warmer next week.

Thoughts?????

As I received a half dozen replies in favor of postponing our event (none against), I will post the rescheduled date on the web page.

See you next week!

Steve WB4OMM

John/Paul – will have an announcement for the outing to you next Tuesday……..

Donation of "stuff" for the club.

Still what's available"

* Heath IO-4550 Oscilloscope - 10 MHz, dual-trace. With manuals and cables. Does not power up - might just be a fuse. Don't know. But most likely fixable (scope worked back in the day). $1 to club.

UPDATE: Put it on the bench, replaced the fuse inside - works FB! Now I want $5 for the club....

* Heath IM-5228 VTVM - the Kat's Meow for VTVMs. I have one of these on my workbench, they were the best VTVM on the market through the '90s (and still are!). One knob is missing the aluminum insert, but it powers up and seems to work OK. Probably needs a good cleaning and alignment. Has the probe and cable. No manual (but they are available). Has the tilt/swivel bail too! $10 to the club. I have the manual in a .pdf file

UPDATE: The knob has been fixed, and I calibrated the meter. It is working FB! Also a new "C" cell for the ohms..still want $10 for the club..

First come, first served! Or make an offer...this stuff needs a home. Pass this info around! It's open for sale to anyone...

73!

815. NFL SM Election

Yahoo group: naqccfl
Date: 2018-03-31 17:04:12 UTC
From: Stephen Szabo
Topic: 815 Message: 815

Good Afternoon!

I am sending this as Steve Szabo WB4OMM, NFL Section Life ARRL Member.

Many of you are sending me messages asking about my "replacement" as Section Manager since I am not running for another term. There are two nominees that will be on the ballot. I am supporting and endorsing current Assistant Section Manger Kevin Bess KK4BFN. I believe Kevin is the best suited and qualified - and is a real "people person". I believe he will serve the Section well and continue many of the positive accomplishments achieved over the last 4 years. Kevin has an "extended" campaign notice out in this month's QST NFL Newsletter - http://arrl-nfl.org/wp-content/uploads/2018/03/00-QST-NFL-April-2018.pdf

Hope this clarifies my support! Feel free to "pass" this around.

73 to all - hope you have a WONDERFUL EASTER HOLIDAY!

Steve WB4OMM

816. Passing of Dennis Burgoyne WD3B

Yahoo group: naqccfl
Date: 2018-04-15 18:47:49 UTC
From: Stephen Szabo
Topic: 816 Message: 816

It is with great sadness that I report to you that I just received a call from Karl Martin, Volusia Co EC, informing me of the passing of our good friend and longtime comrade in Amateur Radio, Dennis Burgoyne WD3B.

Dennis passed away this morning from medical complications. His family told Karl in accordance with Dennis' wishes, there will not be a service, but if there is any gathering or remembrance, they will let him know, and he will let me know.

Please keep Dennis and the Burgoyne family in your thoughts and prayers. We have lost another great friend.

Greetings North Florida Hams! Welcome to the GREATEST HOBBY IN THE WORLD!

Summer has arrived in Daytona Beach. How do I know? Because I have antenna work to do and the daily temps are in the mid-80s already. While the humidity is still "down" (only 65%), outdoor laboring makes for some profuse perspiration! Shame on me for waiting so long!

The election voting for the NFL Section Manager position ends May 20th- I hope you voted!!!

As I write this, the upcoming weekend is the Florida QSO Party. Some of my comrades (henchmen?) will be with me as we traverse the "wilds of the Florida interior". We operate a multi-operator (4 of us), multi-transmitter (2), mixed mode (SSB and CW), mobile (we travel through 8 counties in 2 days) operation. The purpose of the operation? We have fun - we pick on each other and use the event as an excuse to have dinner at the Blackwater Inn in Astor (Lake County) Saturday night! Frank KB4T, Bob W2EJG, Kevin KK4BFN and myself have completed this adventure for many years, and each year is more fun than the last! Great laughs and great food. I hope you participate in our home state contest!

Dayton (Xenia?) Hamvention is in a few weeks. My brother John KI4LOL and I will attend both the Hamvention and the Four Days in May (FDIM) events in the area. We're driving but making a two day up and back trip so we're not worn out for the festivities. Wednesday night I'll be in the NAQCC Sprint from Cleveland, TN; Thursday night is the CWOps dinner; Saturday the FDIM Banquet. Not sure where Friday will lead us, but I'm thinking of joining my good friends from the Orlando ARC for dinner maybe! Friday and Saturday morning look for me at the ARRL RadioSport Booth performing "card checking" for awards. The rest of the time I'll be visiting ham friends from all over the US and the rest of the world. Always nice to have an "eyeball" with someone you work on the radio! Sunday, we head back to Cleveland, TN stopping in Corbin, KY to visit "Where It All Began" ..the home of Colonel Sanders and Kentucky Fried Chicken! Monday, we finish the ride home.

Please continue to send in the EC Monthly Reports to the NFL Web Page http://arrl-nfl.org/?page_id=4787 unless otherwise notified by me. It's important to document our activities.

Check out our fabulous NFL Section Web Page http://arrl-nfl.org/ - our spectacular Newsletter is here for all to enjoy!

Get involved, get active, get happy! Stay safe, get on the air, and have fun!!

831. June 2018 - WB4OMM FINAL NFL SM Message

Yahoo group: naqccfl
Date: 2018-05-31 22:42:24 UTC
From: Stephen Szabo
Topic: 831 Message: 831
Attachments: 1 described; binary payloads are missing from this source WARC

Greetings North Florida Hams! Welcome to the GREATEST HOBBY IN THE WORLD!

This is my last monthly Section Manager message - congratulations to Kevin Bess KK4BFN for successfully winning the NFL Section Manager election! Next month's message will be his.

This statement is for all of the Section Appointees - by rules, your "appointed" term of office effectively ends with my tenure as Section Manage on June 30, 2018 - HOWEVER..while I can't speak for Kevin, I am sure he will repeat this statement - effective July 1, you are "reappointed" to your position without a break, and unless removed (either by voluntary request of otherwise), you have another 2 year term of appointment. Kevin will speak to this in his July message.

Also, I will send out an updated Section Leadership/Appointee listing before the end of June showing some updates and as few changes. So don't worry about your term!

I would ask you support as Kevin as he gets acclimated to the position; while it's not, "brain surgery", there is quite a bunch to learn! I will be actively working with Kevin over the next month or so to make it a seamless transition. I will not be going to far, I will be "appointed" as an "Assistant SM" after July 1st! There are no changes planned for any of the leadership positions in the Section - and our wonderful Newsletter editor Marty WB2VYK and Webmeister Bert N8NN are remaining! There will be a new OO Coordinator as Rick AA4W had asked to step down earlier this year, and our SEC Steve W4LOM also is leaving. More on those appointments in the next month when Kevin "officially" take the helm!

I looked back at the last 47 months of my tenure - then took a look at the calendar/mileage logs. Wowwee! 105 Club and ARES group meetings; 69 days at 34 hamfests/tailgates. 17,882 driving miles in-state (Florida) - not including the dozens of trips that were anything less than 50 miles round trip and the trips that included air miles! I can't believe it was that much! I can't believe it's been four years!

We had tornados and 4 tropical storms/hurricanes that hit our section - plus a winter freeze, wildfires, flooding, and hundreds of "special events" that our folks provided communications support. National Parks on the Air, the "Red Badge Event", and the ARRL Centennial...plus Orlando ARC hosting the National ARRL Convention! You did it all..and you folks DID IT WELL. I am proud of the time I had with you.

While I cringed at the thought of some of those long trips when leaving, I was truly grateful after I arrived. All of the groups I met and worked with were open, friendly, and inviting! I felt like I was treated as royalty

every time. I feel blessed and thankful that all you expended the efforts to make us look so good. Folks, it's not about the radios - it's about the people. Thank you for the wonderful trip!

Please send the EC Monthly Reports to the NFL Web Page http://arrl-nfl.org/?page_id=4787 . It's important to document our activities. We have so many!

Watch for new appointments in the SEC, PIC, and OOC positions in the next few weeks.

Check out our fabulous NFL Section Web Page http://arrl-nfl.org/ - our spectacular Newsletter is here for all to enjoy!

Get involved, get active, get happy! Stay safe, get on the air, and have fun!!

My best wishes to all. Thank you, Northern Florida Section, for a great time!

833. Florida Field Day Proclamation

Yahoo group: naqccfl
Date: 2018-06-21 18:57:08 UTC
From: Stephen Szabo
Topic: 833 Message: 833
Attachments: 1 described; binary payloads are missing from this source WARC

Well, as many of you know, every year I request an Amateur Radio Week Proclamation from the Governor of the State of Florida, and every year there has been a "problem".

I was not disappointed this year.

I requested the proclamation online on May 25 at 10:48 AM EDT. As I had not received it as of today, I called the Governor's office in Tallahassee. To make a long story short, they don't have the request. (They did find my previous years requests..go figure).

I sent the 2018 request by e-mail to the person I spoke to, emphasizing my disappointment and frustration for this and the previous years "problems". She is going to try to get it to me as soon as possible, but I am seriously doubting I will see it before the end of the Field Day event. Amazing how everyone else can get me one in a few days - but not the Governor of the State of Florida.

I sincerely apologize for not getting it to you on time this year. As soon as I get it, I will forward it.

Enjoy you Field Day event, be safe!

Get involved, get active, get happy! Stay safe, get on the air, and have fun!!

My best wishes to all. Thank you, Northern Florida Section, for a great time!

Subject: [NFLSEC] Florida Field Day Proclamation

Well, as many of you know, every year I request an Amateur Radio Week Proclamation from the Governor of the State of Florida, and every year there has been a "problem".

I was not disappointed this year.

I requested the proclamation online on May 25 at 10:48 AM EDT. As I had not received it as of today, I called the Governor's office in Tallahassee. To make a long story short, they don't have the request. (They did find my previous years requests..go figure).

I sent the 2018 request by e-mail to the person I spoke to, emphasizing my disappointment and frustration for this and the previous years "problems". She is going to try to get it to me as soon as possible, but I am seriously doubting I will see it before the end of the Field Day event. Amazing how everyone else can get me one in a few days - but not the Governor of the State of Florida.

I sincerely apologize for not getting it to you on time this year. As soon as I get it, I will forward it.

Enjoy you Field Day event, be safe!

Get involved, get active, get happy! Stay safe, get on the air, and have fun!!

My best wishes to all. Thank you, Northern Florida Section, for a great time!

EVERYONE COUNTS!

Tomorrow, Friday July 20, I will be QRP at the Veterans Park in Spring Hill, FL.

9AM to 12 noon.

This park is on Spring Hill Dr about 7 miles east of US19 in west Hernando Co.

Will be on 20m, 14.060 and around 14.030 MHz CW only.

Anyone wishing to join me all welcome.

GM Curt,

Heard you working Ron but I sure can't hear him here in PA.

You're 589 here in rural PA.

Curt,
Heard you very good on 14.060. We had heavy rain here starting right after 9AM so waited until after 10 when it was starting to clear. It is now 11:45 and rain has started again. Bad day for park event.

You had good sig, S9, but we have high noise here. We have had lots of rain in recent month or so and seems the noise has really picked up especially on 40 & 80m, 20 over most ot the time on 80. I am NCS for evening CW nets on Saturday and last 2 Sats could not call them for could hear only a few station.
I was on my FT817, 5W with 80m Windom and was surprised you heard me, thanks for listening.

All next week, I hope to be operating QRP portable from Shelby County Tennessee (near Memphis, Land of the Delta Blues). Cannot give definite times, as that depends on daughter and 3 granddaughters lol.
I also plan on getting on on the SKCC SKS Tuesday evening, but that too is 'iffy'.
Hope to work some of you.
Curt WA2JSG NJ/TN
